RULES AND REGULATIONS

1. SCOPE

This Schedule of Rules and Regulations is a part of all contracts for receiving electric service from the Taylor County Rural Electric Cooperative Corporation and applies to all service received from the Cooperative whether the service received is based upon a contract agreement signed application, or otherwise. No employee or individual director of the Cooperative is permitted to make an exception to rates or Rules and Regulations. Rates and rulse of service may be obtained from the Cooperative's office.

2. REVISIONS

These Rules and Regulations may be revised, amended, supplemented or otherwise changed from time to time without notice. Such changes, when effective, shall have the same force and effect as the present Rules and Regulations. The members shall be informed of any changes as soon as possible, after adoption by the Board of Directors, through the Cooperative's monthly newsletter.

3. APPLICATION FOR SERVICE

Each prospective consumer desiring electric service shall be required to sign Cooperative's standard form of application for membership and any supplemental contract required by the Cooperative before service is supplied. The membership fee shall be \$5.00. Should member decline to take service after the line is staked, the membership fee may be applied against the cost of staking the line. After service is made available to applicant, the membership fee is not refundable.

4. RIGHT OF ACCESS

The Cooperative's employees shall have access to member's premises at all reasonable times for the purpose of reading meter, testing, repairing, removing, or exchanging any and all equipment belonging to the Cooperative.

**RULES AND REGULATIONS**

**5. RIGHT-OF-WAY EASEMENTS**

1. Members, before receiving service, shall execute right-of-way easements to the Cooperative giving permission not only to construct distribution lines, but also to extend lines to others desiring service. Cooperative shall cooperate with the member in locating the line where it will be least interference to the owner, taking into consideration economies of construction through staking.

2. The Rural Electrification Administration allocates no funds for the purchase of right-of-way and no right-of-way shall be purchased since this would only tend to increase rates to the members. In event purchase of right-of-way is required from a person not receiving service, the Cooperative will not extend service to said member until he has refunded the amount paid for right-of-way easement.

3. Right-of-way easement form shall be executed by all property owners whose land is crossed by any extension. It shall be the duty of the applicant for service to obtain said signatures.

**6. POINT OF DELIVERY**

The point of delivery is the point designated by the Cooperative on member's premises where current is to be metered. All wiring and equipment beyond this point of delivery shall be supplied and maintained by the member. The member shall, however, notify the Cooperative of any proposed changes in his equipment or wiring which would materially increase or decrease his load so the Cooperative may check its equipment for adequacy to accommodate the consumer's requirement.

RULES AND REGULATIONS

7. CONTINUITY OF SERVICE

The Cooperative shall use reasonable diligence to provide a constant and uninterrupted supply of electric power and energy. However, if such supply should fail or be interrupted or become defective through act of God, or public enemy, or by accidents, strikes, labor troubles, or by action of the elements, or inability to secure rights-of-way or other permits needed, or for any other cause beyond the reasonable control of the Cooperative, the Cooperative shall not be liable therefor.

8. NOMINAL SERVICE VOLTAGE

The nominal service voltage shall be 120/240 volts with the following limits on voltage spread:

Substation Output:

- 120 volts to 124 volts during light load
- 124 volts to 127 volts during full load

Distribution Line:

- 116 volts minimum to 127 volts maximum
- (This includes 8 volts maximum drop from substation to end of line.)

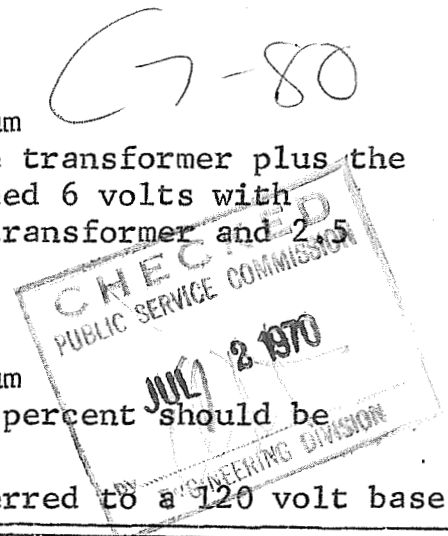

Consumer's Meter Socket:

- 110 volts minimum to 127 volts maximum
- (The maximum voltage drop through the transformer plus the secondary and service should not exceed 6 volts with approximately 3.5 volts through the transformer and 2.5 volts along the service.)

Consumer's Wiring:

- 107 volts minimum to 127 volts maximum
- (Three volts drop or approximately 3 percent should be a maximum in the consumer's wiring.)

All of the above voltage limits are referred to a 120 volt base.

RULES AND REGULATIONS

9. CONSUMER'S RESPONSIBILITY FOR COOPERATIVE'S PROPERTY

All meters, service connections, and other equipment furnished by Cooperative shall be, and remain, the property of Cooperative. Customer shall provide a space for, and exercise proper care to protect the property of Cooperative on its premises; and in the event of loss or damage to Cooperative's property, arising from neglect of consumer to care for same, the cost of the necessary repairs or replacements shall be paid by consumer.

10. RELOCATION OF LINES BY REQUEST OF MEMBERS

The Cooperative's established lines shall not be relocated unless the expense for moving and relocating is paid by the member, except in instances where it would be to the advantage of the Cooperative to make such relocation.

11. CONSUMER'S WIRING

All wiring of the member must conform to Cooperative's requirements and accepted modern standards. The member agrees to wire his premises in accordance with specifications at least equal to those prescribed in the National Electrical Code. The Cooperative, however, assumes no responsibility in respect to the type, standard of construction, protective equipment or the condition of the member's property, and will not be liable for any loss or injury to persons or property occurring on the premises or property of the member.

The member agrees to operate and maintain its facilities so as not to interfere with the service of the Cooperative to its other members. The member will have complete responsibility for all construction, operation, and maintenance beyond the meter and will save the Cooperative harmless against liability for injury or damages resulting in any manner from construction, location, operation, or maintenance of the member's facilities.

RULES AND REGULATIONS

12. INSPECTION

All consumer's wiring must be inspected and approved before permanent connection for electric service is made by the Cooperative except where temporary service is desired during the construction of any permanent building. Fee for such inspection is payable at the Cooperative office.

13. TEMPORARY SERVICE

1. Consumers requiring electric service on a temporary basis shall be required by Cooperative to pay all the costs for connection and disconnection incidental to the supplying and removing of service. This rule applies to circuses, carnivals, temporary construction, tent meetings, saw mills, oil wells, coal mines, trailers and the like.

2. A deposit may be required to cover estimated use of electricity. Both fees are to be paid in advance. At the termination of service any balance remaining of the deposit for use of electricity will be refunded.

3. Service billing for less than 30 days shall be billed on the appropriate rate schedule and shall not be prorated.

4. The monthly minimum bill shall not be less than \$3.00.

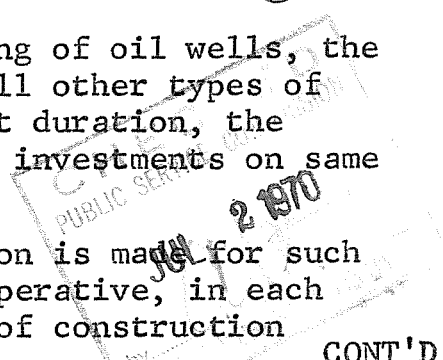

14. SERVICE TO CONSUMERS WHICH MAY BE OF SHORT DURATION *G-80*

In cases of service to power the pumping of oil wells, the operation of oil fields, and any and all other types of consumer services which may be of short duration, the Cooperative must and shall protect its investments on same in the following manner:

The consumer, at the time of application is made for such service shall pay a deposit to the Cooperative, in each instance, an amount equal to the cost of construction

and retirement, covering both material and labor involved, less salvage value on all material returned into stock. This deposit may be refunded at the rate of ten per cent (10%) of the consumer's yearly power bills thereafter, until such deposit is returned.

No refund shall be made to the Consumer of any portion of the deposit remaining upon termination of this agreement.

15. TERMINATION OF CONTRACTS BY CONSUMERS

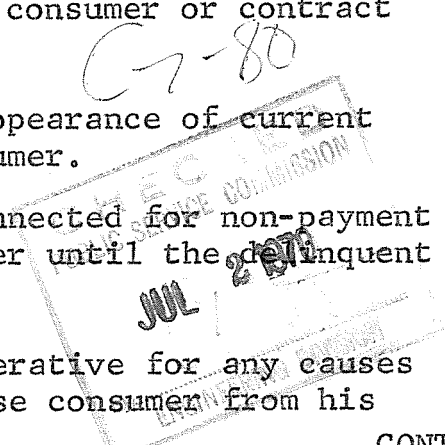

Consumers who have fulfilled their contract terms and wish to discontinue service must give at least three (3) days' written notice to that effect, unless contract specified otherwise. Notice to discontinue service prior to expiration of contract term will not relieve consumer from any minimum or guaranteed payment under any contract or rate.

16. DISCONTINUANCE OF SERVICE BY COOPERATIVE

Cooperative may refuse to connect or may discontinue service for :

- 1. The violation of any of its Rules and Regulations, or for violation of any of the provisions of the Schedule of Rates and Charges, or of the application of consumer or contract with consumer.
2. For the theft of current or the appearance of current theft devices on the premises of consumer.
3. Any member whose service is disconnected for non-payment shall not be served by any other member until the delinquent account is paid up in full.

The discontinuance of service by Cooperative for any causes as stated in this rule does not release consumer from his

19. NON-STANDARD SERVICE

Consumer shall pay the cost of any special installation necessary to meet his peculiar requirements for service at other than standard voltages, or for the supply of closer voltage regulation than required by standard practice.

20. RIDER FOR WELDING AND OTHER INTERMITTENT AND FLUCTUATING LOADS

Applies to all territories served by the Cooperative.

The Cooperative's Rules and Regulations contain the following provisions covering Power Factor and Protection of Service.

POWER FACTOR

"Where the Consumer has equipment installed that operates at low power factor the Cooperative reserves the right to require the Consumer to furnish, at his own expense, suitable corrective equipment to maintain a power factor of 80% lagging or higher, gaseous tube lighting excepted."

PROTECTION OF SERVICE

"The Cooperative, cannot render service to any consumer for the operation of any device that has a detrimental effect upon the service rendered to other Consumers.

"The Cooperative, however, will endeavor to cooperate with its Consumers when consulted concerning the intended use of any electrical device.

"Where the Consumer's use of service is intermittent or subject to violent fluctuations, the Cooperative reserves the right to require the Consumer to furnish, at his own expense, suitable equipment to reasonably limit such intermittent or fluctuation."

**RULES AND REGULATIONS**

Rider for Welding and Other Intermittent and Fluctuating Loads  
Cont'd

When compliance with the Cooperative's Rules and Regulations require the Consumer to furnish corrective equipment for the purpose of protecting service to Cooperative's other consumers by increasing the power factor of and/or reducing the intermittence or fluctuations in the Consumer's use of service (such as may be the case when the Consumer's load includes welding equipment, electric arc furnaces, etc.), the Cooperative, by the provision of special supply facilities, may be able to eliminate the necessity for Consumer furnished corrective equipment. If the estimated cost of Cooperative provided special supply facilities is less than the cost of Consumer provided corrective equipment, the Cooperative may give the Consumer special permission to operate specified abnormal load, consisting of low power factor, intermittent or widely fluctuating loads, without correction, in which case the Consumer will pay the following rate to the Company:

RATE:

1. A lease or rental charge on all special or added facilities, if any, necessary to serve such loads.
2. Plus the charges provided for under the rate schedule applicable, including energy charge, maximum load charge (if load charge rate is used) and the minimum under such rate adjusted in accordance with (a) or (b) herein.

When the name plate rating of the special equipment is given in KVA (such as welding equipment):

(a) If rate schedule calls for a minimum based on the total horse power of connected load, each KVA of such special equipment shall be counted as one horse power connected load for minimum billing purposes.

(b) If rate schedule calls for a minimum based on the 15 minute integrated load, and such loads operate only

intermittently so that the KW registered on a standard 15 minute integrated demand meter is small in comparison to the instantaneous load such equipment is capable of imposing each KVA of such special equipment shall be counted as one-third KW load for minimum billing purposes.

MINIMUM:

As determined by this Rate Schedule and the Rate Schedule to which this Rider is attached.

This schedule applies to all new loads; also to existing loads where such existing loads now or hereafter have a detrimental effect upon the electric service rendered to other consumers of the Cooperative.

21. TRAILER/MOBILE HOME SERVICE AGREEMENT (T)

- (1) All extensions of up to 150 feet from the nearest facility shall be made without charge.
- (2) Extensions greater than 150 feet from the nearest facility and up to 300 feet shall be made provided the consumer shall pay the utility a "consumer advance for construction" of fifty dollars (\$50) in addition to any other charges required by the utility for all consumers. This advance shall be refunded at the end of one (1) year if the service to the Mobile Home continues for that length of time.
- (3) For extensions greater than 300 feet and less than 1,000 feet from the nearest facility, the utility may charge an advance equal to the reasonable costs incurred by it for that portion of the service beyond 300 feet plus fifty dollars (\$50). Beyond 1,000 feet the extension policies set forth in Section 10 apply.
  - (a) This advance shall be refunded to the consumer over a four (4) year period in equal amounts for each year the service is continued.
  - (b) If the service is discontinued for a period of sixty days, or should the Mobile Home be removed and another not take its place within sixty (60) days, or be replaced by a permanent structure, the remainder of the advance shall be forfeited.

(c) No refunds shall be made to any consumer who did not make the advance originally.

22. STANDBY AND RESALE SERVICE

All purpose electric service (other than emergency or standby service) used on the premises of consumer shall be supplied exclusively by distributor, and consumer shall not, directly or indirectly, sell, sublet, assign, or otherwise dispose of the electric service or any part thereof.

23. NOTICE OF TROUBLE

Consumer shall notify Distributor immediately should the service be unsatisfactory for any reason, or should there be any defects, trouble, or accidents affecting the supply of electricity. Such notices, if verbal, should be confirmed in writing.

24. APPLICATION OF RESIDENTIAL AND POWER RATE SCHEDULES

1. Multiple Dwellings. Where premises include two or more residential or dwelling units, the residential farm and home rate may be applied only if separate circuits are provided without cost to the Distributor. A residential or dwelling unit shall be defined, for the purpose of applying this interpretation, as the space provided for the occupancy of a single family, i.e., including separate living quarters and kitchen. If it is not practical to provide for separate metering of each individual unit, the entire premises shall be served under the appropriate commercial, small power and three-phase farm rate. Where building services, such as hall lighting, elevators and water heating, are provided by a landlord who

is not a tenant in the building, a separate circuit shall be provided for such services and metered and billed under the appropriate commercial, small power and three-phase farm rate. If these services are provided from a circuit which is used for a service to a tenant in the building, they may be consolidated with his residential use and billed under the residential rate, provided that no more than two dwelling units are included in the same premises. If the number of dwelling units exceeds two, a separate circuit must be provided for building services and billed under the appropriate commercial, small power and three-phase farm rate, or the entire requirements of the tenant whose residential use is obtained from the same circuit, including the building services, must be billed under the appropriate commercial, small power and three-phase farm rate.

2. Commercial Use of Portions of Dwellings. The residential rate is not applicable to the space in a dwelling which is regularly used for commercial purposes, such as an office, beauty shop, studio, tea room, or store, or for other gainful activities. In such cases, if a separate circuit is provided at no cost to the distributor for the portion of the dwelling so used, the residential rate should be applied to the balance of the power requirements and the appropriate commercial, small power and three-phase farm rate applied to the power requirements of the portion of the dwelling used for commercial purposes. If a separate circuit is not provided, the entire power requirements of the premises must be billed under the appropriate commercial, small power and three-phase farm rate.

3. Rooming Houses. The appropriate commercial, small power and three-phase farm rate should be applied in all cases in which premises are used primarily for the rental of rooms. A dwelling shall be considered a recognized rooming house in which more than 50% of the total number of rooms in the house are available to roomers on a rental basis, or which is licensed by local government authority, or which advertises regularly, provided

that a dwelling shall not be considered a recognized rooming house unless more than three rooms are for rent.

4. Boarding Houses. All recognized boarding houses should be billed under the appropriate commercial, small power and three-phase farm rate. An establishment shall be considered a recognized boarding house which is licensed by municipal or other governmental ordinance or statute. An establishment which is commonly known to serve or to hold itself in readiness to serve regular boarders or the transient trade or which advertises such service, shall be considered a recognized boarding house. The above definitions are subject to the limitation that an establishment with facilities only sufficient to serve three or less paying guests shall not be considered a recognized boarding house.

5. Tourist Homes and Camps. All tourist camps shall be considered nonresidential customers and billed under the appropriate commercial, small power and three-phase farm rate. All wiring on the consumer's side of the point of delivery shall be provided by the consumer. All dwellings primarily used for the purpose of renting rooms to tourists shall be considered nonresidential customers and billed under the appropriate commercial, small power and three-phase farm rate. All dwellings licensed as tourist homes by local governmental authority or regularly advertising the availability of rooms for tourists shall be billed under the appropriate commercial, small power and three-phase farm rate, provided that dwellings with less than four rooms, for rent, which are not licensed as tourist homes, shall be billed under the residential rate.

FARM SERVICE

1. Domestic Farm Use. A farm on which is located a single dwelling and its appurtenances, including barns, domestic servants' quarters, and out buildings, and which processes

Taylor County R.E.C.C.

RULES AND REGULATIONS

31. METER TESTS

All meters shall be checked for accuracy before installation. The Cooperative shall, at its own expense, make periodic tests and inspections of its meters in order to maintain a high standard of accuracy and to conform with the regulations of the Public Service Commission.

The Cooperative shall make additional tests of meters at the request of the member upon advance payment of a fee of two dollars. When the test, made at the member's request, shows the meter to be accurate within 2% slow or fast, no billing adjustment shall be made and the fee paid shall be forfeited to cover cost of the test.

When test shows the meter to be in excess of 2% fast or slow, an adjustment shall be made to the member's bill by recalculating the monthly bills for a period equal to one-half (1/2) of the time lapsed since the last previous test, which in no case shall exceed twelve (12) months and the cost of testing shall be borne by the Cooperative and the two dollars fee paid by the member shall be refunded.

32. MOTOR LOAD SERVICE POLICY

Single Phase Motors

1. Motors of 5 h.p. and smaller may be started across the line, provided such starting does not cause undue interference to other consumers served from the same transformer. On equipment containing two or more motors exceeding 5 h.p. in total, the controls should be so connected or operated that motors will not be started simultaneously.

2. Motors in excess of 5 h.p. normally should have current limiting devices, such as: resistance starters, capacitor start--capacitor run characteristics or equivalent.

RULES AND REGULATIONS

Motor Load Service Policy

Cont'd

3. Any motor whose starting characteristics are such as to limit the starting current to 300% of full load current will be acceptable, regardless of type of starting device used, for single phase motors of 10 h.p. rating and smaller.

4. Normally, single phase motors larger than 10 h.p. will be considered as a special application and will be served only when the user meets the requirements set forth by the distributor for this application.

Three Phase Motors

1. 15 H.P. and smaller motors operated singly can be started across the line. On equipment containing two or more motors exceeding 15 h.p. in total, the controls should be so connected or operated that motors will not be started simultaneously.

2. Motors larger than 15 h.p., up to and including 75 h.p., must be equipped with starting devices so as to limit the starting current to 300% of full load current.

3. Motors in excess of 75 h.p. must be equipped with starting devices so as to limit the starting current to 250% of full load current.

4. Motors in excess of 150 h.p. shall be considered a special application and will be served only when the user meets the requirement set forth by the distributor for this application.

Any exceptions to the above-stated policy must have prior approval of the distributor in writing.

RULES AND REGULATIONS

33. CAPITAL CREDITS RETIREMENT

1. Refunds due members who have moved out of the Cooperative's service area will be mailed to the member at the last known address.

2. All Capital Credits due deceased members will be paid by full calendar years to deceased member's estate, upon notice of death of said member and proof of death submitted, from date of 1944, the first date of assignment of Capital Credits or the date he became a member if after 1944.

3. In the event an account had continued to be served in a decedent's name after his death, only the Capital Credits accumulated up to the time of the member's death would be refundable to his estate. Amounts accumulated after the member's death, would be credited to the account of the party who had been using and paying the account of the decedent, after said party becomes a member in his own right.

4. When a member moves off the line owing the Cooperative a bill, his Capital Credits will be applied on the bill. This will be done as Credits are being retired to all members and not prior to regular retirement. Should the amount of Capital Credit exceed the bill, the difference will be mailed to the member at his last address.

5. If a member moves off the line and cannot be located, his Capital Credits will be held in a suspense account for a period of five years.

RULES AND REGULATIONS

34. THREE PHASE POWER CONTRACTS AND OTHER SPECIAL APPLICATIONS

Terms and conditions for serving large power consumers and/or consumers of a temporary nature shall be determined individually. A contribution of investment charge may be required based upon the cost of construction. In general this charge should include the cost of labor for construction and retiring the line plus 20% of the cost of material due to loss through retirement, but should exclude transformers and metering equipment.

Included under this policy are such loads as rock crushers, oil wells, feed mills, and service for other special applications.

If contribution or investment charge is made under this policy, the minimum based on length of the extension shall not apply.

The monthly minimum bill applicable under this policy shall be not less than \$.75 per KW of contract demand.

An estimated 12 months advance payment of electric service may be required if it is adjudged that service might be discontinued by the owner in less than 12 months.

A Large Power Contract shall be executed for all three phase power loads.

35. UNDERGROUND SERVICE

Consumers desiring underground service lines from Cooperative's overhead system must bear the excess cost incident thereto. Specifications and terms for such construction will be furnished by Cooperative on request.

**RULES AND REGULATIONS**

35-B. UNDERGROUND RESIDENTIAL DISTRIBUTION

Applicability

This policy shall apply to all residential underground distribution facilities after the effective date of this policy.

Definitions

Refer to PSC Electric Rules Appendix A for definitions of terms.

Residential Underground Service Lines

Individual underground secondary service lines from the property line or nearest pole to the house are to be installed, owned and maintained by the Customer. The Cooperative and the Customer will make the decision for the meter location. Service lines to house shall be installed and ready for inspection at the same time as the residence.

Installation of Underground Distribution System Within New Residential Subdivisions.

1. Where appropriate contractual arrangements have been made, the Co-op shall install within the subdivision an underground electric distribution system of sufficient capacity and suitable materials which, in its judgement, will assure that the property owners will receive safe and adequate electric service for the foreseeable future.

2. Facilities required to be underground:

(a.) All single phase conductors installed by the utility shall be underground. Appurtenances such as transformers, pedestal-mounted terminals, switching equipment and meter cabinets may be placed above ground.

(b.) Three (3) phase primary mains or ~~feeders~~ required within a subdivision to supply local distribution or to serve individual three-phase loads may be overhead unless otherwise required. If so, additional cost will be added in addition to single phase.

**RULES AND REGULATIONS**

Rights of Way and Easements

1. The Co-op will construct, own, operate and maintain underground distribution lines along public streets, roads and highways which the Co-Op has the legal right to occupy, and on public lands, and private property on the utility strip drawn on plot and recorded with rights of way and easements satisfactory to the Co-op may be obtained without cost or condemnation by the Co-op.
2. Rights of way and easements suitable to the Co-op must be furnished by the applicant in reasonable time to meet service requirements and at no cost, must be cleared of trees, tree stumps and other obstructions at no charge to the Co-op, and must be graded to within six (6) inches of final grade by the applicant before the Co-op will commence construction.

Schedule of Charges

1. The applicant may be required to deposit the entire cost of the extension. If this is done, equivalent cost of an above ground distribution system shall be refunded to the applicant over a ten (10) year period as set forth in Public Service Commission Rule Elec-1-X-3.
2. Developer or Customer may elect to perform ditching and/or backfilling operations to Cooperative's specifications to accommodate Cooperative's underground facilities: and, in such event, the amount payable under paragraph 1 shall be subject to a credit to be mutually agreed upon in writing prior to the commencement of any work by any party, the amount of such credit in no event to be more than Cooperative's own cost of performing such work.
3. The underground service lateral to the building from the pedestal on the corner of the lot will be installed, owned and maintained by the developer or owner. The Cooperative and the developer or owner will make a decision to locate the meter either at the pedestal or on the house. The Cooperative will specify the size of conductors, and inspect the installation as to specifications. Service lines to the house shall be installed and ready for inspection at the same time as the residence. The Cooperative will make all connections from the owners service lines to the Cooperative's lines. If any trouble should arise with the service, The Cooperative will assist the owner or their contractor in repairing or making temporary service available while being repaired.

**RULES AND REGULATIONS**

4. Cost of overhead service lines will not be included in the "Estimated Average Cost Differential" between overhead and underground service facilities.

5. The payment to be made by the applicant shall be determined from the total footage of single phase primary and secondary feeders to be installed at an average cost differential of \$ 1.40 per foot. The average cost differential per foot, as stated, is representative of construction in soil free of rock. Where rock is anticipated or encountered in construction, the dollar cost per foot shall be increased by actual cost of trenching and backfill less the normal cost of trenching and backfill.

Construction

1. All electrical facilities shall be installed to meet applicable state and federal codes.

2. Depths. Supply cables and service laterals shall be installed at a minimum depth below the surface under which they are located as follows:

- (a). All areas below 750 volts: 24 inches for supply cables that operate at a potential of 750 volts or less.
- (b). Above 750 volts: 36 inches for supply cables that operate at potentially above 750 volts.
