

NORTH MARSHALL WATER DISTRICT

Kentucky Public Service Comm.

REF Case # 2008-00551

North Marshall Water District has installed some 5,000 new automated meters and reading system. To date we are 90 % complete with the entire project. The meters installed to date are all 5/8th inch meters. We have about 200 left to install, that have already be paid for with this project. In addition we have app. 300 larger meter to purchase at a later date. NMWD has supplied some 2000 man hours involved changing out the meters for a total cost of \$ 38,000 in labor cost. I have enclosed the agreement with IST Kentucky Bank that has supplied financing for the project.
