RATE (continued)

Option #3: Renewable Power Agreement

Charges and energy credits for this service will be set forth in the written agreement between the Company and the Customer and will reflect a combination of the firm service rates otherwise available to the Customer and the cost of the renewable energy resource, including appropriate transmission costs to deliver the energy to the Customer, being directly contracted for by the Customer.

Renewable energy purchased under the Renewable Power Agreement cannot be used to offset demand or demand charges.

For each 15-minute interval in a billing period, Company will compare Customer's energy consumption to the energy delivered to the Company under the Renewable Power Agreement. In each such 15-minute interval: (i) if Customer's consumption exceeds energy delivered, the difference in kWh between energy consumed and delivered is Net Consumption; or (ii) if energy delivered exceeds Customer's consumption, the difference in kWh between energy delivered and consumed is Net Production.

- a. Company will bill Customer for all Net Consumption in each billing period, inclusive of base-fuel, fuel adjustment clause and ECR applied as a percentage of the billed amount, in accordance with the Customer's standard rate schedule.
- b. Company will also provide Customer a bill credit for all Net Production in each billing period, with all Net Production to be valued at the avoided energy cost calculated under Company's Standard Rate Rider LQF (Sheet No. 56).

Customer will pay all cost associated with implementing the Renewable Power Agreement, inclusive of the contracted energy price, with no costs shifted to non-participants.
