

Louisville Gas and Electric Company

P.S.C. Gas No. 14, Original Sheet No. 84

Adjustment Clause

GLT Gas Line Tracker

APPLICABLE

Applicable to all customers receiving service under the Company's Rate Schedules RGS, VFD, CGS, IGS, AAGS, FT, SGSS, DGGs, and LGDS.

CALCULATION OF THE GAS LINE TRACKER REVENUE REQUIREMENT

The GLT Revenue Requirement includes the following:

- GLT related Plant In-Service not included in base gas rates minus the associated GLT related accumulated depreciation and accumulated deferred income taxes;
- Retirement and removal of plant related to GLT construction;
- The rate of return on the net rate base is the overall rate of return on capital (cost of short-term debt, long-term debt, and common equity based on the return on equity most recently approved by the Commission grossed up for federal and state income taxes) for the most recent twelve (12) months;
- Depreciation expense on the GLT-related Plant In-Service less retirement and removals;
- Operation and Maintenance; and
- Property Taxes

GLT PROGRAM FACTORS

After the Company replaces a gas service riser or a gas service line under this program, it will assume ownership and responsibility for the plant and equipment. The allocation of the program cost to customers will be in proportion to their relative base revenue share as reflected in the Company's most recent load forecast.

D/T
D/T

A filing to update the projected program costs will be submitted annually. The filing will reflect the anticipated impact on the Company's revenue requirements of net plant additions expected during the current year. At the same time, the Company will submit a balancing adjustment to true up the actual program costs for the preceding year with the revenues collected based on projected program costs. Such adjustment to the GLT will become effective for services rendered on the first day of the month after Commission approval of such change.
