This letter is in support of Kenergy's broadband deployment project. The fiber optic lines have been ran in front of my home for months just waiting for someone to make them work. With AT&T, our current provider when I call customer service I am calling overseas. It would be nice if there were an issue someone local would be providing assistance. There is no reason in this day and age high speed internet is not available for everyone. I literally live between the high school and the library. Two places that definitely need high speed access. If Kenergy wants to provide that service to it's customers I don't understand the problem as to why they shouldn't be allowed. It doesn't matter who provides the service. What matters is that people of access to what in this age has become a basic need for survival. As this world moves to a tech age faster everyday and with covid-19 pushing more people home and to their rural homes this is more important to have than ever.

*Thank you,*

*Julia Alvey*
