RULES AND REGULATIONS

W. Leak Adjustments. A Customer may make a request for a bill adjustment in the event of a hidden underground leak with the following conditions:

1. A hidden underground leak is defined as a leak in the customer service line between the meter and the premises.
2. Upon written request, Leak Adjustments may be granted to residential and commercial customers. The adjustment will be made prior to the payment of the then current water bill. Leak adjustments only apply to leaks between the meter and the residence in which the line has actually been repaired.
3. The customer must provide a plumber's statement or list of materials showing that the leak has been repaired.
4. After verification of repairs by the utility, the bill will be adjusted by comparing the usage during the leak billing period to the average usage for the past three billing period.
5. The customer's bill will be based on two components.
 - The first step will be to calculate the customer's average monthly usage over a three month period.
 - The second step will be to deduct the customer's average monthly usage (as calculated in the above) from the total amount of water that passed through the meter. The usage calculated in step one will be billed at the utility's regular rates, while the remaining usage will be charged at the cubic foot leak adjustment rate which is the actual rate that Madison County Utilities District is charged from our provider, Richmond Utilities, at the time of the leak. This tariff may be subject to change from time to time.
 - All water passing through the meter must be accounted and paid for by the customer. Therefore, the customer will owe the amount of his/her average bill plus the per cubit foot leak adjustment rate for the remainder of the water that passed through the meter.

RULES AND REGULATIONS

- 6. If meter readings are not available for an entire three month period, the water bill will be estimated by the utility, subject to an upward or downward adjustment once a three month average of actual meter readings can be calculated.
- 7. Only one (1) leak adjustment will be made per twelve (12) month period.
- 8. Plastic pipe for repair of underground water service lines must be certified to withstand working pressure of 200 lbs. per square inch or greater.
- 9. If a new meter is set to check for a leak the meter will be charged to the customer at the then current meter cost.

X. Ownership of Mains, Services, and Appurtenances:

- 1. All mains, fire hydrants, valves, crossings, and other appurtenances are and shall remain the property of the utility, whether installed by the utility or the customer.
- 2. All service lines from the main to the meter with appurtenances are and shall remain the property of the utility, whether installed by the utility or the customer.
- 3. The customer shall install, own, and maintain his/her service line from the meter (or point of delivery) to the point of usage.

Y. Notification of System Problems. The customer shall notify the utility immediately should the service be unsatisfactory for any reason, or should there be any defects, problems, trouble, or accidents affecting the water system.
