RULES AND REGULATIONS

ADDENDUM NO. 2

OPERATING POLICY NO. 103

(T) SUBJECT: Area Coverage and Other Conditions for Providing Single-Phase Electric Service

I. Normal Service

It is the objective of Warren RECC to provide, without contribution, central station service at its basic minimum established rate schedule to all normal unserved residences and rural establishments within its service area located within 1500 feet of an existing distribution line. The service drop to the house from the distribution line at the last pole shall not be included in the foregoing measurements.

A. Any extension of Cooperative's facilities to provide permanent service shall require a minimum of twelve months' continuous service, with billing to start within thirty days after service is made available. The reconstruction of any facility where service has previously been retired because of inactive use shall be considered as a new service requiring a minimum contract of twelve months' continuous service.

B. When an extension of the Cooperative's lines to serve an applicant or group of applicants amounts to more than 1500 feet per consumer, the minimum monthly bill shall be the basic minimum of the rate schedule plus \$1 per hundred feet (rounded to the nearest 50 feet) exceeding 1500 feet per consumer served by the extension. The minimum tenure of service shall be sixty months with acceptable surety being furnished.

RULES AND REGULATIONS

II. Classified Service

(T) A. Extension of electric service for other than normal residential, farm, and small commercial use shall be provided under conditions that will not seriously jeopardize the objective of the Cooperative of providing electric service for normal service usage. Under this category are services which may be considered of questionable tenure such as oil wells, water wells, advertisement signs, barns, farms which are not regularly operated as such, and services with an abnormally low annual load factor.

Service to these consumers may be furnished under the following conditions:

1. Service may be provided without contribution if only a service drop is required.
2. If a primary extension is required, the applicant shall sign a ten-year continuous service contract and pay the estimated cost of the primary extension. (This cost excludes transformer, meter, and service.)
3. The applicant shall be refunded, over the ten-year period of the contract, the payment for primary facilities - with the annual refund being one-tenth of the total. Discontinuance of service within the ten-year period shall void further refund payments.
4. The basic monthly minimum shall apply if the transformer capacity does not exceed 25 kva. The minimum shall be increased at the rate of 50¢ per kva for transformer capacity in excess of 25 kva.

RULES AND REGULATIONS

B. Resort Residences

Service to resort residences may be provided under I-B above with the following exceptions:

1. The basic monthly minimum bill shall be \$1 per kva of required transformer capacity.
2. The tenure of service shall be ten years with acceptable surety being furnished.
3. The resort residence is defined as a residence of permanent construction not recorded as the member's legal residence for voting purposes and not occupied as the principal residence for nine months of the year.
4. Mobile homes, trailers, campers, renovated school buses and such, or buildings not conforming to recognized construction standards shall not qualify as residences of permanent construction and shall have service extensions made under II-A of this policy.

(T)

C. Resort Area Subdivision Developments

A resort area is defined as one where it is expected that a substantial portion of the usage will be of a seasonal nature and additionally where it is expected that a substantial number of the available lots will not have permanent structures thereon. The extension of service to subdivision developments in resort areas will be furnished under the following conditions:

(T)

1. The developer shall furnish a plat to the Cooperative for locations of electric facilities and shall file a plat with the County Court Clerk identifying right-of-way easements granted to the Cooperative.

RULES AND REGULATIONS

- 2. For each subdivision or section thereof to be provided with electric facilities, the Cooperative shall design and stake the lines in such a manner as to most economically serve the development. The developer shall pay the estimated cost of primary extensions to be constructed.
- 3. Service connections to primary extensions shall be made to consumers upon application for membership in the Cooperative.
- 4. Each year, for a period of not less than ten years, the Cooperative shall refund to the Developer who paid for the extension a sum equivalent to the cost of 300 feet of the extension installed for each additional residence connected during a year, provided that residence remains connected for a period of at least twelve months thereafter. In no case shall the total amount refunded exceed the amount paid to the Cooperative. After the end of the refund period from the completion of the extension, no refund will be required to be made. The Cooperative shall make refunds only during the months of January and February of each year of the refund period provided the Developer has given written notification of the refund due.

2. For each subdivision or section thereof to be provided with electric facilities, the Cooperative shall design and stake the lines in such a manner as to most economically serve the development. The developer shall pay the estimated cost of primary extensions to be constructed.
3. Service connections to primary extensions shall be made to consumers upon application for membership in the Cooperative.
4. The Developer will be refunded the payment for the extension if, within a ten-year period beginning on the date the primary extension is completed, electric service is being used by consumers with permanent residences on 50 percent of the total number of lots for which the primary was extended. Residences conforming to recognized construction standards and mobile homes with sanitary plumbing conforming with minimum requirements of the County Health Department and the Commonwealth of Kentucky shall qualify as permanent residences for refund purposes. Trailers, campers, renovated school buses and such shall not qualify as permanent residences.
