RULES AND REGULATIONS

For said connection charge, the property owner will receive the following material and equipment fully installed:

(a) A tap at the water main.

(b) A sufficient amount of tubing to extend from the water main to the point at least six inches inside the utility easement or sidewalk line of the property owner if there is a sidewalk; otherwise to a point at least two feet inside the property line or utility easement of the property owner if there is no sidewalk.

(c) A complete meter installation to be installed at the point of ending of the tubing, which meter installation will consist of a meter, yoke, or other setting used by the District, plus a meter, a meter box and a meter box cover.

Such property owner, if he desires water service, must bear the cost (including replacement of any pavement which may be disturbed on his premises during the construction) of running a water line from the building located on his premises to the point in his property line or easement where the District has brought the line.

The payment of a connection charge is a tap-in or service charge for the privilege of connecting to the waterworks system of the Water District and the payment of such connection charge does not constitute the purchase of a water meter. Title to the water meter serving each water customer shall at all times remain vested in the Water District, and if not used by the customer, may be removed by the District as needed.

COSTS OF INSTALLATION AND INDEMNIFICATION

All costs, expenses, maintenance, and responsibility incident to installation, connection and use of water lines from the outlet side of the respective water meters to such respective premises where such respective water lines are brought to serve such premises and extending to the respective buildings on such premises, shall be borne by the respective property owners, who shall further indemnify the District from any loss or damage that may directly or indirectly be occasioned by the installation of such lines. All water connections shall be made under the supervision of the Superintendent of said waterworks system in accordance with the rules and regulations of the Kentucky Department of Health.
