Sheet No. 9

BEREA COLLEGE ELECTRIC UTILITY

RULES AND REGULATIONS

The Berea College Electric Utility will install underground distribution lines to a residential subdivision under the following conditions:

1. The subdivision being developed must consist of a tract of land which is divided into ten (10) or more lots for the construction of new residential buildings or the land on which is constructed two (2) or more new multiple occupancy buildings. (Refer to PSC Electric Rules Appendix A for definition of terms.)
2. The developer or owner of subdivision may be required to advance to the utility an amount equal to an "estimated average cost differential" between the average or representative cost of underground distribution systems in residential subdivisions and of equivalent overhead distribution systems in residential subdivisions and areas. If the amount deposited exceeds the normal charge for underground extensions, the amount in excess shall be refunded immediately after work is completed and actual cost has been established.
3. The utility will construct underground distribution facilities in the subdivision adequate to render single phase 120/240 volt service. All electrical devices such as transformers, switching equipment and metering devices shall be above ground.
4. Three(3) phase primary mains or feeders required within a subdivision to supply local distribution or to serve three phase loads shall be overhead unless underground is required by governmental authorities or requested by the applicant, in either of which case the differential cost of underground shall be borne by the applicant.
5. Developer or successor in title shall grant a right-of-way satisfactory to the utility for the installation, operation and maintainance of its underground facilities.
6. Point of service shall be that point where the facilities of the utility join the customer's facilities, irrespective of the location of the meter. If the utility installs underground cable from an easement to the residence the customer shall be required to furnish the ditch and suitable backfill for the proper installation of the service.
7. Subject to the judgement of the utility the developer may be required to deposit with the utility the entire cost of the extension. If this is done the amount deposited in excess of the normal charge for underground extensions shall be refunded to the developer over a ten year period as provided in P.S.C. Rule Elec:-1-X-3.
