Renewable Energy Program

Standard Rider

This "Renewable Energy Program" is a rider to all rate schedules used by the Cooperative. The purpose of this program is to provide retail members with a source of renewable energy or renewable energy attributes called Renewable Energy Certificates ("RECs"). There are three (3) options. Jackson Energy Cooperative Corporation ("Jackson Energy"), via its participation in East Kentucky Power Cooperative's ("EKPC") Renewable Energy Program (Envirowatts), will aggregate the contributions provided by the retail customers to develop renewable energy, purchase renewable energy, or purchase RECs. Alternatively, the retail member, Jackson Energy, and EKPC will enter into a special agreement to purchase renewable energy to offset the retail member's existing energy consumption.

Applicable

In all territory served.

Definitions

Renewable energy is that electricity which is generated from renewable sources including but not limited to: solar, wind, hydroelectric, geothermal, landfill gas, biomass, biodiesel used to generate electricity, agricultural crops or waste, all animal and organic waste, all energy crops and other renewable certified resources.

A REC is the tradable renewable energy attribute which represents the commodity formed by unbundling the environmental-benefit attributes of a unit of renewable energy from the underlying electricity. One REC is equivalent to the environmental-benefits attributes of one MWh of renewable energy.

Availability of Service

This rider is available to any customer on any rate schedule.

Option A - Retail members may participate in the program by contributing monthly as much as they like in \$2.75 increments (e.g., \$2.75, \$5.50, \$8.25, or more per month). The retail member may allocate their "Renewable Energy Program" contribution to a type or types of renewable energy offered by the Envirowatts program (solar, wind, hydroelectric, or landfill gas).

Option B - Option B is a pilot program and is available on or before March 25, 2025. A member may, after entering into a special agreement with Jackson Energy and EKPC, purchase renewable energy to offset the member's existing energy consumptions under the members' applicable rate schedule.

Option C - After entering into an agreement with Jackson Energy and EKPC, commercial & industrial ("C&I") retail members have the opportunity to purchase RECs through Jackson Energy and EKPC to offset up to all of their energy consumption with RECs, resulting in that portion of the energy consumption to be considered renewable.
