3.5 Public Telephone Surcharge

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all interstate, intrastate and international calls that originate from any domestic pay telephone used to access the Company's services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with the Company's service, applies for the use of the instrument used to access The Company service and is unrelated to the Company service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (i.e., using the "#" symbol).

Whenever possible, and when applicable, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call. The Company reserves the right to waive this charge on one or more of its card offerings when the call is made from a Phone Debit Services pay telephone.

3.6 Debit Card Service

Debit Card Service allows Customers to place calls from locations other than their normal place of business or residence. Customers dial an access code and identification code in addition to the called number. Customers may choose from a variety of card denominations. Service is paid for in advance of actual usage. Charges for the service are deducted from the available balance on the prepaid debit card. Cards may be purchased in various denominations of dollars or minutes.

Debit Card Service is offered to organizations or commercial entities for distribution to their members, patrons or customers. The marketing vehicle and expiration period is selected by the organization or commercial entity upon joint agreement with the Company. The organization or commercial entity is responsible for obtaining all necessary permissions for the use of any trade mark, trade name, service mark or other image on the card. The Company reserves the right to approve or reject any image and to specify the Customer information language and use of the Company's trade mark, trade name, service mark or other image on the card. The organization or commercial entity may distribute the Company's debit cards at reduced rates or free of charge to end users.

Customers purchase a Debit Card which assigns each Customer a Debit Account, provides each Customer with a PIN and lists instructions for accessing and using the Company's service.

The Company's system informs the Customer of the Available Usage Balance remaining in the Debit Account and prompts the Customer to place a call by entering a destination telephone number. Network usage for calls placed is deducted from the Available Usage Balance in the Customer's Debit Account on a real time basis as the call progresses.

For debiting purposes, call timing is rounded up to the nearest one (1) minute increment after an initial minimum period of one (1) minute. Usage charges are computed and rounded up to the nearest penny on a per call basis.
