

February 10, 1968

PUBLIC SERVICE COMMISSION
OF KENTUCKY

NOTICE

The undersigned, Berea College Electric Utility Department of Berea College, Berea, Kentucky, hereby notifies the Public Service Commission that it has adjusted the tariffs charged its residential, commercial and industrial users by reducing the rates charged in accordance with the tariffs attached hereto, all of which result in a reduction to the various customers.

Said Utility has made said rates effective in accordance with the Order of the Public Service Commission of Kentucky in Case No. 4674, dated January 11, 1968, as modified by Supplemental Order dated February 8, 1968, and the rates and charges shall be for meter readings starting the 1st day of February, 1968.

These tariffs are adopted without prejudice to the right of the Utility to appeal from the Order of the Public Service Commission should its petition for rehearing before that Commission not be successful.

Berea College Electric Department

RULES AND REGULATIONS

- Application for Service: Each prospective customer desiring electric service will be required to sign Berea College Electric Utility Department's standard form of application for service or contract before service is supplied by the Utility.
- Deposit: A deposit of \$50.00 is required for each residential customer and \$150.00 for each commercial customer before electric service is supplied. Upon termination of service, deposit may be applied by the Utility against unpaid bill of customer, and if any balance remains after such application is made, said balance shall be refunded to customer. Above deposits will accumulate interest at the rate of six percent(6%) annually.
- Point of Delivery: The point of delivery is the point, as designated by the Utility, on customer's premises where current is to be delivered to building or premises. Any other point of delivery, requested by the customer other than that designated by the Utility, the additional cost shall be borne by the customer.
- Continuity of Service: The Utility shall use reasonable diligence to provide a constant and uninterrupted supply of electric power and energy, but if such supply shall fail or be interrupted or become defective through act of God, or the public enemy or by accident, strikes, labor troubles, or by action of the elements, or inability to secure easements or other permits needed, or for any other cause beyond the reasonable control of the Utility, the Utility shall not be liable.
- Customer's Wiring Standards: All wiring of customer must conform to Utility's requirements, and accepted modern standards, as exemplified by the requirements of the National Electric Safety Code and the National Electric Code.
- Inspection: The Utility shall have the right to inspect, but shall not be obligated, for any installation before electricity is introduced or at any later time and reserves the right to reject any wiring or appliances not in accordance with the Utility's standards. Such inspection or failure to inspect or reject shall not render the Utility liable or responsible for any loss or damage resulting from defects in the installation, wiring, or appliances, or from violation of the Utility's rules or from accidents which may occur upon customer's premises. Further, if it is required, it shall be the responsibility of the customer to present to the Utility a certificate of inspection covering all State and Local ordinances in effect at the time, before such connections are to be made.
- Customer's Responsibility for Utility's property: All meters, service connections and other equipment furnished by the Utility shall be, and remain, the property of the Utility. The Utility customer shall provide a space for, and exercise proper care, to protect the property of the Utility on its premises and in the event of

RULES AND REGULATIONS

loss or damage to the Utility's property, arising from neglect of customer to care for same, the cost of necessary repairs or replacement shall be paid by customer.

- 8. Right of Access: The Utility's identified employees shall have access to customer's premises at all reasonable times for the purpose of reading meters, testing, repairing, removing or exchanging any or all equipment belonging to the Utility.
- 9. Billing: Bills will be rendered monthly and shall be paid within ten (10) days from date of bill. Failure to receive bill will not release customer from payment obligation. Should bills not be paid within 20 days after the mailing date of the original bill, the Utility may at any time thereafter, upon five (5) days written notice to customer, discontinue service. In event service is discontinued an additional ten dollars (\$10.00) reconnect fee will be charged to the customer, a service charge of \$5.00 will be made for any returned checks.
- 10. Failure of Meter to Register: In the event a customer's meter should fail to register, the customer shall be billed from the date of such failure at the average consumption of the customer, based on like months.
- 11. Discontinuance of Service by the Utility: The Utility may refuse to connect or may discontinue service for the violation of any of its Rules and Regulations, or for violation of any of the provisions of the SCHEDULE OF RATES AND CHARGES or of the application of customer or contract with customer. The Utility may discontinue service to customer for diversion of current or the appearance of current theft devices on the premises of customer. The discontinuance of service by the Utility for any causes as stated in this rule does not release customer from his obligation to the Utility for payment of bills. Service will not be continued until the Utility has been reimbursed for the estimated amount of the service rendered and the cost to the Utility incurred by reason of the fraudulent use.
- 12. Termination of Contract by Customer: Customers who have fulfilled their contract terms and wish to discontinue service must give at least three (3) days written notice to that effect unless contract specifies otherwise. Notice to discontinue service prior to expiration of contract term will not relieve customer from any minimum or guaranteed payment under any contract or rate.
- 13. Service Charges for Temporary Service: Customer requiring electric service for a period not exceeding ninety (90) days will be required by the Utility to pay all costs for connection and disconnection incidental to the supplying and removing of service and the Utility may estimate the amount of power to be used, and charge for that amount. If there is an overcharge, it will be refunded.

after service is discontinued. This rule applies to circuses, carnivals, fairs, temporary construction, temporary mobile homes and the like.

14. Non Standard Services: The customer shall pay the cost of any special installation necessary to meet his requirements for service at other than standard voltages, or for the supply of closer voltage regulation than required by standard practice.

15. Meter Test: The Utility will, at its own expense, make periodic tests and inspections of its meters in order to maintain a high standard of accuracy. The Utility will make additional tests or inspections at the request of customer. If such test shows that the meter is accurate within 2% slow or fast, no adjustment will be made in the customer's bill. In case the test shows meter to be in excess or 2% slow, an adjustment may be made. If the test is 2% fast, an adjustment will be made in the customer's bill in accordance with Public Service Commission Regulation 807 KAR 2:010, Section 9.

16. Distribution Line Extensions:

I. Normal Extension

- (1) An extension of one thousand (1000) feet or less shall be made by the Utility from its existing distribution line without charge for a prospective customer who shall apply for and contract to use this service for one year or more and provides guarantee for such service.
- (2) The "Service Drop" to the structure from the distribution line at the last pole shall not be included in the foregoing measurements.

II. Extension to a Proposed Real Estate Subdivision

(1) Deposit and Application

An applicant desiring an extension to a proposed Real Estate Subdivision shall be required to place on deposit with the Utility an amount equal to the entire cost of the extension, based on an estimate prepared by the Utility. Said deposit shall be adjusted to the actual cost of the extension at the time the extension has been completed.

(2) Service Drop

The "Service Drop" shall not be considered a part of the extension.

RULES AND REGULATIONS

(3) Refund

Each year for a period of ten (10) years the Utility shall refund to the applicant a sum equivalent to the average cost of one thousand (1000) feet of the extension installed for each additional customer connected during the year, whose service line is directly connected to the extension installed and not to extensions or laterals therefrom, but in no case shall the total amount refunded exceed the amount on deposit with the Utility. After the end of the refund period, no refund shall be made.

(4) Easements

The applicant shall furnish at no expense to the Utility all right-of-way and easements required to serve said proposed subdivisions.

III. Other Extensions

(1) Deposits and Application

When an extension of the Utility's line to serve an applicant or group of applicants amount to more than one thousand (1000) feet per customer, the applicant shall be required to place on deposit with the Utility an amount equal to the entire cost of the excessive footage over one thousand (1000) per customer, based on an estimate prepared by the Utility of the average cost per foot of the total extension. Said estimated cost per foot shall be adjusted to the actual cost per foot, at such time as the extension has been completed.

(2) Service Drop

The "Service Drop" shall not be considered a part of the extension.

(3) Refund

Each year for a period of ten (10) years, the Utility shall refund to the applicant or applicants who paid for the excessive footage the average cost of one thousand (1000) feet of the extension for each additional customer connected during the year whose service line is directly connected to the extension installed and not to extensions or laterals therefrom, but in no case shall the total amount refunded exceed the amount of deposit with the Utility. After the end of the refund period no refund shall be made.

RULES AND REGULATIONS

(4) Easements

The applicant or applicants shall furnish at no expense to the Utility all right-of-way and easements required to serve area to be served.

17. Distribution Line Extensions to Mobile Homes:

(1) All extensions of up to 150 feet from the nearest facility shall be made without charge.

(2) Extensions greater than 150 feet from the nearest facility and up to 300 feet shall be made provided the customers shall pay the Utility a "customer advance for construction" of fifty dollars (\$50) in addition to any other charges required by the Utility for all customers. This advance shall be refunded at the end of one (1) year if the service to the mobile home continues for that length of time.

(3) For extensions greater than 300 feet and less than 1,000 feet from the nearest facility, the Utility may charge an advance equal to the reasonable costs incurred by it for that portion of the service beyond 300 feet plus fifty dollars (\$50). Beyond 1,000 feet the extension policies set forth in 807 KAR 2:050 Section 10 apply.

A. This advance shall be refunded to the customer over a four (4) years period in equal amounts for each year the service is continued.

B. If the service is discontinued for a period of sixty (60) days, or should the mobile home be removed and another not take its place within sixty (60) days, or be replaced by a permanent structure, the remainder of the advance shall be forfeited.

C. No refunds shall be made to any customer who did not make the advance.

18. Underground Policy: The Berea College Electric Utility Department will install underground distribution lines to a residential subdivision under the following conditions: For established residential areas, and individuals paragraph 9 through H apply.

CHECKED
Public Service Commission
MAY 11 1981

RULES AND REGULATIONS

the land on which is constructed two (2) or more new multiple occupancy buildings. (807 KAR 2:050 - Section 10).

- B. The developer or owner of subdivision may be required to advance to the Utility an amount equal to an "estimated average cost differential" between the average or representative cost of underground distribution systems in residential subdivisions and equivalent overhead distributions systems in residential subdivisions and areas. If the amount deposited exceeds the normal charge for underground extensions, the amount in excess shall be refunded immediately after work is completed and actual cost has been established.
- C. The Utility will construct underground distribution facilities in the subdivision adequate to render single phase 120/240 volt service. All electrical devices such as transformers, switching equipment and metering devices shall be above ground.
- D. Three (3) phase primary mains or feeders required within a subdivision to supply local distribution or to serve three phase loads shall be overhead unless underground is required by governmental authorities or requested by the applicant, in either of which case the differential cost of underground shall be borne by the applicant. All primary circuits shall be encased in suitable conduit.
- E. Developer or successor in title shall grant a right-of-way satisfactory to the Utility for the installation, operation and maintenance of its underground facilities.
- F. Point of service shall be that point where the facilities of the Utility join the customer's facilities, irrespective of the location of the meter. If the Utility installs underground cable from an easement to the residence the customer shall be required to furnish the ditch and suitable backfill for the proper installation of the service.
- G. Subject to the judgment of the Utility, the developer may be required to deposit with the Utility the entire cost of the extension. If this is done, the amount deposited in excess of the normal charge for underground extensions shall be refunded to the developer over a ten years period as provided in 807 KAR 2:050 Section 10.
- H. The cost to the developer for the underground electric distribution system shall be the actual difference in cost between standard overhead construction (based on the Utility estimate) and the actual cost of the underground system in place exclusive of trenching, bedding, backfill, conduit, and rock costs.

RULES AND REGULATIONS

The estimated average cost differential in 1980 is one dollar and sixty cents (1.60) per lineal foot, including street crossing. The actual cost will be established on an individual project basis at the then current prices.

The average cost is based on the developer furnishing all trenching, bedding, back-fill, conduit, and rock costs.

The actual cost per lot is to be established based on current prices by dividing total lineal feet required by total number of lots.

- 19. Relocation of Lines: The Utility will cooperate with all parties in the construction, improvements, or rehabilitation of public streets and highways. It is expected that these parties will give reasonable notice to permit the Utility to relocate its lines to permit the necessary road construction. If the Utility's poles, anchors, or other appurtenances are located within the confines of the public right(s) of way, the Utility shall make the necessary relocation at its own expenses; if the Utility's poles, anchors, or other facilities are located on private property, the parties shall then be required to reimburse the Utility.

When the Utility is requested to relocate its facilities for any reason(s) provided adequate right-of-way can be obtained for the relocation requested, any expense involved will be paid by the firm, person, or persons requesting the relocation, unless one or more of the following conditions are met:

- 1. The relocation is made for the convenience of the Utility.
- 2. The relocation will result in a substantial improvement in the Utility's facilities of their location.
- 3. That the relocation is associated with other regularly scheduled conversion or construction work and can be done at the same time.

- 20. Electric Distribution System Inspection: Berea College Electric Utility Department has adopted the following procedure for the inspection of its electrical system. A systematic inspection shall be performed in the manner set out below.

By agreement with Kentucky Utilities, they will perform all inspections on our system on facilities with a primary operating voltage of 69KV or greater.

I. AT INTERVALS NOT TO EXCEED SIX MONTHS

- A. Underground network transformers and network protectors

Residential Class I

Berea College Electric Utility has a budget plan available for the convenience of its residential customers who have been receiving service for a minimum of twelve months. The plan is designed to help equalize payments for electric service over a period of months, normally July through June for service rendered June through May. On the last month of the budget payment period (June) appropriate adjustments shall be made relative to any difference in the customer's total payments and actual usage billing amounts. Any resultant overpayment shall be refunded on the June bill. Any resultant underpayment shall appear on the June bill and be due with payment of such bill.

The customer's account shall be reviewed periodically and the monthly payment amount may be adjusted during the budget period because of changes in electric usage and/or approved rate changes.

It is understood that this budget billing plan will continue until the customer notifies Berea College Electric Utility in person, in writing, or by telephone to discontinue the plan or the customer defaults in payment of such plan.

To be accepted as a budget customer, the account balance must be paid in full before the customer is put on budget billing.

The budget payment plan is available beginning with the July 1980 billing.
