Re: Voluntary Certification Withdrawal by Comtel Telcom Assets LP d/b/a Excel Telecommunications, VarTec Telecom, Clear Choice Communications and VarTec Solutions and Notice of Asset Sale Closing

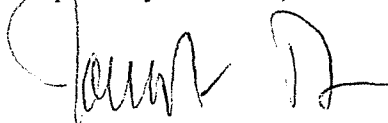

Dear Mr. Derouen:

Comtel Telcom Assets LP d/b/a Excel Telecommunications, VarTec Telecom, Clear Choice Communications and VarTec Solutions ("Comtel") hereby voluntarily withdraws its operating authorities to provide local exchange and interexchange telecommunications services within your state. By way of background for this request, Comtel entered into an asset purchase agreement ("APA") with Matrix Telecom, Inc. ("Matrix") to sell substantially all of its assets, including customers, to Matrix. The purchase and sale was ultimately consummated on July 31, 2010.

Following the consummation of the purchase and sale, Comtel no longer has an employee base, customers or other telecommunications operations in any jurisdiction. The existing customers and the associated operations were transferred to Matrix which has now stepped into Comtel's shoes to allow for a seamless transition as far as the end-user customers are concerned. All of the affected customers have been provided notice in compliance with the rules of this Commission and Federal Communications Commission, and where required, the parties have obtained the approvals of the Federal Communications Commission and State Commissions. Without impacting Matrix's operating authority, customers and/or ongoing operations, Comtel respectfully requests that your office take any steps necessary to immediately withdraw any remaining operating authority and tariffs/price lists on file for corporate entities of Comtel. As previously referenced, Matrix is now serving the customers acquired from Comtel.

Comtel sincerely appreciates your service and assistance over the years and now seek your prompt attention to this necessary request. Please direct any inquiries regarding the ongoing operations of Matrix to Leslie Ellis at leslie.ellis@excel.com or at (972) 910-1411. Acknowledgment and date of receipt of this filing are respectfully requested. Please date and file stamp the attached copy of this correspondence and return it in the enclosed pre-addressed, postage- prepaid envelope.

Respectfully submitted,

Jonathan Dennis
Senior Vice President, General Counsel, and
Secretary

If a Customer's service is restored after having been suspended and/or disconnected in accordance with this tariff but a Company service order to terminate such service has not been completed when such service is restored, the Customer may be required to pay a restoration of service charge.

When a Customer's service has been disconnected in accordance with this tariff and the service has been terminated through the completion of a Company service order, service will be re-established only upon the basis of an application for new service.

The charges in this section for the connection, move, or change of service contemplate work being performed by Company employees involved at a time when overtime wages do not apply. No distinction is made between a "New Installation and Connection" and an "Outside Move". All changes in location of Customer's equipment or service from one premises to another, are treated as new service connections with service charges applying. Service charges are in addition to other rates and charges normally applying under this tariff. 3.3 CUSTOM FEATURES

The features in this section are made available on an individual basis or as a part of feature packages. Custom features are offered on a monthly basis where facilities or interconnection arrangements are available.

- a. Anonymous Call Rejection - ACR - (*77) - Allows customers to automatically reject all calls that have been marked anonymous, unavailable, or private by the calling party. When ACR is active, the called party receives no alerting (ringing) for a call that has been rejected. The call is routed to a denial announcement and subsequently terminated.
- b. Auto Redial - Repeat Dialing - (*66) - This feature automatically redials the last outgoing number dialed by the Customer. Activation and deactivation of this feature is completed by the Customer. Repeat Dialing will attempt to call the number for a maximum of thirty (30) minutes after the feature is activated. Once the call is established, the Customer will hear a special ring when the call can be completed. NOTE: Some telephones are only capable of providing a standard ring. Customers must contact the manufacturer or distributor of their telephone set if they have any questions.

Repeat Dialing (usage sensitive) is available on a pay-per-use basis, and the functionality is the same as Repeat Dialing. Repeat Dialing (usage sensitive) will be provisioned with local service unless customer requests the feature to be blocked or it is included in a package.

- c. Call Blocking - Full Restriction (*60) - Call Blocking - Full Restriction is a central office service that restricts long distance calling. Restricted calls are directed to a central office announcement. Call Blocking - Full Restriction is activated when a one or a zero precedes a dialed number. However, calls to 800/8XX type services are not restricted, and where facilities permit, one plus calls to Company business offices and repair service are not restricted. All calls to operator services are disallowed for residence Customers.

3.3 CUSTOM FEATURES - (Continued)

- d. Call Forwarding - Permits a customer to transfer all incoming calls to another dialable telephone number. The customer pre-selects a second telephone number to which all incoming calls are to be transferred automatically. Calls may be transferred to a long distance message telecommunications point subject to the availability of the necessary facilities in the central office from which the calls are to be transferred. Call Forwarding shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment in whole or in part, of message toll charges that would regularly be applicable between the access line originating the call and the access line to which the call is transferred. Customers utilizing Call Forwarding service are responsible for the payment of charges for each toll call between the customer's access line and the distant access line to which the call was transferred.
- e. Call Forwarding - (Busy Line) - automatically reroutes an incoming call to a customer predesignated number when the called number is busy.
- f. Call Forwarding - (No Answer) - automatically reroutes an incoming call to a customer predesignated number when the called number does not answer within the number of rings programmed by the Company.
- g. Call Forwarding - (Busy Line/No Answer) - provides for the automatic routing of incoming calls to a preselected telephone number when the called telephone number is busy and/or does not answer within a determined number of rings. When Call Forwarding service is provisioned in a central office, the pre-selected forwarded telephone number must be within the same central office control group. No assurance can be given that transmission will be fully satisfactory during Call Forwarding service calls.
- h. Call Forwarding - (Remote Access To) - Remote Access to Call Forwarding provides the Customer that is a subscriber of a Call Forwarding service with the ability to activate, deactivate or change Call Forwarding designations from a remote location. This service can only be accessed from a Dual Tone Multi-Frequency (DTMF) equipped telephone which has a full set of characters including "*" and "#". All charges incurred to access the remote number will be billed appropriately. The transmission may not meet normal standards depending upon the distance and routing necessary.

3.3 CUSTOM FEATURES - (Continued)

- i. Call Forwarding - (Selective) - Selective Call Forwarding provides the Customer with the ability to forward incoming calls from pre-selected telephone numbers to another telephone number. The Customer can construct or modify a telephone number screening list. Incoming calls will be screened against the Customer's list and only those telephone calls from telephone numbers on the list will be forwarded. The Selective Call Forwarding Customer is responsible for the payment of charges (i.e., toll charges) for each call between the Selective Call Forwarding equipped telephone line and the line to which the call is being forwarded. Calls from numbers not on the list will receive standard call completion. The Customer must also subscribe to the Call Forwarding feature.

Subscribers to Selective Call Forwarding activate the service and construct or modify the screening list by dialing *63 and following the prompts. This service may be temporarily deactivated by dialing *83.

- j. Call Return - (*69) - This feature allows the Customer to automatically return the most recent incoming call, even if it is not answered. If the telephone number is busy, Call Return will attempt to call the number for a maximum of thirty (30) minutes after the feature is activated. Once the call is established, the Customer will hear a special ring when the call can be completed. This is accomplished by the Customer activating a code. NOTE: Some telephones are only capable of providing a standard ring. Customers must contact the manufacturer or distributor of their telephone set if they have any questions. The operability of this call back feature is dependent upon whether the caller's originating telephone number can be recognized, or not.

Call Return (usage sensitive) is available on a pay per use basis and the functionality is the same as Call Return. Call Return (usage sensitive) will be provisioned with local service unless customer requests the feature to be blocked or it is included in a package.

3.3 CUSTOM FEATURES - (Continued)

- k. Call Trace - (Customer Originated) - Allows a customer to request an automatic trace of the last incoming call. This provides an easy way to trace obscene, threatening or harassing calls. A Call Trace may be activated at any time during or immediately following the call to be traced. The incoming call detail recorded by the Company showing the results of the trace (i.e., telephone number traced) will not be released to the customer. Such call detail shall be provided only to law enforcement authorities upon request. A trace cannot be successfully completed if the incoming call originates in a telephone central office not equipped for Call Trace Service.

At its option or upon receipt of a proper request from a law enforcement agency, the Company will set up a temporary tracing arrangement using Call Tracing at no charge to the customer when in the judgment of the Company or law enforcement agency, the unwanted call(s) present a serious threat of harm or destruction of property.

- l. Call Waiting - This feature provides a tone signal that alerts the Customer talking on the line when a second call is incoming. A maximum of two calls may be in process at one time. A Customer who subscribes to Call Waiting can also inhibit the reception of the Call Waiting tone for the duration of a single call, preventing interruption of the call by activating the code (*70) to cancel Call Waiting. This functionality is automatically included with the Call Waiting feature at no additional cost to the Customer.
- m. Call Waiting ID (With Name and Number) - Call Waiting ID with Name and Number is an enhanced version of Call Waiting ID. It is designed for use by a Call Waiting subscriber. A customer who is off-hook on an existing call, is able to receive the telephone number of a new incoming call on their customer-provided premise equipment attached to the Customer's subscriber line. Additionally, the name found in the Company's records, applicable to the line originating the call, including the non-published and non-listed service is displayed on customer-provided premise equipment. The Customer must purchase the equipment separately, and it is not available under this tariff.

o. Three-Way Calling - Enables a customer to add a third party on an existing call without operator assistance, thereby establishing a three-way conversation. The transmission quality may vary depending on the distance and routing necessary and may not necessarily meet normal standards.

Three-Way Calling (usage sensitive) is available on a pay per use basis and the functionality is the same as Three-Way Calling. Three-Way Calling (usage sensitive) will be provisioned with local service unless customer requests the feature to be blocked or it is included in a package.

p. Caller ID - (Number Only) - This feature automatically displays a caller's telephone number, including non-published and non-listed service on a customer provided display unit. The customer must purchase the equipment separately, and it is not available under this tariff.

r. Caller ID - Name and Number Blocking Per Line - (*67) - Any Company calling party may prevent the delivery of Calling Party Number and Calling Party Name to the called party by dialing an access code (*67 on their touch-tone pad or 1367 from a rotary telephone) immediately prior to placing a call. - s. Priority Call (*61) - This feature permits the Customer to preselect telephone numbers that can be given a distinctive alerting signal or ring. The Customer can create or change a list of telephone numbers by dialing an activation code. NOTE: Some telephones are only capable of providing a standard ring. Customers must contact the manufacturer or distributor of their telephone set if they have any questions.

- t. Distinctive Ring - Distinctive Ring allows a Customer to establish up to two telephone numbers on the same access line and to distinguish calls to each number by distinctive ringing patterns. The standard ringing pattern applies to the billing telephone number, while the dependent telephone number receives a distinctive ringing pattern for incoming calls. Distinctive Ring is available to single line residential customers where facilities are available.

When a Distinctive Ring Customer also subscribes to Call Waiting, incoming calls to the billing telephone number will activate the standard Call Waiting tone. Calls to dependent telephone number will activate a distinctive Call Waiting tone. When a Distinctive Ring Customer subscribes to any Call Forwarding service, the dependent telephone number may be forwarded to the same number as the billing telephone number or receive no forwarding treatment.

- b. the Customer's location requires the use of costly private right-of-way; and
- c. the proposed service is of a temporary nature, and the plant to be placed would not be useful to the Company in the general conduct of its business after that service was discontinued.

7.1.2 Customer Requirements

- a. Temporary Construction - The Customer shall be charged the estimated cost of construction and removal of the plant which would not be of value to the Company, less the estimated net recovery value of the material used. The Company may require the Customer to pay the cost of construction plus the cost of removal, less salvage, for temporary construction performed in advance of permanent construction or to provide temporary service.
- b. The Company shall retain title (if applicable) to all plant constructed, as specified within this tariff, provided wholly or partially at a Customer's expense.
- c. When attachments are made to poles of other companies, instead of providing construction for which the Customer would be charged under the provisions of this section, the Customer shall pay the other company's cost for such attachments.
- d. The Customer is required to pay the construction charges made by another telephone company providing facilities to connect with the facilities of the Company.

7.3.4 Service to Residential and Commercial Developments

The construction charges, allowances and provisions previously specified in this Section contemplate the extension of facilities into areas of normal growth and development. Where facilities are to be extended into new areas of residential or commercial real estate development which, in the Company's opinion, are of a promotional or speculative nature, the Company may require an advance deposit equal to all or a portion of the costs of such construction, depending on the circumstances in each case. This advance deposit will be payable prior to the start of construction.

- a. The Company and the developer may enter into a contractual agreement that provides for the periodic refund of portions of the deposit as Customers in the development receive telephone service, and other terms of the contract are met. The contract will specify the estimated number of telephone customers expected to receive service within the area and the time required to complete the project (not to exceed five years). The contract will provide that the construction charge be recomputed to reflect regular tariff allowances, design changes made by the developer, damage to telephone facilities by persons other than Company employees or agents or unusual construction requirements. Periodic refunds to the developer will be adjusted accordingly.
- b. The Customer for telephone service to a development is required to provide the Company, at his own expense, the necessary easements for installation and maintenance of telephone facilities, clear the ground where facilities are to be installed according to Company specifications and request installation of telephone facilities at an appropriate time during construction of the project to avoid unnecessary costs to the Company.
