RULES AND REGULATIONS

The maximum amount of the adjustment so prescribed shall not produce revenue adjustments based upon the actual preceding twelve-month period, greater than the difference between the purchased water billed at the then existing rates and the purchased water billed at the revised rate.

On and after the effective date of this rate schedule, if any increase or decrease is made in the rate at which Company's water suppliers sell water to the Company, the unit charges of the aforesaid rate schedule shall be increased or decreased by a Purchased Water Adjustment determined as follows:

(1) Water Purchases will be determined by the Company under suppliers applicable rate schedule during a period of twelve calendar months ending within three months preceding the month of the effective date of the supplier's rate change. Such purchases shall be:

- (a) At the Base Supplier Rate
- (b) At the New Supplier Rate

(2) The difference between the amounts so determined shall be divided by the number of cubic feet/gallons of water sold by the Company during the said twelve-month period. The unit charged or credit so determined, expressed in cents per cubic feet/gallons, shall be the Purchased Water Adjustment applicable to consumer billings, unless water loss exceeding fifteen (15) percent.

(3) If the water loss exceeds fifteen (15) percent, the actual water sales shall be divided by eighty-five (85) percent yielding the maximum allowable water purchases. The maximum allowable water purchases will then be multiplied by the change in cost per gallons, yielding the total allowable change. The total allowable change shall then be divided by the actual number of gallons sold, yielding the purchased water adjustment expressed in cents per gallon.

(4) The new supplier rate shall become the Base Supplier Rate to be used in measuring the effect of any subsequent supplier rate change. Each such subsequent change shall be treated in the same manner as the establishment of a new Base Supplier Rate.
