RULES AND REGULATIONS GOVERNING THE SUPPLY OF GAS SERVICE

Gas Service Restrictions (Continued)

10. Gas service will not be continued or provided for any outside ornamental flare fixtures. Gas service will not be provided for any outside gas light or commercial swimming pool installed or connected after the date of the Order.

11. If, on the basis of evidence available to it, the Company concludes that a customer has violated one or more of these rules, it will give notice in writing to the customer of the indicated violation(s) at the customer's address or at the location served, and will undertake to arrange a conference to effect a satisfactory resolution. If customer fails or refuses to appear at such a conference under reasonable conditions and within a reasonable time, Company shall have the right to suspend his gas service until corrective action has been taken. If, pursuant to such conference, one or more violations are found to have occurred, and if, at or after said conference, the customer fails or refuses to correct or discontinue said violation(s), such customer's gas service will be subject to termination upon 15 days' further written notice.

12. Applicants may make application for gas service to be initiated at such time as these restrictions are terminated or modified so as to enable Company to provide the service applied for. Company will file such applications and dispose of them in such manner as the Commission may approve or direct.

13. These rules are designed to promulgate as a part of Company's gas tariff the applicable provisions of the Order. In the event any conflict arises between these rules and the Order, the provisions of the Order shall prevail.

NAME TITLE ADDRESS

RULES AND REGULATIONS GOVERNING THE SUPPLY OF GAS SERVICE

Curtailment Rules (Continued)

Non-domestic Usage: When used in connection with the Fort Knox Military Reservation, Non-domestic Usage means usage for boiler fuel and other applications where alternate fuel facilities are installed or capable of being installed.

Base Period: The 12 months ended with the October 1973 billing period.

Monthly Base Period Volumes: Monthly volumes assigned to each customer determined from his gas consumption during the Base Period, adjusted to normal temperatures, for force majeure conditions, and to annualize consumption in cases where service was initiated or the connected load increased in keeping with Company's rules applicable during the Base Period.

2. Rate G-6 Interruption. No deliveries of gas will be made under Rate Schedule G-6 during the period beginning November 1 of each year and ending March 31 of the following year. Provided, however, those customers who have historically taken gas service through the Rate G-6 meter for Pilot Light Requirements in connection with an alternate fuel may continue to take only such Pilot Light Requirements during period of interruption.

3. Rate G-8 Interruption. Rate G-8 customers will be completely interrupted for the entire calendar month of January of each year. In addition, Rate G-8 service will be completely interrupted on additional days during the Winter Season when and to the extent that Company deems such interruption necessary to preserve storage deliverability or to otherwise meet seasonal or daily sendout requirements. Those customers who have historically taken gas service through the Rate G-8 meter for Pilot Light Requirements in connection with an alternate fuel may continue to take only such Pilot Light Requirements during periods of interruption.

4. Pro-rata Curtailment. In order to meet seasonal and daily sendout requirements, to preserve underground storage deliverability, and to provide for adequate and timely underground storage injections, Company will implement pro-rata curtailment with respect to the classes of customers here listed:

- (a) Large Industrial Customers served on Rate G-2.
- (b) Large Industrial Customers served on Rate G-1A.
- (c) Large Industrial Customers served on Rate G-1.
- (d) All customers served on Rate G-6 (for the seven Summer Season months).
- (e) Fort Knox, Non-domestic Usage.

11-78
 PUBLIC SERVICE COMMISSION
 MAY 17 1976

DATE OF ISSUE May 7, 1976 DATE EFFECTIVE April 1, 1976
 ISSUED BY B. Hudson Milner President Louisville, Kentucky
NAME TITLE ADDRESS

RULES AND REGULATIONS GOVERNING THE SUPPLY OF GAS SERVICE

Curtailment Rules (Continued)

Company will assign Monthly Base Period Volumes to each customer in the above classes. Not less than two weeks prior to the beginning of any monthly billing period (Summer Season monthly billing periods in the case of Rate G-6), Company will notify in writing each customer in the classes named above of the percentage curtailment from such customer's Monthly Base Period Volume to be in effect in said monthly billing period, stating the volume of gas such customer is authorized to take during said monthly billing period. Provided, however, in the case of Large Industrial Customers served under Rate G-2, G-1A, or G-1, such authorized monthly volumes shall be established so as to aggregate not less than 10,000 Mcf for a twelve-month period; otherwise, the percentage of curtailment shall be uniform for all classes to which it applies.

5. Deferral of Curtailment - 1976 Summer Season. For the Summer Season beginning April 1, 1976, and ending October 31, 1976, any customer subject to pro rata curtailment who, by reason of unavoidable delay in providing alternate fuel capability, would benefit by a deferral of all or part of his curtailment until the latter months of such Summer Season may make application to Company for adjustment of his Monthly Base Period Volumes to effectuate such deferral. To the extent it can do so without detriment to other customers or to the operation of its gas system, Company will undertake, upon satisfactory showings by the applicant, to make such adjustments; but in no event will the aggregate of such Monthly Base Period Volumes for the seven summer months be increased.

6. Combination of Authorized Volumes. Subject to a written application by a customer and acceptance thereof by Company, the Company will permit any customer served through more than one point of delivery at any location, or any person, corporation or entity served with gas at more than one location, to take gas through the points or at the locations of its choosing, provided that the gas so taken will not exceed the combined monthly authorized volumes applicable to such points of delivery, and provided that only volumes purchased under rate schedules subject to pro-rata curtailment may be so combined. Gas taken through each individual point of delivery will be billed at the rate applicable to such point of delivery.

If the Application referred to in the above paragraph is denied by the Company, then the Applicant may apply to the Public Service Commission for a review of the Company's decision.

The right to effect combinations of authorized volumes as here described is limited to individual customers or individual persons, corporations or entities and such right will not extend to similar combinations between or among unrelated customers. Nor shall such combinations be employed by any customer for the purpose of obtaining a lower overall cost of gas.

ADDRESS

RULES AND REGULATIONS GOVERNING THE SUPPLY OF GAS SERVICE

Curtailment Rules (Continued)

For the purpose of assessment of penalties, the points of delivery will be considered on a combined basis, so that actual combined take will be measured against combined authorized volumes. It will be the responsibility of any applicant for this treatment to advise Company in writing as to the party or entity to be held accountable for the payment of such penalty.

7. Penalty Charges. Any customer subject to interruption in accordance with Paragraph 2 or Paragraph 3 above who uses any quantity of gas (in excess of Pilot Light Requirements where applicable) during a period of interruption shall be subject to a penalty charge applicable to such unauthorized take at the rate of \$10.00 per Mcf, such penalty to be in addition to the established rate for service.

Any customer subject to curtailment in accordance with Paragraph 4 above who at the end of a Summer Season or a Winter Season has taken gas in excess of 102% of the aggregate of his monthly authorized volumes within such season shall be subject to a penalty charge applicable to such excess take at the rate of \$20.00 per Mcf, such penalty to be in addition to the established rate for service.

The payment of penalty charges for take in excess of authorized volumes shall not be considered as giving any customer the right to take unauthorized volumes of gas, nor shall such penalty charges be considered as a substitute for any other remedy available to Company.

8. Emergency Curtailment. The above rules are designed to provide for curtailment or interruption made necessary by a continuing deficiency in gas supply and not to provide for unforeseen emergency circumstances. In the event of such emergencies, Company shall have the right to direct industrial and commercial customers to further curtail or interrupt service to the extent it deems necessary in order that service may continue to be supplied for residential and other human health, safety and welfare needs.

9. Discontinuance of Service. If any customer subject to interruption or curtailment under these rules fails to limit his use of gas as provided for, herein, then Company shall have the right, after reasonable notice, to immediately and permanently discontinue all gas supply to such customer.
