Dear Kentucky Public Service Commission,

We need to lower pollution levels and threats of extreme temperatures and extreme weather events . These extremes threaten our health, agriculture, and economy.

These threats are expensive and these costs need to be factored in.

Let's not lock ourselves into paying for 40 more years of natural gas when we should be well into our transition away from fossil fuels. Please approve the coal retirements and reject the proposals for two new large scale 40-year fossil fuel plants.

LG&E/KU customers like me have struggled with paying our energy bills or are affected by the air pollution from fossil fuel power plants. Investing in energy efficiency (DSM) instead will help lower the overall demand for energy while helping keep energy affordable for us Kentuckians.

In addition to my public comment above, please see the comment submitted by Kentuckians for Energy Democracy for important data and evidence that supports my

lived experience and concerns.

Thank you for ensuring that Kentuckians' voices are an important part of the regulatory process.

Sincerely,

Mr. Andrew Kang Bartlett
