RULES AND REGULATIONS

.05 Governing the Supplying of Electric Service Underground.

1. General: The Company will, upon applicant's request, install facilities to supply electric service underground, provided the requested underground service is, in Company's judgement, practical, feasible, and in accordance with good operating practice. In addition, the applicant must reimburse the Company an amount equal to the difference in cost between the requested underground and equivalent overhead service facilities. The Company will calculate the cost difference for each installation and that amount shall be due and payable before construction is begun. Upon agreement by both parties, if the applicant should choose to perform all necessary trenching and backfilling, per Company's specifications, which includes installation of conduits under streets and passageways as required, the Company shall credit the applicant's cost in an amount equal to the Company's cost for trenching, backfilling and conduit.

The point of delivery to an individual premise or load shall be at a point on such premise as designated by the Company. The applicant/customer will provide, own, operate and maintain all electric facilities on the load side of the point of delivery with the exception of Company's meter for which suitable provisions shall be made by the applicant/customer in accordance with the Company's General Rules.

2. New Residential Subdivisions: Installations and service shall be provided in accordance with the preceding "General" section and 807 KAR 5:041 (Electric), Section 21, except the Company shall calculate the "average cost differential" per foot for each subdivision rather than file an "estimated average cost differential" annually. The individual services in a new subdivision shall be provided in accordance with Paragraph No. 3; Individual Residential Services.

RULES AND REGULATIONS

3. Individual Residential Services: Installation and service shall be provided in accordance with the preceding "General" section except the applicant will pay to the Company \$0.47 per foot of service trench length for installing the service cable, excluding trenching and backfilling, which shall be due and payable with the application for service. The above specified \$0.47 per foot cost is subject to change upon Company's annual filing with the Commission.

RULES AND REGULATIONS

(D)

.06 Relocation of Lines.

The Utility will cooperate with all parties in the construction, improvements, or rehabilitation of public streets and highways. It is expected that these parties will give reasonable notice to permit the Utility to relocate its lines to permit the necessary road construction. If the Utility's poles, anchors, or other appurtenances are located within the confines of the public right(s) of way, the Utility shall make the necessary relocation at its own expenses; if the Utility's poles, anchors, or other facilities are located on private property, the parties shall then be required to reimburse the Utility.

When the Utility is requested to relocate its facilities for any reason(s) provided adequate right-of-way can be obtained for the relocation requested, any expense involved will be paid by the firm, person, or persons requesting the relocation, unless one or more of the following conditions are met:

- (a) The relocation is made for the convenience of the Utility.
- (b) The relocation will result in a substantial improvement in the Utility's facilities of their location.
- (c) That the relocation is associated with other regularly scheduled conversion or construction work and can be done at the same time.
