BEREA COLLEGE ELECTRIC  
UTILITY DEPARTMENT

RULES AND REGULATIONS

.05 Underground Policy:

The Berea College Electric Utility Department will install underground distribution lines to a residential subdivision under the following conditions: For established residential areas, and individuals paragraphs (c) through (h) apply.

(a) The subdivision being developed must consist of a tract of land which is divided into ten (10) or more lots for the construction of new residential buildings or the land on which is constructed two (2) or more new multiple occupancy buildings. (807 KAR 5:030E - Section 10).

(b) The developer or owner of subdivision shall be required to advance to the Utility an amount equal to an "estimated average cost differential" between the average or representative cost of underground distribution systems in residential subdivisions and equivalent overhead distributions systems in residential subdivisions and areas. If the amount deposited exceeds the normal charge for underground extensions, the amount in excess shall be refunded immediately after work is completed and actual cost has been established.

(c) The Utility will construct underground distribution facilities in the subdivision adequate to render single phase 120/240 volt service. All electrical devices such as transformers, switching equipment and metering devices shall be above ground.

(d) Three (3) phase primary mains or feeders required within a subdivision to supply local distribution or to serve three phase loads shall be overhead unless underground is required by governmental authorities or requested by the applicant, in either of which case the differential cost of underground shall be borne by the applicant. All primary circuits shall be encased in suitable conduit.

RULES AND REGULATIONS

(e) Developer or successor in title shall grant a right-of-way satisfactory to the Utility for the installation, operation and maintenance of its underground facilities.

(f) Point of service shall be that point where the facilities of the Utility join the customer's facilities, irrespective of the location of the meter. If the Utility installs underground cable from an easement to the residence the customer shall be required to furnish the ditch and suitable backfill for the proper installation of the service.

(g) Subject to the judgment of the Utility, the developer may be required to deposit with the Utility the entire cost of the extension. If this is done the amount deposited in excess of the normal charge for underground extensions shall be refunded to the developer over a ten year period as provided in 807 KAR 5:030E - Section 10.

(h) The cost to the developer for the underground electric distribution system shall be the actual difference in cost between standard overhead construction based on the Utility estimate) and the actual cost of the underground system in place exclusive of trenching, bedding, backfill, conduit and rock costs.

The estimated average cost differential in 1981 is one dollar and sixty cents (1.60) per lineal foot, including street crossing. The actual cost will be established on an individual project basis at the then current prices.

The average cost is based on the developer furnishing all trenching, bedding, backfill, conduit and rock costs.

BEREA COLLEGE ELECTRIC  
UTILITY DEPARTMENT

RULES AND REGULATIONS

The actual cost per lot is to be established based on current prices by dividing total lineal feet required by total number of lots.

.06 Relocation of Lines.

The Utility will cooperate with all parties in the construction, improvements, or rehabilitation of public streets and highways. It is expected that these parties will give reasonable notice to permit the Utility to relocate its lines to permit the necessary road construction. If the Utility's poles, anchors, or other appurtenances are located within the confines of the public right(s) of way, the Utility shall make the necessary relocation at its own expenses; if the Utility's poles, anchors, or other facilities are located on private property, the parties shall then be required to reimburse the Utility.

When the Utility is requested to relocate its facilities for any reason(s) provided adequate right-of-way can be obtained for the relocation requested, any expense involved will be paid by the firm, person, or persons requesting the relocation, unless one or more of the following conditions are met:

- (a) The relocation is made for the convenience of the Utility.
- (b) The relocation will result in a substantial improvement in the Utility's facilities of their location.
- (c) That the relocation is associated with other regularly scheduled conversion or construction work and can be done at the same time.
