RENEWABLE ENERGY PROGRAM – RATE 24

STANDARD RIDER

This “Renewable Energy Program” is a rider to all current rate schedules. The purpose of this program is to provide retail members with a source of renewable energy or renewable energy attributes called Renewable Energy Certificates (“REC”). There are two options. Shelby Energy Cooperative, via its participation in East Kentucky Power Cooperative’s (EKPC) Renewable Energy Program (Envirowatts), will aggregate the contributions provided by the retail members to develop renewable energy, purchase renewable energy, or purchase Renewable Energy Certificates. Alternatively, the retail member, Shelby Energy Cooperative, and EKPC will enter into a special agreement to purchase renewable energy to offset the retail member’s existing energy consumption.

Under Option B, a retail member must execute an agreement with Shelby Energy Cooperative and EKPC to purchase, supply or secure a minimum renewable capacity of 1 MW. The maximum annual renewable energy under the agreement cannot exceed the participating retail member’s average annual consumption over the previous three (3) years. For new businesses with no usage history, the maximum annual renewable energy under the contract will be estimated. The type of renewable energy will be determined by the retail member. The retail member’s bill will be credited for the base fuel, the fuel adjustment clause, capacity credits when applicable, and the variable portion of the Environmental Surcharge that EKPC credited to Shelby Energy Cooperative per individual renewable energy agreements. The credit amount is based on the total of the avoided costs from base fuel, fuel adjustment clause, capacity credits when applicable, and variable environmental surcharge for the delivered renewable energy pursuant to the agreement. The total credit will be limited to the lesser of this credit amount of the PJM Localized Marginal Cost.
