**RECEIVED**

In the matter of docket number 2026-0006  
Proposed cell tower near Pineville Ky

**JAN 21 2026**  
**PUBLIC SERVICE  
COMMISSION**

Director, I am writing in response to certified mail that I received on Jan 9, 2026 advising my family of a proposed cell tower to be constructed near my home,

I have concerns in regard to the close proximity to my house, the height of the proposed tower in relation to my dwelling and how these might affect our health, both now and in the future. I also question any possible negative affects to electronic equipment that we own, including televisions, blue tooth devises and even cellular phone service, as I am not a wireless subscriber of the proposed transmitter.

Though information on this subject is varied, suggested proximity appears to be outside of 1600 feet from the tower. My home is approximately 1000 ft from the tower and as it sits at a higher elevation than the base of said tower, the hoped for protection of height is diminished.

I have real fears that the installation will adversely affect the healt of both my wife and myself. Suggestions found on-line that might offer protection from cellular radiation, including protective bedroom curtains, curtailing time spent outdoors, positioning sleeping areas away from exposure seem to me to be wholly inadequate and quite unnecessary since I have lived on this property for 50 years without fear of dangerous radiation. I ask that you please take into consideration the healt and safety of me and my family, as well as our neighbors. I fully understand progress, but as I can already see two cell towers from my yard it would seem that a site better positioned for the community at large and not simply for corporate convenience would better serve me and my neighbors.

Respectfully,

*Jay M. Money*
