RE: Todd County Water District
Novelis Water Supply Project
Case No. 2019-00180

Dear Mr. Chandler,

Per the PSC Order dated July 19, 2019, please note the following updates regarding the Todd County Water District's Novelis Water Supply Project:

- Contract 1 (Line Extension & Meter Station) was substantially complete as of November 25, 2019. The Contractor (Horsley Construction) was notified on December 4, 2019. The Contractor continues to work on punch list items and final cleanup, all with payment of retainage pending.
- Contract 2 (Tank Addition) is still in progress. The contract presently sits at 81% complete. The Contractor expects to achieve substantial completion by October with placement of the tank into active service.
- The District expects to utilize the project contingency funds on a few other improvements within the system. In accordance with the Order, please note that TCWD is working with USDA Rural Development to allocate these funds to possibly fund line extensions along Davenport Road and Latham Road plus install up to 7 new master meters with SCADA communication at various locations in the county; all as funds allow.
- McGhee Engineering is preparing the 'as-built' drawings for the referenced contracts. A copy of these is expected to be forwarded to the PSC after the tank contract is completed in the Fall.

If you have any questions or need additional information, please feel free to call our office or email chris.wilcutt@mcgheeengineering.com.

Sincerely,

McGhee Engineering, Inc.

Chris Wilcutt P.E.
Project Engineer
