TARIFF FORMAT

- A. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.

- B. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version on file with the KPSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc. the KPSC follows in their tariff approval process, the most current sheet number on file with the KPSC is not always the tariff sheet in effect. Consult the Check Sheet for the sheet currently in effect.

- C. **Paragraph Number Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).1.
 - 2.1.1.A.1.(a).1.(i).
 - 2.1.1.A.1.(a).1.(i).(1).

- D. **Check Sheets** - When a tariff filing is made with the KPSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new sheets are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the KPSC.

SECTION 3 - DESCRIPTION OF SERVICES

3.1 Usage Based Services

The Company's charges are based on the actual usage of the Company's services, in addition to any special features and/or service options, utilized by the customer. Charges begin when the called station is answered and two way communication is possible, as determined by standard industry methods generally in use for ascertaining answer, including hardware answer supervision in which the Local Exchange Company sends a signal to the switch. Charges cease when either party (called or calling) hangs up, unless chained calling is permitted and, in such case, the charges will cease when the calling party hangs up.

3.2 Long Distance Network Service

The Company's Long Distance Network Service provides for the switchless resale of the tariffed Software Defined Network (SDN) Service offered by various Underlying Carriers. This service is a custom designed private telecommunication network that combines the efficiencies and benefits of both switched and private line service to meet the specific requirements of customers needing to communicate between geographic locations within the State.

Each service customer is charged individually for each call on a conversation minute basis. Each call is measured and charged at the applicable rate for the initial sixty (60) second period or fraction thereof, and then at the applicable rate for each additional sixty (60) second period or fraction thereof. The minimum length of a call is sixty (60) seconds. See Section 4, Rates, for the applicable rate schedule.

Dedicated access circuits may be provided and billed by the local exchange company (LEC). Dedicated access channels may be purchased from carriers other than the LEC only in accordance with KPSC rules or if the special access channel is jurisdictionally interstate. Charges for the dedicated access channel are determined by the access provider.
