TOUCHSTONE ENERGY HOME PROGRAM

Sch TEHP

Purpose

In an effort to improve new residential home energy performance, Salt River Electric has designed the Touchstone Energy Home Program. This program provides guidance during the building process to guarantee a home that is >15-20% more efficient than the Kentucky standard built home. The standard built new home in rural Kentucky typically receives a 100 on the Home Energy Rating System ("HERS") Index. A HERS Index Score of 100 means the home is built to only moderate levels of efficiency- generally the 2004 International Energy Conservation Code ("IECC"). (T)

Availability

This program is available to residential members served by Salt River Electric Cooperative Corporation.

Eligibility

To qualify as a Touchstone Energy Home under Salt River Electric's program, the participating single-family home must be located in the service territory of Salt River Electric and must meet the program guidelines following one of the three available paths of approval. Multi-family dwellings pre-approved by East Kentucky Power Cooperative, Inc. may be eligible. (N)

Prescriptive Path:

- Home must meet each efficiency value as prescribed by Salt River Electric.
- Home must receive pre-drywall inspection and complete Salt River Electric's pre-drywall checklist (contact the Energy Advisor at Salt River Electric for a copy of the checklist)
- Home must receive a final inspection, pass a whole house air leakage test (<7 air changes per hour @50 pascals), and a KENTUCKY leakage test (<10% of the fan's rated capacity).
