RULES AND REGULATIONS

"Shall" - is mandatory: "may" is permissive.

"Slug" - Any discharge of wastewater which in concentration of any constituent or in quantity of flow exceeds for any period of duration longer than fifteen (15) minutes more than five(5) times the average twenty-four (24) hour concentration or flow during normal operation.

"Storm Sewer" - A sewer which is intended to convey only storm waters, surface runoff, street wash waters and drainage, and which may convey unpolluted waters.

"Treatment Works" - Any devices and systems used by PPSC in the conveyance, storage, treatment, recycling and reclamation of municipal sewage or liquid industrial wastes including interceptor sewers, outfall sewers, sewage collection systems, pumping, power, and other equipment and appurtenances; extensions, improvements, remodeling, additions and alterations thereof; and any works, including the land that will be an integral part of the treatment process or is used for ultimate disposal of residues resulting from such treatment,; or any other method or system for preventing, abating, reducing, storing, treating, separating or disposing of municipal waste, including storm water runoff, or industrial waste, including waste in combined storm water and sanitary sewer systems.

SUBSTANCES NOT TO BE DISCHARGED INTO SEWERS

No substances shall be placed into the sanitary sewer system which will create a combustible, gaseous, explosive or inflammable condition nor shall any substances or objects be placed or discharged into the system which will not dissolve and which will thus cause an obstruction and clogging within the system. No petroleum products shall be placed or discharged into the system. No storm water or surface water drain shall be connected with the sanitary sewer system nor shall any storm or surface water be otherwise introduced into the system. No substance which might be harmful to the sewage treatment process or receiving stream shall be discharged in the system.

RULES AND REGULATIONS

The discharge of any wastewater into the sewer system by any person is unlawful except in compliance with the provisions set forth in this tariff, and any more stringent State or Federal Standards.

Grease, Oil and Sand Traps

The Utility may require pretreatment for certain types of discharge that could be harmful to the collection and/or treatment system. Establishments involved in the preparation of food for commercial purposes shall provide grease interceptors or traps. Grease, oil and sand interceptors or traps shall be provided by others when necessary for the proper handling of liquid wastes containing grease in excessive amounts, sand and other harmful ingredients, except that such interceptors or traps will not be required for private living quarters of dwelling units.

All interceptors or traps shall be of a type and capacity approved by the Kentucky Department for Natural Resources and Environmental Protection and Kentucky Department of Housing, Buildings and Construction, and shall be located so as to be readily and easily accessible for cleaning and inspection. They shall be constructed of impervious materials capable of withstanding abrupt and extreme changes in temperatures and shall be of substantial construction, gastight, watertight, and equipped with easily removable covers.

All grease, oil and sand interceptors or traps shall be maintained by the user at his expense, in continuously efficient operation at all times. The Utility may require an establishment to have interceptors or traps cleaned on a regular basis. The utility may reject potentially harmful wastes or may require control over the quantities and rates of discharge.

Approval of proposed facilities or equipment by the Kentucky Department of Natural Resources and Environmental Protection and Kentucky Department of Housing, Buildings and Construction, does not in any way, guarantee that these facilities or equipment will function in the manner described by their constructor or manufacturer, nor

shall it relieve a person, firm or corporation of the responsibility of enlarging or otherwise modifying such facilities to accomplish the intended purpose.

SERVICE PIPE CONNECTIONS

The Utility shall install and maintain that portion of the service pipe from the main to the boundary line of the easement, public road, or street, under which such main may be located. The Utility is not responsible for extending a service main to serve additional properties.

No unauthorized person shall uncover, make any connections with, use, alter, or disturb any public sewer. Illegal or unauthorized connections shall be terminated immediately.

A separate and independent building sewer shall be provided for every structure.

No person shall discharge or cause to be discharged any stormwater, surface water, groundwater or roof runoff to any sewer.

The customer shall install and maintain that portion of the service pipe from the end of the sewage utility's portion into the premises served. That portion of the service pipe installed and maintained by the customer shall conform to all reasonable rules of the Utility. It shall be constructed of materials approved by the sewage utility and installed under the inspection of the utility. Prior to tapping on to the sewer system, the Utility shall be notified and the appropriate tap on fee paid.

A sewer service pipe shall not be laid in the same trench with a water pipe.

If a governmental agency requires an inspection of the customer's plumbing, the Utility shall not connect the customer's service pipe until it has received notice form the inspection agency certifying that the customer's plumbing is satisfactory.
