Residential, Farm and Non-Farm, Schools & Churches		
<p>4. Three-phase service will not be made available under Rate Schedule 1. Consumers requiring three-phase service shall be billed on the Cooperative's applicable power rate subject to the rules and regulations covering such service.</p> <p style="text-align: center;"><u>Addendum - Underground Service</u></p> <p>The Cooperative will install underground distribution lines to a residential subdivision under the following conditions:</p> <ol style="list-style-type: none"> 1. The subdivision being developed must consist of a tract of land which is divided into ten (10) or more lots for the construction of new residential buildings or the land on which is constructed two (2) or more new multiple occupancy buildings (refer to PSC Electric Rules, Appendix A for definition of terms). 2. Developer or owner of subdivision (shall) or (may be required) to advance to the Cooperative an amount equal to an "estimated average cost differential" if any, between the average or representative cost of underground distribution systems in residential subdivisions and of equivalent overhead distribution systems within the utility service areas. If the amount deposited exceeds the normal charge for underground extensions, the amount in excess shall be refunded over a period of ten (10) years. The amount of refund per service connected shall be the amount contributed in excess of the normal underground cost differential, divided by the total lots to be served from the primary extension. 3. The Cooperative will construct underground distribution of single phase ^{three phase} in the subdivision adequate to render single phase 120/240 volt service. 4. Three-phase primary mains or feeders required within a subdivision to supply local distribution or to serve individual three-phase loads may be overhead unless underground is required by governmental authorities.

Residential, Farm and Non-Farm, Schools & Churches	<p>or chosen by applicant, in either of which case the differential cost of underground shall be borne by the applicant.</p> <p>5. Developer or successor in title shall grant a right-of-way satisfactory to the Cooperative for the installation, operation and maintenance of its underground facilities.</p> <p>6. If developer provides the secondary service lines to the residence from service pedestal located on easement, the Cooperative shall credit the applicant fifty dollars (\$50.00) or the equivalent cost of an overhead service line to the applicant's meter base, whichever is greater. Service lines to house (provided by developer) shall be installed and ready for inspection at the same time as the residence. Trench is to be left open until inspection has been made. If the Cooperative provides secondary service lines, applicant shall pay the "estimated average cost differential" between overhead and underground service.</p> <p>7. For all developments that do not meet the conditions set forth in paragraph 1 above, underground distribution will be installed provided an advance to the Cooperative is made in an amount equal to the difference between the Cooperative's estimated cost of underground facilities and overhead facilities, which it would otherwise provide.</p> <p>8. The applicant may perform all necessary trenching and backfilling in accordance with the Cooperative's specifications.</p> <p>9. The estimated cost differential per foot of conductor for overhead soil conditions and does not include rock, estimated rock shown on Exhibit A.</p> <p>10. The estimated cost differential per foot of conductor is filed herewith as Exhibit "A".</p>

Schedule 1 - continued	CLASSIFICATION OF SERVICE	RATE PER UNIT
Residential, Farm and Non-Farm, Schools & Churches		
EXHIBIT A		
<u>AVERAGE UNDERGROUND COST DIFFERENTIAL</u>		
(Filed in compliance with Appendix to the Order of the Public Service Commission in Administrative Case No. 146, dated February 2, 1973.)		
Average cost per foot of underground primary		\$4.40
Average cost per foot of overhead primary		<u>3.15</u>
Average cost differential per foot of primary conductor		<u>\$1.25</u>
Average cost per foot of underground residential service		\$1.40
Average cost per foot of overhead residential service		<u>0.85</u>
Average cost differential per foot of service conductor		<u>\$0.55</u>
Note: Above estimated cost for underground does not include the cost of trenching and backfilling. If the Cooperative performs the trenching and backfilling, the actual cost will be added to the above price.		
Note: The estimated cost for rock removal for underground installation <u>\$9.50 per foot.</u>
