Budget Billing

Customers have an opportunity to sign agreements with the District for spreading billing evenly over a twelve month period. The billing is based on estimated consumption made by a representative. In May, the end of the twelve month period, the difference between payments and actual usage is adjusted by adding or crediting the difference of the regular gas service bill. A copy of the agreement is made a part of the District's Rules and Regulations.

Discontinuance of Service

The utility may refuse or discontinue service to an applicant or customer, after proper notice for failure to comply with its rules and regulations or state and municipal rules and regulations. Service shall be discontinued when a dangerous condition is found to exist on the customer's or applicant's premises, when a customer or applicant refuses or neglects to provide reasonable access to premises, for fraudulent or illegal use of service, or for nonpayment of bills. If discontinuance is for nonpayment of bills, the customer shall be given at least ten (10) days written notice, separate from the original bill, and cut-off shall be effected not less than twenty-seven (27) days after the mailing date of the original bill unless, prior to discontinuance, a residential customer presents to the utility a written certificate, signed by a physician, registered nurse, or public health officer, that such discontinuance will aggravate an existing illness or infirmity of the affected premises, in which case discontinuance may be effected not less than thirty (30) days from the date the utility notifies the customer, in writing, of state and federal programs which may be available to aid in payment of bills and the office to contact for such possible assistance.

Determination of GCR

The Utility shall file a gas cost recovery rate (GCR) with the Commission at least 30 days prior to the first day of each calendar Quarter. The GCR shall become effective for the billing for services rendered on or after the first day of each calendar quarter.

The gas cost recovery rate is comprised of:

1. The expected gas cost (EGC) on a dollar-per-Mcf basis, which represents the average expected cost of purchased gas based on 12 months of actual usage.
2. The actual adjustment (AA), on a dollar-per-Mcf basis, which compensates for differences between previous quarters' expected gas cost and actual cost of gas. The (AA) shall be the equal sum of the AA for the reporting period and for the three preceding quarters.
3. The supplier refund adjustment RA on a dollar-per-Mcf basis, which reflects the refunds received from suppliers during the reporting period plus interest at a rate equal to one-half of one percent below the average 90-day commercial paper rate for the twelve-month period. In the event of any large or unusual refund, the Utility may apply the refund procedures set forth herein.
4. The balance adjustment (BA) on a dollar-per-Mcf basis, which compensates for any remaining under-  
collections which have occurred as a result of actual, refunds, and balance adjustments.

Definitions

For purpose of this tariff:

- "Average Expected Cost" is the cost of purchased gas which results from the application of suppliers rates currently in effect, or reasonably expected to be in effect during the calendar quarter, on purchased volumes for the most recently available twelve-month period, divided by the corresponding sales volume. In the event that line loss exceeds 5 percent, purchased volumes for the twelve-month period shall be calculated as: sales volumes divided by .95. Where the calculations require the use of volumes used during a given period, and those volumes did not exist for a particular source for the entire period, or the Utility expects the volumes change substantially, the Utility may make appropriate adjustments to its calculations. Such adjustments of this type shall be described in the quarterly GCR application.
