Other than the meter, service tap, saddle and first service shut off valve, which shall be owned and maintained by Delta, all other approved equipment and material required for service under this tariff shall be furnished, installed, and maintained by the customer at the customer's expense and shall remain the customer's property. At the customer's option, Delta will furnish and install this other equipment, but this other equipment shall be paid for, owned and maintained by the customer. Such other equipment shall include, but is not limited to, the line from the service tap to the point of use, gas regulation equipment, and desiccant tanks or other moisture control equipment as approved and required by Delta. Delta shall have the right to abandon gas service to any customer served from any line which is no longer operated by its supplier for any reason whatsoever. All gas sold and delivered under this Tariff shall be delivered at the varying pressures of Delta's supplier's pipeline, and it shall be the responsibility of the customer to supply, maintain, and operate the necessary regulator and related equipment for the customer's use. Service could be interrupted due to the unprocessed nature of the gas, and upon the discontinuance of the gathering of gas through the gathering line or low flowing pressures resulting from the depletion of the wells feeding that gathering line or other reasons affecting pressure and/or volumes of gas, service is subject to interruption or discontinuance.
