Subject: Solar Generation Station Siting

Dear Sir/Ma'am:

In response to a recent article regarding a solar generation station to be built on 450 acres of farmland in Taylor County, please relay to the Electric Generation & Transmission Siting Board that it is not wise to convert farmland for these purposes. It makes much more sense to repurpose abandoned industrial and commercial sites, bring jobs to Eastern Kentucky by building on old strip-mine sites, or perhaps building on a South-facing slope too steep for agriculture. Clearly, though, a "solar farm" is not fit for prime farmland.

Thank you for considering these comments.

Sincerely,

Joshua J. Higgins
