TARIFF FORMAT

- A. Sheet Numbering: Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially; however, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between pages 11 and 12 would be 11.1.
- B. Sheet Revision Numbers: Revision numbers also appear in the upper right corner of each sheet where applicable. These numbers are used to indicate the most current page version on file with the Commission. For example, 4th Revised Sheet 13 cancels 3rd Revised Sheet 13. Consult the Check Sheet for the sheets currently in effect.
- C. Paragraph Numbering Sequence: There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1
 - 2.1.1
 - 2.1.1.A
 - 2.1.1.A.1
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).I
 - 2.1.1.A.1.(a).I.(i)
 - 2.1.1.A.1.(a).I.(i).I
- D. Check Sheets: When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross reference to the current Revision Number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this sheet if these are the only changes made to it (*i.e.*; the format, etc. remains the same, just revised revision levels on some sheets). The tariff user should refer to the latest Check Sheet to find out if a particular sheet is the most current on Commission file.

SECTION 3 – DESCRIPTION OF SERVICE

3.1. Computation of Charges

The total monthly charge for basic local service, with additional charges for custom calling features when applicable, is a fixed monthly amount and entitles subscribers to an unlimited number of calls to all exchange access lines within the local calling area.

3.2. Timing of Calls

The customer's long distance usage charge is based on the actual usage of the Company's network. Usage begins when the called party picks up the receiver. A call is terminated when the switch determines the calling party hangs up.

3.3. Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call. The airline mileage between rate centers is determined by applying the formula below to the vertical and horizontal coordinates associated with the rate centers involved. The Company uses the rate centers and associated vertical and horizontal coordinates that are published in the Local Exchange Routing Guide by Telcordia.

How Your Charges are Billed

Your bill includes two types of service charges:

1. Regulated Service Charges – Charges for basic telephone service such as dial tone line and local usage, local exchange services such as Call Waiting and Call Forwarding, Federal Subscriber Line Charge, Federal Universal Service Fund Surcharge, and associated services and installation charges that are regulated by the State Corporation Commission. Failure to fully pay these charges as well as the charge for basic bundled service may result in the disconnection of the service and/or your dial tone.
2. Non-Regulated Charges – Charges for services such as Long Distance Toll, Voice Mail, Broadband services, DirecTV, and other services not regulated by the State Corporation Commission.

	Past Due Balances	Current Charges	Totals
Regulated	.00*	.00	.00
Non-Regulated	.00	.00	.00
Totals			

* State regulations require WT OIL PARTNERS LLC to identify which charges you must pay to ensure that your basic local telephone service is not suspended. To avoid suspension of your telephone services, you must pay any past due balances immediately.

Your local exchange services, including basic telephone service or a basic bundle may not be disconnected for failure to pay other services such as Caller ID or Voice Mail. However, nonpayment of such services may result in their disconnection and the loss of any stored messages.
