RULES AND REGULATIONS

Those requesting a change must reimburse the utility for the actual costs incurred, including but not limited to appropriate legal, administrative, engineering, overhead, or other related costs.

- e) Meter Re-read Charge: Will be assessed when a customer requests the utility to re-read the customer's meter and the re-read proves that the original meter reading was correct.
- f) Meter Test Charge: Will be assessed when a customer requests the utility perform a test on the customer's meter to check for accuracy, and the test shows the customer's meter is not more than two percent (2%) fast.
- g) Reconnection Charge: Will be assessed to reconnect service that has been terminated for non-payment of service or for violation of Utility or Public Service Commission rules and regulations, and will include the cost of the service trip for both the disconnection and the reconnection.
- h) Returned Check Charge: Will be assessed when a customer's check is returned, either due to insufficient funds or other reason due to customer fault.
- i) Service Call/Investigation Charge: Will be assessed when a customer requests the onsite presence of utility personnel to investigate a service problem and the problem is a result of the customer's own plumbing facilities, beyond the utility's delivery point, or not caused by failure of utility facilities. Any maintenance and repair of facilities beyond the utility's delivery point is the responsibility of the customer.
- j) Service Line Inspection Charge: Will be assessed to inspect a customer's service line from the point of delivery at the meter service to the point of usage. The service line inspection charge will be waived if confirmation is received from the Kentucky State Plumbing Inspector that a state plumbing permit has been obtained and the State Plumbing Inspector will inspect the service line.

service. Payment of this fee is for the privilege of connecting to the water system and the payment of the fee does not constitute the purchase of a water meter.

17. Should an applicant requesting a 5/8" x 3/4" meter require service on the opposite side of the road from the water main, the utility will provide the service at no additional cost to the customer other than the standard meter connection/tap-on charge. All larger size meters will be charged the actual cost of installing the meter, including, when applicable, the additional costs for crossing the road.

18. Any customer having boilers and/or pressure vessels that receive water from the utility must have a check valve on the water supply line and a vacuum valve on the steam line in order to prevent a collapse were the water supply from the utility be interrupted or discontinued.

W. Leak Adjustments. A customer may make a request for a bill adjustment in the event of a leak under the following conditions:

1. The customer must request a leak adjustment in writing to the utility.
2. The customer's bill will be based on two components. The first step will be to calculate the customer's average monthly usage over a six-month period. The second step will be to deduct the customers average monthly usage (as calculated in the above) from the total amount of water that passed through the meter. The usage calculated in step one will be billed at the utility's regular rates, while the remaining usage will be charged at the per thousand gallon leak adjustment rate, as set forth in the rates and charges portion of the utility's approved tariff. All water passing through the meter must be accounted and paid for by the customer. So the customer will owe the amount of his/her average bill plus the per thousand gallon leak adjustment rate for the remainder of the water that passed through the meter.

replacements shall be paid by the customer of the utility and any liability otherwise resulting shall be that of the customer.

- 4. For purposes of fire protection, including any customer's fire protection system, the utility cannot guarantee a water supply at any particular flow rate or pressure. The fire flow may vary depending upon other water demands on the system, various water facility limitations, or other circumstances. The customer will indemnify and hold harmless the utility and its employees from and against all claims, damages, losses, and expenses incurred as a result of insufficient water supply or deficient system facilities.

AA. Fire Departments. For the purpose of off-setting fifty percent or more of its operation expenses, any fire department not receiving public funds from the Commonwealth of Kentucky, or any political subdivision thereof, may withdraw water from the utility's facilities at no charge, for the extinguishing of fires or the training of firemen. A fire department making such withdrawals shall provide an estimate of its withdrawals to the utility at the end of each month.

AB. Fire Hydrants:

C 4/1/11

- 1. In accordance with 807 KAR 5:066 Section 10(2)(b), a new fire hydrant will not be installed unless:
 - a) A professional engineer with a Kentucky registration has certified that the system can provide a minimum fire flow of 250 gallons per minute, and
 - b) The system supporting this flow has the capability of providing this flow for a period of not less than two (2) hours plus consumption at the maximum daily rate.
- 2. The location, installation, and the responsibility for maintenance of fire hydrants, public and private fire protection facilities, connecting mains, and their ownership may be subject to negotiation between the utility and the applicant/customer. Fire hydrants and public and private fire protection facilities shall be installed as required by the utility and if owned by

the utility shall be subject to any conditions the Public Service Commission may impose, based upon the compensation received for this service.

AC. Fire Sprinkler Systems. Unless specifically exempted within the utility's approved tariff, all connections to the utility's system must be metered; one exception being fire sprinkler systems, subject to utility inspection and approval. A monthly charge will be assessed for each fire sprinkler system. The charge will be approved by the Public Service Commission and included in the rates and charges portion of the utility's approved tariff.

AD. Requirements for New Water Connections.

1. The water line must be buried in a ditch that is at a minimum of 24 inches in depth.
2. The water line must be a minimum of 200 psi
3. A shut-off valve must be installed.
4. A one-way check valve must be installed.
5. A pressure regulator may be required as prescribed by the utility.
6. There shall be absolutely no galvanized pipe or fittings used in the installation.
7. The water line must be visually inspected by the utility.
8. If a well is being used, it must be disconnected and the utility must inspect to verify separation.
9. A plumbing permit from the appropriate regulatory agency is required before the meter can be set.

the utility with regard to newly-developed subdivisions.
