Monitoring of Customer Usage

At least once annually the Company will monitor the usage of each customer according to the following procedure:

1. The customer's annual usage for the most recent 12-month period will be compared with the annual usage for the 12 months immediately preceding that period.
2. If the annual usage for the two periods are substantially the same or if any difference is known to be attributed to unique circumstances, such as unusual weather conditions, common to all customers, no further review will be done.
3. If the annual usages differ by _____ percent or more and cannot be attributed to a readily identified common cause, the Company will compare the customer's monthly usage records for the 12-month period with the monthly usage for the same months of the preceding year.
4. If the cause for the usage deviation cannot be determined from analysis of the customer's meter reading and billing records, the Company will contact the customer by telephone or in writing to determine whether there have been changes such as different number of household members or work staff, additional or different appliances, changes in business volume, or known leaks in the customer's service line.

RULES AND REGULATIONS

Dear _____

It has come to the District's attention your basic water service is being used contradictory to the tariffs of the McKinney Water District (and your water user agreement).

Under our tariffs, which are rules and regulations governing water usage, there is a strict requirement of one usage per meter. In other words, only one residence, business, etc., may be served by each meter.

The reason for this rule is obvious. McKinney, and all water companies charge a basic rate for the first 1,000 gallons of water used from a meter, with descending rates for various amounts after the first 1,000 gallons. If more than one residence is hooked up to a meter, McKinney loses money every month as a result.

Therefore, we are issuing letters to the customers whom we believe have more than one entity on a meter.

You have 60(sixty) days to contact the McKinney Water District to allow our maintenance man to come to your property and assist you in terminating the illegal service lines, and assist you in establishing a legitimate water supply for all additional users.

Failure to comply to this letter could result in a loss of water service.

Please direct any and all questions concerning this letter to the following board members:
