1. Refer to the Application, Exhibit C, Current and Proposed Rates. Confirm whether the proposed rates were calculated correctly as the proposed rates do not appear to include the appropriate increase of Purchased Water Adjustment (PWA) factor respective to the number of gallons. For example, if the 1-Inch Meter has a minimum of 5,000 gallons the PWA factor to increase the proposed rate should be multiplied by 5, in this case the \$0.27 PWA factor will result on a \$1.35 increase because the 0.27 PWA

factor is per 1,000 gallons as explained in the PWA Form 1 page 2. If the district believes the proposed rates were calculated correctly explain and provide the calculations in Excel spreadsheet format with all formulas, columns, and rows unprotected and fully accessible.
