RE: Submittal of Revised FAA Registration
New Cingular Wireless PCS, LLC dba AT&T Mobility, PCS
Case No. 2016-00076

Dear Director Mathews:

In compliance with the Final Order in the above referenced matter, we have enclosed a revised FAA Antenna Registration. Please let us know if you require any additional information regarding this matter. In the meantime, please do not hesitate to contact us if you have any questions regarding this matter.

Sincerely,

Robert W. Grant
Attorney for AT&T Mobility

**UNITED STATES OF AMERICA
FEDERAL COMMUNICATIONS COMMISSION
ANTENNA STRUCTURE REGISTRATION**

OWNER: Nova Towers, LLC

FCC Registration Number (FRN): 0022051080

ATTN: Legal Nova Towers, LLC 1720 Peachtree Street Suite 629 Atlanta, GA 30309	Antenna Structure Registration Number <p align="center">1299012</p>
	Issue Date <p align="center">02/07/2017</p>
Location of Antenna Structure 2140 Highway 460 West West Liberty, KY 41472 County: MORGAN	Ground Elevation (AMSL) <p align="right">313.6 meters</p>
	Overall Height Above Ground (AGL) <p align="right">79.9 meters</p>
Latitude Longitude 37- 53- 34.0 N 083- 17- 14.1 W NAD83	Overall Height Above Mean Sea Level (AMSL) <p align="right">393.5 meters</p>
Center of Array Coordinates <p align="center">N/A</p>	Type of Structure LTOWER Lattice Tower
Painting and Lighting Requirements: FAA Chapters 4, 8, 12 Paint and Light in Accordance with FAA Circular Number 70/7460-1L Conditions:	

This registration is effective upon completion of the described antenna structure and notification to the Commission. **YOU MUST NOTIFY THE COMMISSION WITHIN 24 HOURS OF COMPLETION OF CONSTRUCTION OR CANCELLATION OF YOUR PROJECT, please file FCC Form 854.** To file electronically, connect to the antenna structure registration system by pointing your web browser to <http://wireless.fcc.gov/antenna>. Electronic filing is recommended. You may also file manually by submitting a paper copy of FCC Form 854. Use purpose code "NT" for notification of completion of construction; use purpose code "CA" to cancel your registration.

The Antenna Structure Registration is not an authorization to construct radio facilities or transmit radio signals. It is necessary that all radio equipment on this structure be covered by a valid FCC license or construction permit.

You must immediately provide a copy of this Registration to all tenant licensees and permittees sited on the structure described on this Registration (although not required, you may want to use Certified Mail to obtain proof of receipt), and *display* your Registration Number at the site. See reverse for important information about the Commission's Antenna Structure Registration rules.

You must comply with all applicable FCC obstruction marking and lighting requirements, as set forth in Part 17 of the Commission's Rules (47 C.F.R. Part 17). These rules include, but are not limited to:

Posting the Registration Number: The Antenna Structure Registration Number must be displayed in a conspicuous place so that it is readily visible near the base of the antenna structure. Materials used to display the Registration Number must be weather-resistant and of sufficient size to be easily seen at the base of the antenna structure. Exceptions exist for certain historic structures. See 47 C.F.R. 17.4(g)-(h).

Inspecting lights and equipment: The obstruction lighting must be observed at least every 24 hours in order to detect any outages or malfunctions. Lighting equipment, indicators, and associated devices must be inspected at least once every three months.

Reporting outages and malfunctions: When any top steady-burning light or a flashing light (in any position) burns out or malfunctions, the outage must be reported to the nearest FAA Flight Service Station, unless corrected within 30 minutes. The FAA must again be notified when the light is restored. The owner must also maintain a log of these outages and malfunctions.

Maintaining assigned painting: The antenna structure must be repainted as often as necessary to maintain good visibility.

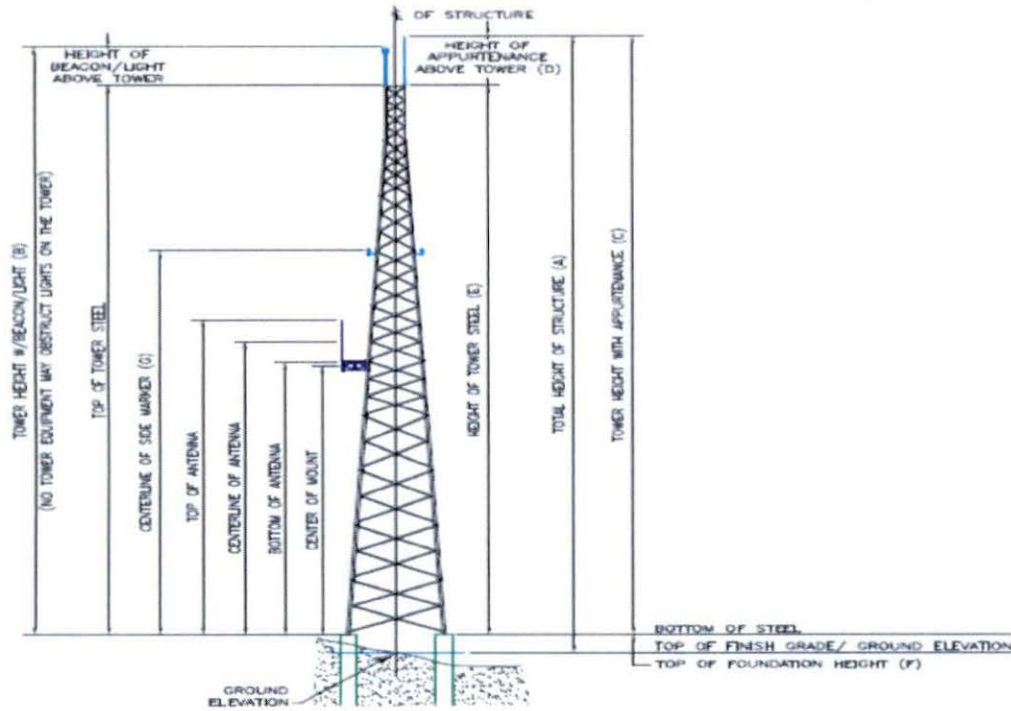

Complying with environmental rules: If you certified that grant of this registration would not have a significant environmental impact, you must nevertheless maintain all pertinent records and be ready to provide documentation supporting this certification and compliance with the rules, in the event that such information is requested by the Commission pursuant to 47 C.F.R. 1.1307(d).

Updating information: The owner must notify the FCC of proposed modifications to this structure; of any change in ownership; or, within 30 days of dismantlement of the structure.

You can find additional information at [\[insert link\]](#) or by calling (877) 480-3201 (TTY 717-338-2824).

Tower Tape Drop Form

Provide "tape drop" centerline heights (CL) "AGL" (Above Ground Level) in the Antenna worksheet for Antenna (Tip and Tail) and Mount Centerline as in the example below

Centerline obtained by tape drop w/ a +/- 1" tolerance per 100'. Centerline measured from bottom of Structural Steel to center of equipment

ON MEASUREMENTS			
261' 9"	Total Height of Structure (A) <i>(measure from top of finish grade to top of highest appurtenance)</i>	255' 3"	Height of Tower Steel (E) <i>(measure from bottom of structure to top of structure)</i>
256'	Tower Height with Beacon / Light (B) <i>(measure from bottom of structure to top beacon / light)</i>	18"	Height of Foundation (F) <i>(measure from ground elevation to bottom of structure - top of foundation)</i>
255' 3"	Tower Height with Appurtenance (C) <i>(measure from bottom of structure to top of appurtenance)</i>		Height of Tower Extension <i>(if applicable)</i>
5'	Height of Appurtenance (D) <i>(measure from top of structure to top of appurtenance)</i>	127'	Centerline of Side Markers (G) <i>(if applicable)</i>

Comments:

I filed a part 2 this morning and didn't note the actual tower height (262') is 13 feet lower than the filed tower height (275'). I've attached the tape drop drawing issued today showing the tower as built. I apologize for my oversight.
