Dear Mr. Cline,

Due to an administrative oversight, we have found paperwork from yourselves dating back to December 2012. We are presuming that the necessary report was filed online as there seems to be no more recent contact.

However, we enclose a zero revenue report and also request that we be removed from the register in Kentucky please. We have no customers and are not doing any business there.

Thanking you,

Sincerely,

*SPM Connors*

## SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

## 3.2 Calculation of Distance

Usage charges for mileage sensitive services vary based on the type of service subscribed to by the Customer. For services utilizing switched access, mileage measurements for rate schedules are based on the distance in airline miles between rate centers associated with the originating and terminating stations. For services utilizing dedicated access, mileage measurements for rate schedules are based on the distance in airline miles between the LDC network access point associated with the station utilizing Dedicated Access Origination/Termination and the rate center associated with the called/calling station.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by BellCore (Bell Communications Research), in the following manner:

- Step 1: Obtain the "V" and "H" coordinates for the serving wire center or network access point serving the Customer's location and the called/calling station.
- Step 2: Obtain the difference between the "V" coordinates. Obtain the difference between the "H" coordinates.
- Step 3: Square the differences obtained in Step 2.
- Step 4: Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5: Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6: Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating locations of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

SECTION 3 - DESCRIPTION OF SERVICE, (CONT'D.)

3.3 Timing of Calls

3.3.1 Long distance usage charges are based on the actual usage of LDC's network. Chargeable time begins when a connection is established between the calling station and the called station. Chargeable time ends when either party "hangs up" thereby releasing the network connection.

3.3.2 Unless otherwise specified in this tariff the minimum call duration and rounding of calls for measurement and billing purposes is one minute.

3.4 Time-of-Day Rate Periods

Unless otherwise indicated elsewhere in this tariff, all usage-based rates in this tariff are subject to the following time-of-day, day-of-week, and holiday rate periods:

3.4.1 Day Rate Period - Applies to that portion of a call occurring from 8:00 AM to, but not including, 5:00 PM Monday through Friday.

3.4.2 Evening Rate Period - Applies to that portion of a call occurring from 5:00 PM to, but not including, 11:00 PM all days, unless a lower rate would normally apply.

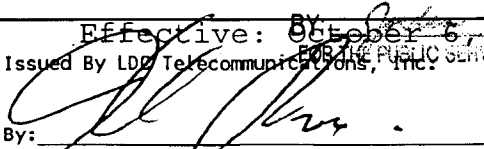

3.4.3 Night and Weekend Rate Period - Applies to that portion of a call occurring from 11:00 PM to, but not including 8:00 the following morning, all days; all day on Saturday and Sunday from 8:00 AM to, but not including 5:00 PM.

3.4.4 When a call is established in one rate period and ends in another rate period, the rate in effect at the calling station applies to the portion of the call occurring within that rate period. When a unit of time is split between two rate periods, the rate applicable to that unit of time is based on the rate period in which it began.
