Rules and Regulations

AVAILABILITY

Available to all cooperative associations which are or shall be members of the Seller. The electric power and energy furnished hereunder shall be separately metered for each point of delivery.

MONTHLY RATE-PER SUBSTATION OR METERING POINT

Substation Charge

\$100 per month for each energized substation. In the event of joint utilization, this charge shall be divided equally.

Demand Charge

\$1.10 per kw of billing demand.

Energy Charge

First 300,000 Kwh @ 5.0 mills per Kwh  
Next 400,000 Kwh @ 4.4 mills per Kwh  
Excess of 700,000 Kwh @ 3.9 mills per Kwh

Minimum Monthly Charge

The minimum monthly charge under the above rate shall not be less than \$100 to each member for each energized substation (metering point).

BILLING DEMAND

The billing demand is the arithmetical sum of the maximum kilowatt demands measured (and adjusted for power factor as provided below) at all points of delivery. The maximum kilowatt demand at each point of delivery shall be the highest average rate at which energy is used during any fifteen consecutive minute period of the month.

FUEL ADJUSTMENT

The above energy charges will be increased or decreased 0.0011¢ per Kwh for each .1¢ by which the average delivered cost of fuel at the Dale and Cooper stations during the immediately preceding six months exceeds 21¢ or is less than 18¢ per million BTU.

POWER FACTOR ADJUSTMENT

The member cooperative agrees to maintain unity power factor as nearly as practicable at each point of delivery. If the power factor measured at a point of delivery at the time of monthly maximum demand is determined to be less than 80%, the monthly maximum demand measured at that point of delivery shall be adjusted by multiplying the monthly maximum demand by 80% and dividing the product thus obtained by the actual per cent power factor measured at the time of such maximum demand.

DATE OF ISSUE April 15, 1970
