Orig + Rev Sheet No. 9-11

Berea College Electric Department

RULES AND REGULATIONS

C-80

The estimated average cost differential in 1978 is one dollar and sixty cents (1.60) per lineal foot, including street crossing. The actual cost will be established on an individual project basis at the then current prices.

The average cost is based on the developer furnishing all trenching, bedding, backfill, conduit, and rock costs.

The actual cost per lot is to be established based on current prices by dividing total lineal feet required by total number of lots.

- 19. Relocation of Lines: The Utility will cooperate with all parties in the construction, improvements, or rehabilitation of public streets and highways. It is expected that these parties will give reasonable notice to permit the Utility to relocate its lines to permit the necessary road construction. If the Utility's poles, anchors, or other appurtenances are located within the confines of the public right(s) of way, the Utility shall make the necessary relocation at its own expenses; if the Utility's poles, anchors, or other facilities are located on private property, the parties shall then be required to reimburse the Utility.

When the Utility is requested to relocate its facilities for any reason(s) provided adequate right-of-way can be obtained for the relocation requested, any expense involved will be paid by the firm, person, or persons requesting the relocation, unless one or more of the following conditions are met:

- 1. The relocation is made for the convenience of the Utility.
- 2. The relocation will result in a substantial improvement in the Utility's facilities of their location.
- 3. That the relocation is associated with other regularly scheduled conversion or construction work and can be done at the same time.

- 20. Electric Distribution System Inspection: Berea College Electric Utility Department has adopted the following procedure for the inspection of its electrical system. A systematic inspection shall be performed in the manner set out below.

By agreement with Kentucky Utilities, they will perform all inspections on our system on facilities with a primary operating voltage of 69 KV or greater.

I. AT INTERVALS NOT TO EXCEED SIX MONTHS

- A. Underground network transformers and network protectors in vaults located

Primary Voltage Service:

At the option of the customer there will be a discount of five per cent applied to the monthly bill (including the minimum bill if applicable) provided the customer owns and maintains or leases all transformers and other facilities necessary to take service at the primary or transmission voltage delivered. (This clause applies to customers having a usage of twenty-five thousand kilowatts or more within the billing month), but does not apply to the fuel clause revenue.

Minimum Charge: Per Month \$660.00

Special Rules: If account is not paid before the 20th day after date of mailing the monthly bill, services may be discontinued in accordance with the rules of the Energy Regulatory Commission of Kentucky and an extra charge of \$10.00 will be made before turning on electric.
