RULES AND ADMINISTRATIVE REGULATIONS

PURCHASED GAS COST ADJUSTMENT CLAUSE

Determination of GCR

The Company shall file a quarterly report with the PSC which shall contain an updated Gas Cost Recovery Rate (GCR) and shall be filed at least thirty (30) days prior to the beginning of each calendar quarter. The GCR shall become effective for billing for service rendered on or after the first day of each calendar quarter.

The Gas Cost Recovery Rate is composed of:

1. The expected gas cost component (EGC) on a dollar-per-Mcf basis, which represents the average expected cost of purchased gas.
2. The Actual Cost Adjustment (ACA), on a dollar-per-Mcf basis compensates for over or under-collection of gas cost resulting from differences between expected gas cost and the actual cost of gas. For purposes of determining the GCR, the ACA for the application period shall equal the sum of the ACA for the reporting period and for the three (3) preceding calendar quarters. This may also be used to compensate for any over or under recoveries remaining from previous actual and/or refund adjustments after a twelve month period.
3. The supplier refund adjustment (RA) on a dollar-per-Mcf basis, which reflects the refunds received from suppliers during the reporting period plus interest at a rate equal to 1/2 of one per cent below the average ninety-day commercial paper rate for the twelve month period. In the event of any large or unusual refunds, the Company may apply to the Public Service Commission for the right to depart from the refund procedure herein set forth.

Billing

The gas cost recovery rate to be applied to bills of customers shall equal the sum of the following components:

$$GCR = EGC + RA + ACA$$

Definitions

For the purpose of the tariff:

- a. "Average Expected Cost" is the cost of purchased gas which results from the application of supplier rates currently in effect, or reasonably expected to be in effect during the calendar quarter, on purchased volumes for the most recently available twelve-month period, divided by the corresponding sales volume. In the event that line loss exceeds 5%, purchased volumes for the twelve-month period shall be calculated as: sales volumes - 0.95. Where the calculations require the use of volumes used during a given period, and those volumes did not exist for a particular source for the entire period, or the Company expects the volumes to change substantially, the Company may make appropriate adjustments to its calculations. Any adjustments of this type shall be described in the quarterly Gas Cost Recovery Report.
- b. "GCR" means the quarterly updated gas cost recovery rate and is the sum of the expected gas cost component plus the supplier refund adjustment plus the actual cost adjustment; i.e.,  $GCR = EGC + RA + ACA$ .
- c. "Calendar quarters" means each of the four three-month periods of (1) January, February, and March; (2) April, May, and June; (3) July, August, and September; (4) October, November, and December.
- d. "Reporting Period" means the three-month accounting period that ended approximately sixty (60) days prior to the filing date of the updated gas cost recovery rates, i.e., the calendar quarters ended March 31, June 30, September 30, and December 31 of each year.
