Utility Name: Solar Panel Installation proposals to minimize set backs

State the nature of your concern: Fleming County project 2020-00206. I wish to express my complaint on the plans to construct solar panels for electric production. Solar energy is Dirty, creates only a few jobs, panel life is only 30 years with no place to recycle in Kentucky.

Broken solar panels leak cadmium and other toxins. Cadmium leaks are not proven safe in a Karst topography. Loss of prime farm land is not acceptable in light of local food insecurity. .

Less than 1,000 foot setbacks are not acceptable for noise. Lack of mitigation plans is not acceptable. Evolving technology will soon replace this and the mess will be left behind.

Lessons of Maxey Flats has not been forgotten in Fleming County, which is a Nuclear Waste Super Fund Site.

Have you contacted the utility about the problem: No
