of any service line connection to its distribution system; shall determine the allocation of water to Members in the event of a water shortage; and may shut off water to a Member who allows a connection or extension to be made of his service line for the purpose of giving or selling water to another user. In the event the total water supply shall be insufficient to meet all of the needs of the Members, or in the event there is a shortage of water, the Association may prorate the available water among the various Members on such basis as is deemed equitable by the Board of Directors, and may also prescribe a schedule of hours covering use of water for garden purposes by particular members and require adherence thereto or prohibit the use of water for garden purposes; provided that, if at any time the total water supply shall be insufficient to meet all of the needs of all of the Members, the Association must first satisfy the needs of all Members for domestic purposes before supplying any water for livestock purposes and must satisfy the needs of all Members for both domestic and livestock purposes before supplying any water for garden purposes.
