STANDARD RIDER

Summer Air Conditioning Service Under Gas Rate G-1

Applicable:

To General Gas Rate G-1.

Availability:

Available to any customer who takes gas service under Rate G-1 and who has installed and in regular operation a gas burning summer air conditioning system with a cooling capacity of three tons or more. The special rate set forth herein shall be applicable during the five monthly billing periods of each year beginning with the period covered by the regular June meter reading and ending with the period covered by the regular October meter reading.

Rate:

For "Summer Air Conditioning Consumption" determined in the manner herein-after prescribed, the rate shall be 4.0 cents net per 100 cubic feet, subject to the "Purchased Gas Adjustment Clause" and to the "Prompt Payment Provision" incorporated in Rate G-1. All monthly consumption other than "Summer Air Conditioning Consumption" shall be billed at the regular charges set forth in Rate G-1, beginning with the initial block of such schedule.

Minimum Bill:

Application of this rider shall not alter the regular Minimum Bill provision of Rate G-1.

Determination of Summer Air Conditioning Consumption:

The Summer Air Conditioning Consumption shall be determined as follows:

Residential Service:

For each of the aforesaid five billing periods all gas consumption in excess of 5,000 cubic feet per single family dwelling unit shall be taken as the Summer Air Conditioning Consumption.

Commercial and Industrial Service:

(1) Where the only gas usage during the aforesaid five billing periods is considered to be for summer air conditioning purposes (this being the case when gas is used only for summer air conditioning or only for space heating and summer air conditioning), the consumption recorded on the regular Rate G-1 meter during such five periods shall all be taken as the Summer Air Conditioning Consumption.

(2) Where gas is used during the aforesaid five billing periods for purposes other than space heating and summer air conditioning and where summer air conditioning usage during such periods can be isolated from such other gas usage in such a way as to permit separate metering of

summer air conditioning usage, the Summer Air Conditioning Consumption will be determined by separate metering. During the seven remaining billing periods the readings of such separate meter will be combined with those of the regular Rate G-1 meter for billing at the regular charges set forth in Rate G-1.

(3) Where it is not possible to determine the Summer Air Conditioning Consumption by metering as provided in (1) or (2) above, the Summer Air Conditioning Consumption during each of the aforesaid billing periods shall be taken as 4,500 cubic feet for each ton of installed cooling capacity, but not more than the total consumption recorded by the meter during such billing period. For this purpose the capacity of air conditioning equipment will be determined by American Refrigeration Institute ratings.

Other Terms and Conditions:

This rate shall not be available for summer air conditioning equipment used occasionally or sporadically, it being contemplated that equipment served hereunder will operate for not less than 800 hours in a normal summer.

Prompt Payment Provision:

The monthly bill will be rendered at the above net charges (including net minimum bills when applicable) plus an amount equivalent to 1% thereof, which amount will be deducted provided bill is paid within ten days from date.

R

Maximum Daily Contract Delivery:

The customer shall contract under this rate schedule for a specified quantity of gas stated in terms of maximum required deliveries per day. On no day will the Company be obligated to supply gas in excess of such contract quantity.

Curtailment Provision:

In the event of an actual or threatened shortage of natural gas, due to any cause whatsoever, during the period of service availability hereunder, or in the event that unusually cold weather experienced at any time during such period imposes such load on Company's distribution facilities as to impair or threaten to impair Company's service to customers served under other rate schedules, Company shall have the right to discontinue wholly or in part the supply of gas hereunder for such period or periods, as in the judgment of the Company, may be necessary to enable it to supply the full gas requirements of its customers served under all other rate schedules.

Term of Contract:

12-3-68

Minimum contract term for service under this schedule shall be for the period from March 15 (or date of initial deliveries hereunder, if after March 15) to December 15. However, in those cases in which customer must make a substantial investment in gas utilization equipment, Company will execute contracts for a longer term of not to exceed five years. In the event that an extension or enlargement of Company's gas distribution facilities is necessary to supply service to any Customer hereunder, Company may condition such extension or enlargement upon Customer's execution of a five-year contract providing for a minimum annual revenue guarantee sufficient to warrant making the extension.

Customer's Right of Contract Termination:

The provisions of this rate schedule and all contracts for gas service hereunder are at all times subject to such changes in rates or service conditions as may be ordered or authorized by the Public Service Commission of Ky. Any customer who is adversely affected by any changes in this rate schedule which may be made during the term of his contract shall have the right for such cause to terminate his contract prior to its scheduled expiration date.

G-8

Dual-Fuel Off-Peak Gas Space Heating Rate (Continued)

2. Customer must provide alternate fuel storage facilities of a capacity acceptable to Company and must arrange to have available at the beginning of the heating season and at all times during the heating season a sufficient supply of such alternate fuel to satisfy the entire fuel requirements of the space heating installation served under this rate schedule during periods when natural gas is not available hereunder.

3. Interruptible gas service supplied hereunder shall be completely segregated and metered separately from Customer's usage of gas for other purposes under a different rate schedule at the same premise. In the event natural gas is used for pilot light service for both gas and alternate fuels in a dual-burner heating installation, such pilot light usage shall be separately metered at Company's applicable firm gas rate schedule.

4. Company's supply of gas service hereunder shall be limited to those periods (ordinarily when the mean daily temperature is 20 degrees Fahrenheit or higher) when Company, in its sole judgment, is in position to provide such service from its total available natural gas supply without undue depletion of underground storage, and without impairment or curtailment of service to any customer served under any of its other rate schedules except Seasonal Off-Peak Gas Rate G-6. Customer shall discontinue the use of natural gas for all equipment served hereunder immediately upon notification by Company to do so, and shall resume the use of gas only when notified by Company that gas service hereunder is again available.

5. In the event of Customer's non-compliance with any of these special conditions, Company shall have the right to immediately and permanently discontinue the supply of gas under this rate schedule.

Term of Contract:

Minimum contract term for service under this schedule shall be for a period of one year. However, in those cases in which Customer must make a substantial investment in dual-fuel utilization equipment or alternate fuel storage facilities, Company will execute contracts for a longer term of not to exceed five years.

STANDARD RATE SCHEDULE

G-8

Dual-Fuel Off-Peak Gas Space Heating Rate (Continued)

Reserved Right to Limitation of Additional Contracts:

This gas rate schedule is predicated on the availability to Company of a sufficient natural gas supply to enable service thereunder to be made available during a major portion of each heating season without impairment of service to other customers or jeopardizing deliverability from Company's underground storage. Company therefore reserves the right to decline acceptance of any additional contracts for service hereunder at such time as, in the Company's judgment, the volume of service already contracted for equals the gas supply available for this class of service.

Applicability of Rules:

Service under this rate schedule is subject to Company's rules and regulations governing the supply of gas service as incorporated in this Tariff.

STANDARD RATE SCHEDULE

Gas Rate Adjustment on Account of Changes in Cost of Purchased Gas

Applicable to: Gas rate schedules G-1, G-2, G-6, and G-8.

Purchased Gas Adjustment:

To each bill rendered under the above-named rate schedules (except minimum bills under Rates G-6 and G-8) there shall be added an amount, computed at the following rate:

.210 (210/1000 of one cent) per 100 cubic feet of gas used during the period covered by bill.

The above adjustment is applied to the Company's bills for gas service pursuant to an order of the Public Service Commission of Kentucky dated in Case No. 3300-0. This adjustment, beginning with bills based on October, 1967, meter readings, is to continue to be applied until certain amounts refundable to Company's customers by reason of supplier refunds have been offset. In accordance with the same PSC order, when such refundable amounts have been offset, a purchased gas adjustment of .246¢ per hundred cubic feet will be applied to bills.

Conformed Excerpt from the Public Service Commission's Order Dated November 26, 1957, in Case No. 3300

RECEIVED PUBLIC SERVICE COMMISSION OCT 7 1967 by [Signature] ENGINEERING DIVISION

The rates authorized herein (Case No. 3300—November 26, 1957) are based upon the wholesale cost of gas to the Applicant (Louisville Gas and Electric Company) as computed upon rates of its wholesale suppliers then currently in effect under Federal Power Commission tariffs for interstate business or under wholesale tariffs of this Commission. For the purpose of this purchased gas adjustment clause, these rates shall be considered as the base rate for purchased gas. In the event there is any change in this base rate, either increase or decrease, the Applicant (Louisville Gas and Electric Company) shall within thirty days from the time it receives notice of the proposed change file with this Commission the following information:

- (1) A copy of the Federal Power Commission tariff effecting the change in the base rates and a statement relative to the effective date of such proposed change.
(2) A statement setting out the details of gas purchased under the provisions of the base rate for the previous twelve months showing billing under the base rate and under the proposed revised rate applicable to this service.
(3) A balance sheet as of the end of the twelve months period and a statement of operating expenses and revenues in the same detail as reported to this Commission in the Utility's Annual Report.
(4) A forecast showing the estimated gas purchases from all of the Utility's contract suppliers for the next twelve months period together with an estimate of the cost thereof.
(5) Such other information as this Commission may request for a proper determination of the purchased gas adjustment.

Upon receipt of this information this Commission will review the effect of the revised base rate on the operations of the Applicant (Louisville Gas and Electric Company) and will prior to the effective date of the revised base rate, but not less than thirty days from date of the filing of the above prescribed information, issue its Order setting out the purchased gas adjustment that the utility shall apply to its rates and/or such refunds as may be proper.

The maximum amount of the adjustment so prescribed shall not produce revenue adjustments based upon the actual preceding twelve months period, greater than the difference between the purchased gas billed at the then existing rate and the purchased gas billed at the revised rate.

LOUISVILLE GAS AND ELECTRIC COMPANY

2nd Rev. SHEET NO. 14
CANCELLING 1st Rev. SHEET NO. 14

P. S. C. OF KY. GAS NO. 2

RULES AND REGULATIONS GOVERNING THE SUPPLY OF GAS SERVICE

Rules Governing Application of Gas Rate Schedules

All gas service supplied by the Company under its five standard rate schedules shall be subject to the terms and conditions hereinafter set forth.

1. Allowable Capacity of Space Heating Equipment. The total rated input capacity of gas space heating equipment eligible for service under General Gas Rate G-1 or Interruptible Commercial and Industrial Rate G-2 shall be limited to an aggregate of 4,000,000 Btu per hour for any customer at any one location.

Any customer who desires service to space heating equipment of a capacity in excess of 4,000,000 Btu per hour must contract for such service under Dual-Fuel Off-Peak Gas Space Heating Rate G-8 or under General Gas Rate G-1A (Large Volume Space Heating). If a customer elects to take service under Rate G-1A, he must take his entire requirements under such Rate Schedule, except for such requirements as he elects to take under Seasonal Off-Peak Gas Rate G-6. If a customer wishes to take his space heating requirements under Rate G-8, he may contract for his non-heating requirements under Rate G-1, G-2, or G-6, as he elects.

For purposes of rate schedule application, any equipment, such as "make-up-air" heating, which has the same general characteristics as conventional comfort heating shall be considered space heating equipment.

2. Limitations on Large Firm Loads. The Company reserves the right to impose or reimpose limitations on the volume of gas which will be supplied on a firm basis, subject to appropriate filings with the Public Service Commission of Kentucky. 12-3-67

3. Extensions of Facilities and Notice of Requirements. The connection of any new commercial and industrial gas load is contingent upon the existence of sufficient capacity in Company's distribution system at the point of service or Company's ability to extend its system in accordance with its main extension rules and policies. Such connection is also contingent upon sufficient notice being given to enable Company to contract for the quantity of gas required to serve the load.

4. Curtailment and Interruption of Service. Company's standard rate schedules G-2, G-6 and G-8 are available only for interruptible gas service. Company shall have the right to require curtailment or interruption of gas usage under such rate schedules in accordance with the terms thereof or as Company may deem necessary to avoid a shortage of supply for residential and other high priority purposes. The order of such curtailment or interruption, insofar as practicable, shall be as follows:

RULES AND REGULATIONS GOVERNING THE SUPPLY OF GAS SERVICE

Rules Governing Application of Gas Rate Schedules

All gas service supplied by the Company under its four standard rate schedules shall be subject to the terms and conditions hereinafter set forth.

1. Registration of Space Heating Loads. Before any new or additional gas space heating equipment is connected to Company's lines such equipment shall be registered with the Company and a space heating permit secured therefor as a condition precedent to the Company's obligation to supply service thereto. Application for such space heating permit may be made by the owner, builder, contractor, or other person responsible for the type of space heating installation in the premises for which service is desired, on a special form which will be provided by the Company. No permit will be required in connection with the replacement of existing gas space heating equipment with new equipment of lesser or equal Btu hourly input capacity.

2. Maximum Allowable Capacity of Space Heating Equipment. The total rated input capacity of gas space heating equipment for service under General Gas Rate G-1 or Interruptible Commercial and Industrial Rate G-2 shall be limited to an aggregate of 4,000,000 Btu per hour for any space heating customer at any one location. In the case of multi-family residential structures, each family dwelling unit equipped with its own heating system served directly by the Company through a separate gas metering installation will be considered a separate customer.

No customer whose existing gas space heating equipment already has an aggregate rated hourly input capacity of 4,000,000 Btu or more shall be eligible for any increase in such capacity under Rates G-1 and G-2. No customer whose existing gas space heating equipment has an aggregate rated input capacity of less than 4,000,000 Btu per hour shall be eligible for any increase in such capacity under Rates G-1 and G-2 in excess of the difference between the rated input capacity of his present equipment and 4,000,000 Btu per hour.

3. Limitations on Firm Gas Service for Commercial or Industrial Purposes. Company's acceptance of any new contract for the supply for commercial or industrial purposes for more than 150,000 cubic feet of gas on any one day or more than 4,000,000 cubic feet of gas in any one month may be conditioned upon the rendition of such service only under an interruptible or off-peak rate schedule, unless the nature of customer's gas usage is such that its curtailment or interruption would adversely affect the public welfare, health, or safety.

RULES AND REGULATIONS GOVERNING THE SUPPLY OF GAS SERVICE

N

Rules Governing Application of Gas Rate Schedules (Continued)

4. Curtailement and Interruption of Service. Company's standard rate schedules G-2, G-6 and G-8 are available only for interruptible gas service. Company shall have the right to require curtailment or interruption of gas usage under such rate schedules in accordance with the terms thereof or as Company may deem necessary to avoid a shortage of supply for residential and other high priority purposes. The order of such curtailment or interruption, insofar as practicable, shall be as follows:

- Step 1. Deliveries under Seasonal Off-Peak Gas Rate G-6.
- Step 2. Deliveries under Dual-Fuel Off-Peak Gas Space Heating Rate G-8.
- Step 3. Deliveries under Interruptible Commercial and Industrial Gas Rate G-2.

If, after reasonable notice from Company, any customer served under any of the above named interruptible rate schedules fails to limit his use of gas as directed by Company, then Company shall have the right, at its option, to either (1) discontinue its entire supply of gas to such customer and to withhold such supply until satisfactory assurance is given by the customer that any and all subsequent requests for limitation of his gas usage will be fully complied with, or (2) transfer the customer's gas service to General Service Rate G-1 if the load is eligible for service thereunder.
