Renewable Energy Program

KENTUCKY PUBLIC SERVICE COMMISSION

PSC KY No. 4, Third Revised Sheet No. 26
Cancelling PSC KY No. 4, Second Revised Sheet No. 26
For All Areas Served

STANDARD RIDER

This “Renewable Energy Program” is a rider to all current rate schedules. The purpose of this program is to provide members with a source of renewable energy or renewable energy attributes called Renewable Energy Certificates (“RECs”). There are three (3) options. Cumberland Valley Electric, via its participation in East Kentucky Power Cooperative, Inc.’s (“EKPC”) Renewable Energy Program (“Envirowatts”), will aggregate the contributions provided by the retail members to develop renewable energy, purchase renewable energy, or purchase RECs. Alternatively, the retail member, Cumberland Valley Electric, and EKPC will enter into a special agreement to purchase renewable energy to offset the retail member’s existing energy consumption.

APPLICABLE

In all territory served.

DEFINITIONS

- a) “Renewable energy” is that electricity which is generated from renewable sources including but not limited to: solar, wind, hydroelectric, geothermal, landfill gas, biomass, biodiesel used to generate electricity, agricultural crops or waste, all animal and organic waste, all energy crops and other renewable certified resources.
- b) A REC is the tradable renewable energy attribute which represents the commodity formed by unbundling the environmental-benefit attributes of a unit of renewable energy from the underlying electricity. One REC is equivalent to the environmental-benefits attributes of one MWh of renewable energy.

AVAILABILITY OF SERVICE

This rider is available to any member on any rate schedule.

Option A - Retail members may participate in the program by contributing monthly as much as they like in \$2.75 increments (e.g., \$2.75, \$5.50, \$8.25, or more per month). The retail member may allocate their “Renewable Energy Program” contribution to a type or types of renewable energy offered by the Envirowatts program (solar, wind, hydroelectric, or landfill gas).

Option B – Option B is a pilot program and is available on or before March 25, 2025. A retail member may, after entering into a special agreement with Cumberland Valley Electric and EKPC, purchase renewable energy to offset the retail member’s existing energy consumptions under the members’ applicable rate schedule.

PURSUANT TO 807 KAR 5:011 SECTION 9 (1)

Renewable Energy Program (continued)

Option C – After entering into an agreement with Cumberland Valley Electric and EKPC, commercial and industrial (“C&I”) retail members have the opportunity to purchase RECs through Cumberland Valley Electric and EKPC to offset up to all of their energy consumption with RECs, resulting in that portion of energy consumption to be considered renewable.

ELIGIBILITY

Under Option A, a “Pledge to Purchase Renewable Energy” must be signed by the retail member prior to service under this rider. Retail members may not owe any arrearage prior to participating in the Renewable Energy Program. Funds contributed by retail members are not refundable.

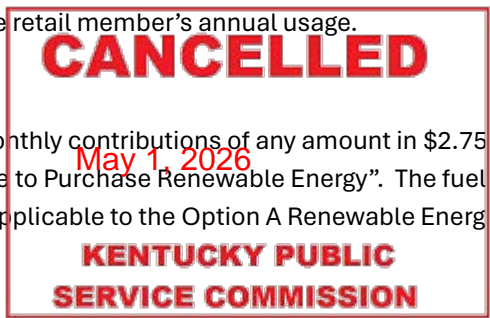

Under Option B, a retail member must execute an agreement with Cumberland Valley Electric and EKPC to purchase, supply or secure a minimum renewable capacity of 1 MW. The maximum annual renewable energy under the agreement cannot exceed the participating retail member’s average annual consumption over the previous three (3) years. For new businesses with no usage history, the maximum annual renewable energy under the contract will be estimated. The type of renewable energy will be determined by the retail member. Retail members having multiple services across the EKPC system may aggregate consumption and renewable energy totals into a single agreement.

Under Option C, C&I retail members, in conjunction with Cumberland Valley Electric and EKPC, will determine the type of renewable resource and amount of RECs Cumberland Valley Electric and EKPC will purchase monthly on behalf of the participating retail member. The original agreement will expire after one (1) year, but will automatically renew monthly until the retail member provides sixty (60) days’ notice of cancellation. The retail member may also amend the agreement to change the amount of RECs or type of renewable resource generating such RECs they will purchase. EKPC may sell and retire RECs generated by EKPC when applicable with a market-based rate per REC.

The sum of renewable energy purchased under Option B and the RECs purchased and retired under Option C shall not exceed the retail member’s annual usage.

RATE

Under Option A, monthly contributions of any amount in \$2.75 increments shall be made pursuant to the terms of the “Pledge to Purchase Renewable Energy”. The fuel adjustment clause and the environmental surcharge are not applicable to the Option A Renewable Energy Program contributions.
