Street Lighting - Community, Municipalities, Towns

RATE  
PER UNIT

to the dollar amount of the above mentioned charge (plus or minus any adjustment for over or under collection) in the Cooperative's wholesale power cost for the next preceding month. The following formula shall apply:

$$\text{Adjustment Factor} = \frac{F \pm O}{S}$$

Where F is the above mentioned fuel charge by the wholesale supplier, less any credit for inter-system power sales; where O is the amount of any overage or shortage of fuel costs billed to revenue collected for the preceding periods; where S is KWH sales in the preceding month, including company use.

Special Terms and Conditions:

1. Cooperative will furnish and install the lighting unit complete with lamp, fixture or luminaire, control device and mast arm. The above rates contemplate installation on an existing pole in Cooperative's system. If the location of an existing pole is not suitable for the installation of a unit, the Cooperative will extend its conductor and install additional poles necessary for the lighting system; and the customer will be charged eight percent (8%) per year on the additional construction required for the lighting system only. The additional annual charge will be computed and one twelfth (1/12) of the total annual charge for additional construction, so computed, will be added to the customer's monthly bill.

2. All lighting units, poles and conductors installed in accordance herewith shall be the property of Cooperative, and Cooperative shall have access to the same for maintenance, inspection and all other proper purposes. Cooperative shall have the right to make other attachments to the poles and to further extend the conductors installed in accordance herewith when necessary for the further expansion of its electric service.

3. This schedule covers service from overhead circuits only, with installation on wood poles; provided, however, that when feasible, flood lights served hereunder may be attached to existing metal street lighting standards supplied from overhead or underground circuits. If any permit is required from municipal or other governmental authority with respect to the installation and use of any of the lighting units served hereunder, it will be the responsibility of the customer to obtain such permit.
