SCHEDULE LP

LARGE POWER SERVICE

Availability

Available to consumers located on or near Seller's three-phase lines for all types of usage, subject to the established rules and regulations of Seller.

Rate

\$1.25 per month per KW of billing demand;
Plus energy charges of -
2.0¢ per KWH for the first 50 KWH used per month
per Kw of billing demand
1.5¢ per KWH for the next 100 KWH used per month
per KW of billing demand
1.0¢ per KW for all remaining KWH used per month

Determination of Billing Demand

The billing demand shall be the maximum kilowatt demand established by the consumer for any period fifteen consecutive minutes during the month of which the bill is rendered, as indicated or recorded by a demand meter and adjusted for power factor as follows:

Power Factor Adjustment

The consumer agrees to maintain unity power factor as nearly as practicable. Demand charges will be adjusted for consumers with 50 KW or more of measured demand to correct for average power factors lower than 90%, and may be so adjusted for other consumers if and when the Seller deems necessary. Such adjustments will be made by increasing the measure demand 1% for each 1% by which the average power factor is less than 90% lagging.

Fuel Cost Adjustment Charge

In case the rate under which Seller purchases power at Wholesale is adjusted in accordance with a fuel cost adjustment provision in Seller's wholesale power contract, the foregoing energy charges shall be adjusted each month by the same amount per KWH as the fuel cost adjustment per KWH in Seller's wholesale power bill for the next preceeding month.

Minimum Monthly Charge

The minimum monthly charge shall be the highest one of the following charges as determined for the consumer in question.

- (1) The minimum monthly charge specified in the contract for service.

Date of Issue May 1, 1957

Date Effective May 1, 1957 ~~Feb. 28, 1939~~

SCHEDULE LP (continued)

Minimum Monthly Charge (continued)

- (2) A charge of \$0.75 per KVA of installed transformer capacity.
- (3) A charge of \$25.00

Minimum Annual Charge for Seasonal Service

Consumers requiring service only during certain seasons not exceeding nine months per year may guarantee a minimum annual payment of twelve times the minimum monthly charge determined in accordance with the foregoing section in which case there shall be no minimum monthly charge.

Type of Service

Three-phase, 60 cycles, at Seller's standard voltage.

Condition of Service

1. Motors having a rated capacity in excess of ten horsepower (10 H.P.) must be three-phase. Motors in excess of five Horsepower (5 H.P.) shall be provided with compensating starting equipment acceptable to the Seller.

2. Both power and lighting shall be billed at the foregoing rate. If a separate meter is required for the lighting circuit, the registrations of the two watt-hour meters shall be added to obtain total kilowatt-hours used and the registrations of the two demand meters shall be added to obtain the total kilowatt demand for billing purposes.

(3) All wiring, pole lines, and other electrical equipment beyond the metering point, shall be considered the distribution system of the consumer and shall be furnished and maintained by the consumer.

4. If service is furnished by primary distribution voltage, a discount of ten percent (10%) shall apply to the demand and energy charges, and if the minimum charge is based on transformer capacity, a discount of ten percent (10%) shall also apply to the minimum charge. However, the Seller shall have the option of metering at secondary voltage and adding the estimated transformer losses to the metered kilowatt-hours and kilowatt demand.
