

TO THE PUBLIC SERVICE COMMISSION,

My name is Shayla and I am a Berea College student in Berea, KY. I am an organizer around the Big Hill line. This is an 8.5 mile long and 100ft wide transmission line that the East Kentucky Power Cooperative is trying to put into Berea, KY. I am opposed to this project because I hike at the Pinnacles and this project has a good chance of disrupting the beautiful views we have at the Pinnacles. I am also concerned that this will be disruptive of the natural life that has been undisturbed for years. The Stop The Big Hill organizers sent a letter to you all (the Public Service Commission) on November 28, 2023 and have yet to get a response. I am highly concerned by this and would love to see a response from you all come through. I am asking you today to find our letter sent November 28, 2023 (that had 400 signatures accompanying it) and respond to us. If there is a reason that you "cannot do anything" about this project, you need to tell us what that reason is, as we have heard rumors that

It may be because we don't have a case number. If this is true, how do we get one? It is absolutely your all's job to hear our concerns and act on them, and to protect our rights when we feel they are being infringed on. I ask that you respond to our letter with next steps for us to put forward a case. I hope to hear from you soon.

Thank you for all you do, please help us protect our lands and our health.

Sincerely,
Shayla Long

Respond to me at 5508 Patti Ln.,
Louisville, Ky, 40219.
