RULES AND REGULATIONS

2. Pressure surveys. At least once a year the utility will make a survey of pressures in its distribution system of sufficient magnitude to indicate the quality of service being rendered at representative points in its system. Pressure charts for these surveys will show the date and time of beginning and end of the test and the location at which the test was made. Records of these pressure surveys will be maintained at the utility's office and will be made available to the Public Service Commission upon request.

V. Service Lines & Connections.

New language  
filed effective  
August 1, 2009.  
See pages 37  
through 38-2.

- ~~1. The utility will furnish and install at its own expense for the purpose of connecting its distribution system to the customer's premises that portion of the service connection from its main to and including the meter and meter box. The utility will recoup this expense from the customer in accordance with KRS 278.0152.~~
- ~~2. In areas where the distribution system follows well defined streets and roads, the customer's point of service will be located at that point on or near the street right of way or property line most accessible to the utility from its distribution system. In areas where the distribution system does not follow streets and roads, the point of service will be located as near the customer's property line as practicable. Prior to installation of the meter the utility will consult with the customer as to the most practical location.~~
- ~~3. Depth of service line. All service lines must be laid at a sufficient depth (a minimum of 24 inches) to prevent freezing during the coldest weather normally experienced except where services are not intended for use during freezing weather and are actually drained during such periods.~~
- ~~4. A plumbing permit from the appropriate regulatory agency is required before the utility can set the meter.~~

RULES AND REGULATIONS

5. The applicant/customer must furnish and lay the necessary pipe to make the connection from the point of service to the point of usage and be financially responsible for all costs associated with the installation and maintenance of his/her service line plumbing, including a shut-off valve and one-way check valve, installed on his/her property beginning at the outlet side of the water meter. The service line must be kept in good repair and in accordance with utility and Public Service Commission rules and regulations.
6. The installation and maintenance of the water service line must be in accordance with the rules and regulations of the Kentucky Department of Health.
7. A cross-connection of the utility's system with any other source is strictly prohibited.
8. A well that has or is being used on the premises must be inspected by utility personnel to verify disconnection and separation.
9. All service lines on the customer's side of the meter must consist of copper or PVC pipe with a rating of no less than 160 psi, and should not be less than 3/4 inches.
10. Absolutely no galvanized pipe or fittings can be used in the installation.
11. The utility will not set a meter on a customer's service line at a point that does not deliver 30 psig at the meter.
12. If the applicant/customer's point of usage is at a higher elevation than the meter, the customer should consult with a reputable engineering firm to properly size the service line from the meter to the point of usage.
13. Should an applicant/customer desire a higher pressure due to location or other need, provisions must be made by the applicant for an individual pressure booster system. The manner of connection, location cross-connection protection and type is subject to approval by

the utility. The utility reserves the right to require discontinuance and disconnection should the private booster system have a detrimental effect on the utility's system.

- 14. Piping on the premises of the applicant/customer must be installed so that connections are conveniently located with respect to the utility's lines and mains. A place must be provided for metering that is unobstructed and accessible at all times.
- 15. The utility may require the applicant/customer may, at his/her own expense, to install a back-flow preventor and/or pressure regulator.
- 16. All meters will be installed, renewed, and maintained at the expense of the utility, and the utility reserves the right to approve the size and type of meter used.
- 17. All taps and connections to the mains of the utility must be made by and/or under the direction and supervision of utility personnel and will incur a meter connection/tap-on charge, an amount that has been approved by the Public Service Commission for such service. Payment of this fee is for the privilege of connecting to the water system and the payment of the fee does not constitute the purchase of a water meter.
- 18. Should an applicant requesting a 5/8" x 3/4" meter require service on the opposite side of the road from the water main, the utility will provide the service at no additional cost to the customer other than the standard meter connection/tap-on charge. All larger size meters will be charged the actual cost of installing the meter, including, when applicable, the additional costs for crossing the road.
- 19. Any customer having boilers and/or pressure vessels that receive water from the utility must have a check valve on the water supply line and a vacuum valve on the steam line in order to prevent a collapse were the water supply from the utility be interrupted or discontinued.

RULES AND REGULATIONS

AA. Fire Departments. ~~For the purpose of off-setting fifty percent or more of its operation expenses, any fire department not receiving public funds from the Commonwealth of Kentucky, or any political subdivision thereof, may withdraw water from the utility's facilities at no charge, for the extinguishing of fires or the training of firemen. A fire department making such withdrawals shall provide an estimate of its withdrawals to the utility at the end of each month. Fire Departments are authorized to use fire hydrants for filling water tankers only and should not be hooked directly to pumpers because this practice can collapse the line. If, at any time, damage is incurred to the water system, the fire department will be held "solely" and "totally" responsible for "all" expenses incurred in repairing damage.~~

AB. Fire Hydrants:

- ~~1. In accordance with 807 KAR 5:066 Section 10(2)(b), a new fire hydrant will not be installed unless:
 
  - ~~a) A professional engineer with a Kentucky registration has certified that the system can provide a minimum fire flow of 250 gallons per minute, and~~
  - ~~b) The system supporting this flow has the capability of providing this flow for a period of not less than two (2) hours plus consumption at the maximum daily rate.~~~~
- ~~2. The location, installation, and the responsibility for maintenance of fire hydrants, public and private fire protection facilities, connecting mains, and their ownership may be subject to negotiation between the utility and the applicant/customer. Fire hydrants and public and private fire protection facilities shall be installed as required by the utility and if owned by the utility shall be subject to any conditions the Public Service Commission may impose, based upon the compensation received for this service.~~

RULES AND REGULATIONS

- ~~3. The District will contract with fire protection districts, volunteer fire departments, developers and others to install and maintain fire hydrants and supply water for fire protection; provided, however, that (1) such users cannot use pumps to pull water from the hydrants, and (2) use of hydrants be strictly limited to authorized periodic drill purposes and emergency (i.e. fire fighting) use only. The Water District will publish annually its exemption in supplying a water source for fire protection, recognizing hydrants as flushing stations only.~~
- ~~4. The Allen County Water District, upon setting these hydrants, assures that they are installed and in working condition and the Water District will recognize them as flushing hydrants only and will not certify them to be fire hydrants, as such, because of variance in pressure and volume of water available. And the Water District does not take the responsibility of blow off hydrants being labeled as fire hydrants. The Water District will leave that to individual fire departments for them to certify as the Water District is in the business of constructing water mains for the well being of Allen County residents.~~

AC. Fire Sprinkler Systems. Unless specifically exempted within the utility's approved tariff, all connections to the utility's system must be metered; one exception being fire sprinkler systems, subject to utility inspection and approval. A monthly charge may be assessed for each fire sprinkler system. The charge will be approved by the Public Service Commission and included in the rates and charges portion of the utility's approved tariff.

AD. Requirements for New Water Connections.

1. The water line must be buried in a ditch that is at a minimum of 24 inches in depth.
2. The water line must be a minimum of 200 psi
3. A shut-off valve must be installed.
4. A one-way check valve must be installed.

AG. Line Enlargement Charge.

New language filed  
effective August 1,  
2009.

~~It is the utility's policy that the infrastructure costs of residential developments should be paid by the developer rather than by the existing customers of the utility. Most of the utility's distribution lines were designed and constructed to serve farms with infrequently interspaced residential lots. For purposes of this rule a lot is considered more residential than agricultural in nature if the lot is less than 15 acres.~~

~~The developer of each residential development on an existing distribution line shall be required to pay to the utility a Line Enlargement Charge. Such charge shall be equal to the number of feet of road frontage of the residential development on the existing distribution line multiplied by 1/2 of the average cost of installing the utility's minimum size distribution water main. The charge will normally be charged only for the frontage of lots less than 15 acres. However, if a development contains lots both less than and greater than 15 acres, then the charge will be assessed for the frontage of the entire development if more than 1/2 of the frontage is occupied by lots of less than 15 acres. No charge will be made for the frontage of any tract served by an existing meter in front of that lot. However, such tract will be considered under the preceding sentence for the purpose of determining whether to charge for the remaining frontage of the development.~~

~~No preliminary plat will be signed until the developer has agreed in writing to pay the required Line Enlargement Charge. No final plat will be signed until the developer has paid the required Line Enlargement Charge.~~

~~The funds from the Line Enlargement Charge shall be placed in an escrow account. These funds shall be used only for enlarging distribution lines and, under exceptional circumstances, when the additional construction will be cheaper than enlarging the affected lines, and for the installation of connections between water mains such as dead-end lines.~~

RATES AND CHARGES

**TARIFF AS TO INCREASE IN WHOLESALE WATER RATE**

KRS 278.015(2) AND 807 KAR 5:068 provides essentially the manner in which a Water District may implement a Purchase Water Adjustment designed to recover the actual cost of water purchased by a Water District from a wholesale supplier.

The Allen County Water District purchases substantially all of its water from the Glasgow Water and Sewer Commission of Glasgow, Kentucky. By its Ordinance No. 2633, the City of Glasgow, Kentucky, established new rates for the Glasgow Water and Sewer Commission to charge increased new wholesale rates to be charged to its customers, including the Allen County Water District, effective July 1, 2008 (\$1.40 per 1,000 gallons to \$1.75 per 1,000 gallons) AND effective July 1, 2009 (\$1.75 per 1000 gallons to \$1.95 per 1,000 gallons). A copy of said Ordinance is attached hereto as a part hereof.

The Allen County Water District was notified of this increase by a letter from the Glasgow Water Company, dated May 16, 2008. A copy of said letter is filed herewith as a part hereof.

By Letter to the Allen County Water District from its Engineer, Kenvirons, Inc., dated July 25, 2008, the Water District was informed as follows:

"The indication is that the district could absorb the increased purchased water cost relative to the \$1.75 per thousand gallons rated along with the adjustments to the 2007 expenses. Next year the rate will increase to \$1.95. Based on the same parameters, the purchased water cost will increase an additional \$69,092, which would cause a negative net income of approximately \$41,000. The above calculations do not consider any customer growth, which would generate a small amount of additional revenues. The conclusion is that the district would absorb the initial \$1.75 per thousand rate, but not the \$1.95 that is proposed to be effective next year. The \$1.75 rate results in an increase in customer rate of \$0.41 per thousand gallons. The \$1.95 rate result in an additional \$0.23 per thousand gallons for a total of \$0.64 per thousand gallons."

SHEET NO. \_\_\_\_\_

RATES AND CHARGES

The current wholesale base rate of the City of Glasgow is \$1.40 per thousand gallons. The changed rate of the City of Glasgow is \$1.75 per thousand gallons, effective July 1, 2008, as shown on the City of Glasgow's Ordinance No. 2633.

The twelve month period upon which the purchased water adjustment is April, 2008 through March, 2009.

Gallons purchased by Allen County Water District from City of Glasgow during the 12 month period is 347,791,400; from the City of Scottsville is 8,943,800; a total of 356,735,200 gallons.

Total gallons sold by Allen County Water District for the 12 month period is 295,078,700. The annual increased water cost is \$121,726.99 [347,791,400 gallons x \$0.35 per 1000 gallons = \$121,726.99]. (\$1.75 less \$1.40 = \$0.35)

The purchased water adjustment factor is, therefore, \$0.41 per 1000 gallons (\$121,726.99 divided by 295,078.700 gallons = \$0.41 per 1000 gallons)

The adjusted rates effective June 30, 2009, are as follows:

	<u>EXISTING RATE</u>	<u>ADJUSTED RATE</u>
First 2,000 gallons	\$16.17 (Min.)	\$16.99 (Min.)
Next 3,000 gallons	\$ 6.21 Per 1,000 Gals.	\$ 6.62 Per 1,000 Gals.
Next 5,000 gallons	\$ 5.16 per 1,000 Gals.	\$ 5.57 Per 1,000 Gals.
Next 60,000 gallons	\$ 4.66 per 1,000 Gals.	\$ 5.07 per 1,000 Gals.
Over 70,000 gallons	\$ 4.21 per 1,000 Gals.	\$ 4.62 per 1,000 Gals.
 <u>Corps of Engineers</u>		
First 55,000 gallons		\$317.35 Minimum Bill
Next 15,000 gallons		\$ 5.07 per 1,000 gallons
Over 70,000 gallons		\$ 4.62 per 1,000 gallons
 <u>Mobile Home Parks</u>		
First 10,000 gallons		\$ 58.80 Minimum Bill
Next 60,000 gallons		\$ 5.07 per 1,000 gallons
Over 70,000 gallons		\$ 4.62 per 1,000 gallons
