### TARIFF FORMAT

- A. Sheet Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially by section. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Kentucky PSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to the next higher level:
- 2
  - 2.1
  - 2.1.1
  - 2.1.1.A
  - 2.1.1.A.1
  - 2.1.1.A.1.(a)
  - 2.1.1.A.1.(a).I
  - 2.1.1.A.1.(a).I.(i)
  - 2.1.1.A.1.(a).I.(i).1
- D. Check Sheets** - When a tariff filing is made with the Kentucky Public Service Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on the check sheet if these are the only changes made (i.e., the format, etc. remain the same, just revised revision levels on some pages. The tariff user should refer to the latest Check Sheet to determine if a particular sheet within the tariff is the most current on file with the PSC.

**2.2 Caller ID Language**

Line blocking for the delivery of the calling name and/or number is available upon request, at no charge, to the following entities and their employees/volunteers, for lines over which the official business of the agency is conducted including those at the residence of employees/volunteers, where an executive officer of the agency registers with the telephone company a need for blocking: (a) private, nonprofit, tax-exempt, domestic violence intervention agencies and (b) federal, state and local law enforcement agencies. Line blocking Customers can unblock their calling name and/or number information on a per call basis, at no charge, by dialing an access code (\*82 on their Touch-Tone pad or 1182 from a rotary phone) immediately prior to placing a call.

A Customer may prevent the delivery of their calling name and/or number to the called party by dialing an access code (\*67 on their Touch-Tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code will activate per call blocking, which is available at no charge. If the calling party activates blocking, the name and/or number will not be transmitted across the line to the called party. Instead, Caller ID Customers will receive an anonymous indicator. This anonymous indicator notifies the Caller ID Customer that the calling party has elected to block the delivery of their name and telephone. The blocking of Calling Party Number (CPN) will not be provided on calls originating from Customer-Owned Pay Telephone Service. If the Caller ID Customer also subscribes to Anonymous Call Rejection, the calling party will be routed to a telephone company recording advising the caller that the called party will not accept calls whose CPN has been blocked.

Any Customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the Customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the Customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

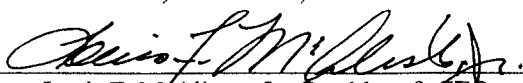

The Company shall not be liable for any claims for damages caused or claimed to have been caused, directly, by the transmission to a Caller ID Customer of a name or telephone number which the calling party of the Caller ID Customer finds erroneous, offensive, embarrassing, or misleading for any reason, including but not limited to the way in which the calling party's name has been abbreviated.

Telephone CPN information transmitted via Caller ID is intended solely for the use of the Caller ID subscriber. Resale of this information is prohibited by this tariff. CPN will be displayed for calls made from another central office only if it is linked by appropriate facilities. Caller ID is not available on operator-handled calls.

**6.3 Two-Point Service**

6.3.1 Service Between Land Wire Telephones

A. Classes of Service

Service is offered to residential and business customers on a Station-to-Station or Person-to-Person basis. The Station-to-Station class of service is furnished on a Customer Dialed Calling Card basis, an Operator Handled basis, or on a Direct Distance Dialing basis.

1. Dial Station-to-Station rates apply to sent-paid, station-to-station dial type communication.
  - a. Dial type telephone communication denotes calls dialed and completed by a customer from a telephone without operator assistance and the call billed to the originating number. Operator services will not be used with call completion or in furnishing information or assistance related to billing or charges for such call, but will:
    - (1) Reestablish a call which has been interrupted after the called number has been reached or,
    - (2) Reach a called telephone number where facilities are not available for dial completion.
    - (3) Record the originating telephone number where no automatic recording equipment is available.
    - (4) Place a call for a calling party who identifies himself as being handicapped and unable to dial the call because of his handicap.
    - (5) Assist in call completion between hearing or speech impaired customers who use Telecommunications Devices for the Deaf (TDD) and ordinary telephone users.
  - b. Dial Station-to-Station rates do not apply on calls ~~originating from~~ <sup>PUBLIC SERVICE COMMISSION</sup> a pay telephone <sup>EFFECTIVE</sup>

2. Operator Station-to-Station and Person-to-Person

- a. Operator Handled Station-to-Station rates apply to station-to-station telephone communication where the completion of the call or a request for any information or assistance relating to billing or charges for such call requires the assistance of an operator, except for operator services used in connection with dial type telephone communication as noted above. Operator Handled Station-to-Station calls include station-to-station calls placed from a pay telephone.
- b. Person-to-Person rates apply where the person originating the call specifies to the operator a particular person to be reached, a particular mobile station to be reached through a miscellaneous Common Carrier attendant, or a particular station, department, or office to be reached through a PBX or Centrex Type Service.
- c. Customer Dialed Calling Card rates apply to station-to-station telephone communications where the person originating the call dials and completes the call without assistance of an operator, except that an operator will record the Company credit card number; or where the operator reaches the called telephone number where facilities are not available for dial completion. Customer Dialed Calling Card rates also apply when the person originating the call uses a Telecommunications Device for the Deaf (TDD) to originate or receive calls to or from users of ordinary telephones through an Operator at the Kentucky Relay Center. Calls through the Kentucky Relay Center may be billed only to a Kentucky Calling Card number.

B. Rating of Calls

1. Rates are quoted in terms of initial and additional periods.
  - a. The rates for this service are as specified in E following.
  - b. The basic rate for all classes of service is shown in E below. For day calls, total fractional amounts will be rounded down to the lower cents. Additional charges shown under E below should be added to the basic rate for all Operator Station and Person classes of service.

C. Timing of Messages

1. On station-to-station calls, chargeable time begins when connection is established between the calling station and the called telephone or PBX system.
2. On person-to-person calls, chargeable time begins when connection is established between the calling person and the particular person or station specified or agreed upon.
3. Chargeable time ends when the calling station "hangs up" thereby releasing the network connection. If the called station "hangs up" but the calling station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the operator.
4. Chargeable time does not include time lost because of faults or defects in the service.

**SECTION 7 – ACCESS RECOVERY SURCHARGE**

**7.1 Description**

The Access Recovery Surcharge (ARS) is not a tax or charge imposed by a government entity. This fee is used to recover materially increased Navigator Telecommunications’ costs resulting from regulatory changes adopted by the Federal Communications Commission in the *Matter of Unbundled Access to Network Elements and Review of the Unbundling Obligations of Incumbent Local Exchange Carriers*, (CC Docket 01-338 and WC Docket 04-313). Specifically, the charge will offset recent increases in Navigator’s costs of gaining access to incumbent networks. The ARS is not a fixed monthly recurring charge. Rather, the ARS is a percentage of the customer bill based on the total monthly recurring charges (MRCs), less any taxes or surcharges. The ARS is calculated by application of a percentage to each customer’s total monthly recurring charges incurred in the previous calendar month. The ARS percentage to be applied will be determined by the customer’s total MRCs on its monthly invoice for the previous month, based on the schedule outlined below.
