

STANDARD RATE SCHEDULE

R

Residential Rate

Applicable:

In all territory served.

Availability:

Available for single-phase residential service for lighting, heating, cooking, refrigeration, household appliances and other domestic purposes, subject to the special terms and conditions set forth on Sheet Nos. 27 and 28 of this Tariff.

Rate:

First	20 kilowatt-hours per month	5.00¢ net per kwh
Next	80 kilowatt-hours per month	2.58¢ net per kwh
Next	400 kilowatt-hours per month	2.04¢ net per kwh
Excess over	500 kilowatt-hours per month	1.70¢ net per kwh

Fuel Clause:

The monthly amount computed at the charges specified above shall be increased or decreased in accordance with the Fuel Clause set forth on Sheet No. 21-A of this Tariff.

Minimum Bill:

\$1.00 net per meter per month.

Prompt Payment Provision:

The monthly bill will be rendered at the above net charges (including net minimum bills when applicable) plus an amount equivalent to 5% thereof, which amount will be deducted provided bill is paid within ten days from date.

Applicability of Rules:

Service under this rate schedule is subject to Company's rules and regulations governing the supply of electric service as incorporated in this Tariff.

STANDARD RIDER

Special Rate for Residential
Electric Space Heating Service

Applicable:

To Residential Rate R.

Availability:

During the eight monthly billing periods from October through May of the following year, a special rate of 1.10¢ per kilowatt-hour will be applicable to that portion of Residential Rate R consumption in excess of 500 kilowatt-hours per month to any residential customer who has permanently installed and in regular use during the heating season an approved type of electric space heating installation, wired for service at 208 volts or higher, and designed and used as the primary and predominating source of his household space heating requirements. The eight monthly billing periods referred to above shall start with the monthly period covered by the regular October meter reading and shall end with the period covered by the regular meter reading in May of the succeeding year.

In the case of multiple dwelling units served through a single meter under Residential Rate R, the special rate of 1.10¢ per kilowatt-hour herein provided for shall apply only to that portion of total monthly consumption in excess of 500 kilowatt-hours multiplied by the number of individual family units thus served.

Fuel Clause:

The monthly amount computed at the charges specified above shall be increased or decreased in accordance with the Fuel Clause set forth on Sheet No. 21-A of this Tariff.

Special Conditions:

Service under this rider is available only upon written application and subject to Company's inspection for the purpose of establishing eligibility of Customer's heating installation for service hereunder.

Water Heating Rate

Applicable:

In all territory served.

Availability:

Available to any residential or commercial customer for electric service to an approved type of automatic storage electric water heater, in conjunction with electric service for other purposes at the same location, under the terms and conditions herein specified.

Rate:

1.20¢ net per kilowatt-hour.

Fuel Clause:

The monthly amount computed at the charges specified above shall be increased or decreased in accordance with the Fuel Clause set forth on Sheet No. 21-A of this Tariff.

Minimum Bill:

\$1.00 net per month per heater.

Prompt Payment Provision:

The monthly bill will be rendered at the above net charges (including net minimum bills when applicable) plus an amount equivalent to 5% thereof, which amount will be deducted provided bill is paid within ten days from date.

Special Terms and Conditions:

1. To be eligible for service under this rate, water heaters must conform to the specifications herein set forth. Any water heater which does not conform to these specifications will be billed under the rate applicable to other electric service at the same premises.
2. Approved water heaters shall be of the automatic insulated storage type having a tank size not less than 30 gallons, equipped with either one or two 240-volt non-inductive heating elements, each controlled by a separate thermostat. Two element heaters shall be so connected that only one element can be in operation at any one time.
3. The water heater shall be served at 240 volts (nominal) through a separate meter over a special circuit run in conduit or approved flexible metallic cable with no service outlets in the circuit or on the heater. The company will furnish and maintain such separate meter. The customer shall make suitable provision for the installation and connection of such meter in the water heater circuits.

STANDARD RATE SCHEDULE GS

General Service Rate

Applicable:

In all territory served.

Availability:

Available to any customer for alternating current service, single-phase or three-phase, for lighting, power, and other general usage, measured and delivered at one of Company's standard distribution voltages. Service taken through each meter will be billed separately. If customer desires to take lighting service through a three-phase meter, he shall furnish and maintain any transformation or voltage regulatory equipment required for such lighting service.

Rate:

First	100 kilowatt-hours per month.....	5.0¢ net per kwh
Next	700 kilowatt-hours per month.....	3.1¢ net per kwh
Next	1200 kilowatt-hours per month.....	2.5¢ net per kwh
	Excess over 2,000 kilowatt-hours per month.....	2.0¢ net per kwh

Primary Service Discount:

A discount of 5% will be allowed on the monthly amount computed in accordance with the above charges when the customer takes service at distribution or transmission line voltage of 2300 volts or higher and furnishes, installs, and maintains complete substation structure and all equipment necessary to take service at the voltage available at the point of connection.

STANDARD RIDER

Special Rate for Non-Residential Electric Space Heating Service - Rates GS and LC

Applicable:

To General Service Rate GS and Large Commercial Rate LC.

Availability:

The special rate set forth in this rider shall be available during the eight monthly billing periods from October through May (hereinafter called "heating season") to customers regularly taking electric service under Rates GS or LC. Such special rate shall apply to separately metered service to electric space heating equipment installed and operated in accordance with the terms and conditions herein set forth.

Rate:

For all consumption recorded on the separate meter during the heating season the rate shall be 1.1¢ net per kilowatt-hour. This special rate shall be subject to the same Primary Service Discount, Fuel Clause and Prompt Payment Provision as are embodied in the rate schedule applicable to customer's regular service for other purposes at the same location.

During the four non-heating season months any electric usage recorded on the separate space heating meter shall be combined with metered usage for other purposes at the same location and be billed at the regular rate applicable to such other electric usage. In the case of customers taking regular service under Rate LC the separate meter for space heating service under this rider will be equipped to measure kilowatts of maximum demand: however, during the eight months of the heating season demand readings of such meter will not be used for billing, and the special rate will be applied to kilowatt-hour readings only. During each of the remaining four months of the year, Rate LC will be applied to the combined 15-minute maximum demands and the combined kilowatt-hour consumptions of both the separately metered heating service and service for other purposes at the same location. (For service connected under this Rider prior to February 1, 1974, demands will be combined on a coincident basis.)

Minimum Charge:

The minimum charge per heating season for service under this rider shall be \$5.00 per kilowatt of connected heating load but not less than \$30.00 per heating season for customers taking regular service under Rate GS, nor less than \$150.00 per heating season for customers taking regular service under Rate LC. This minimum charge is in addition to the regular monthly minimum of Rate GS or Rate LC, to which this rider applies; however, the heating equipment served hereunder shall not be included as a part of the customer's connected load for the purpose of establishing the regular monthly minimum of Rate GS nor shall the demands attributable to service under this rider (either in the heating season months or non-heating season months) be

STANDARD RIDER

Special Rate for Non-Residential Electric
 Space Heating Service - Rates GS and LC (Continued)

considered as part of the maximum demands to which the "50% ratchet" provision of Rate LC applies.

Special Terms and Conditions:

1. Service under this rider is available only upon written application and subject to Company's inspection for the purpose of establishing eligibility of customer's heating installation for service hereunder. All electrical equipment and wiring, including provision for the installation of Company's meters, shall be subject to the approval of the Company.
2. The design, type, and manner of operation of customer's space heating installation served hereunder must be acceptable to Company. The heating equipment shall be of approved type, either resistance or heat pump, designed and used as the primary and predominating source of heat during the full heating season for a building or an enclosed and well-defined section of a building. Under no circumstances will this rider apply to an electric heating installation used as a supplement to some other form of space heating.
3. The heating equipment served hereunder shall be supplied with electrical energy through one or more special circuits so designed and constructed that no other electricity consuming devices may be connected thereto. Provided, however, that when air cooling or air circulating equipment is operated in connection with the heating equipment served hereunder and it is impracticable to supply such equipment through regular non-heating circuits, then such equipment may be connected to this special circuit or circuits and the electric consumption thereof will be billed at the kilowatt-hour rate specified herein.
4. This rider contemplates the direct supply of space heating service through a separate meter rather than by submetering. However, under exceptional circumstances where it is impracticable for the customer to arrange his wiring for direct metering of space heating circuits, the Company may agree to measure customer's space heating usage by submeter. In this event the demand and kilowatt-hour readings of the submeter shall be deducted from the readings of the master meter for the eight months of the heating season to arrive at the quantities to be billed under applicable Rate GS or LC. During the remaining four months of the year, billings at applicable Rate GS or LC will be based on the readings of the master meter.
5. The eight monthly billing periods referred to above as the heating season shall start with the monthly period covered by regular October meter readings and shall end with the period covered by the regular meter readings in May of the succeeding year.

Large Commercial Rate

Applicable:

In all territory served.

Availability:

Available for alternating current service to commercial customers whose entire lighting and power requirements at a single service location are purchased under this schedule and who guarantee the minimum demand designated below under "Determination of Billing Demand."

Rate:

Demand Charge:

First 25 kilowatts of billing demand..... \$2.00 per Kw per month
 Next 975 kilowatts of billing demand..... \$1.75 per Kw per month
 Excess over 1000 kilowatts of billing demand..... \$1.60 per Kw per month

Energy Charge:

First 2,000 kilowatt-hours per month..... 1.9¢ per kwh
 Next 18,000 kilowatt-hours per month..... 1.4¢ per kwh
 Next 80,000 kilowatt-hours per month..... 1.1¢ per kwh
 Next 400,000 kilowatt-hours per month..... 1.0¢ per kwh
 Excess over 500,000 kilowatt-hours per month..... .9¢ per kwh

Determination of Billing Demand:

The maximum demand for the month shall be the highest average load in kilowatts occurring during any fifteen-minute interval in the month as shown by maximum demand instrument. Where light and power service at a single service location are measured through separate meters the highest fifteen-minute demands for each character of service shall be combined for billing purposes.

The billing demand shall be the maximum demand determined as above, provided that in no case shall the billing demand for any month be taken as less than 50% of the maximum demand recorded during the preceding eleven months (exclusive of that portion of such previously recorded demand attributable to the operation of summer air conditioning equipment normally used only during the period from April 15 to October 15 of each year) nor less than a minimum billing demand of 25 kilowatts. Provided, however, that a minimum billing demand of 10 kilowatts shall apply to any customer served under this rate schedule on March 1, 1964, for such time after that date as his period of service under this schedule remains unbroken.

Determination of Billing Demand:

The billing demand for the month shall be the highest average load in kilowatts occurring during any fifteen-minute interval in the month as shown by maximum demand instrument, but not less than 50% of the maximum demand similarly determined during the eleven preceding months, nor less than a minimum billing demand of 25 kilowatts. Provided, however, that a minimum billing demand of 10 kilowatts shall apply to any customer served under this rate schedule on March 1, 1964, for such time after that date as his period of service under this schedule remains unbroken.

LOUISVILLE GAS AND ELECTRIC COMPANY

1st Rev. SHEET NO. 21-A
 CANCELLING Original SHEET NO. 21-A

P. S. C. OF KY. ELECTRIC NO. 2

STANDARD RATE SCHEDULE

Fuel Clause

Applicable to: All rate schedules in this Tariff other than Rate OL.

The monthly amount computed in accordance with the provisions of each of the rate schedules to which this fuel clause is applicable shall be increased or decreased at the rate of .103 mill (.0103¢) per kilowatt-hour of monthly consumption for each one cent per million Btu by which the average cost of fuel consumed during the second preceding month is more or less respectively than 33.8¢ per million Btu. The average cost of fuel consumed during any month shall be determined by dividing the total charges to the Fuel expense accounts during such month by the number of millions of Btu consumed; provided, however, that such average cost will be reduced to the extent that fuel purchased at higher than average cost is consumed in the production of energy for sale to other electric utility companies and is used as the basis of charging such other electric utility companies. The increase or decrease shall be made in direct proportion to the difference from the base fuel cost of 33.8¢ per million Btu, including differences of fractional parts of a cent.
