5.260¢
4.415¢
3.883¢

MINIMUM CHARGE

The minimum monthly charge shall be the facilities charge.

FUEL ADJUSTMENT CHARGE

The energy charge in any month shall be increased or decreased by a fuel adjustment charge according to the following formula:

$$\frac{F^1}{P} = \text{rate applicable to each KWH sold}$$

Where F^1 is the aggregate charge from the Corporation's wholesale power supplier for fuel adjustment, less any credit for inter-system power sales, in the Corporation's wholesale power contract; where P is the total KWH purchased, less line losses equal to a twelve-month moving average not to exceed ten percent (10%). The rate resulting from this formula shall be applied to each kilowatt hour sold in the current month and each KWH attributable to company use in the current month.

DATE OF ISSUE June 17, 1982

DATE EFFECTIVE June 1, 1982

ISSUED BY Dean Stanley
Name of Officer

TITLE General Manager

Issued by authority of an Order of the Kentucky Public Service Commission in Case Number 8252 dated June 1, 1982.

GREEN RIVER ELECTRIC CORPORATION
OWENSBORO, KENTUCKY

CLASSIFICATION OF SERVICE		RATE PER UNIT
Three-Phase Demand - Commercial, Large Power & Public Buildings		
<u>APPLICABLE</u>		
Service area in Daviess, Hancock, Hopkins, McLean, Ohio, Henderson, Webster, Breckinridge, and Muhlenberg Counties.		
<u>AVAILABILITY OF SERVICE</u>		
Available to consumers served by Green River Electric Corporation located on or near its three-phase lines.		
<u>MONTHLY RATE</u>		
Facilities Charge		\$16.90
I	Plus Demand Charge of: per KW of billing demand	\$4.00
T & I	Plus Energy Charges of: per KWH consumed	3.888¢
<u>DETERMINATION OF BILLING DEMAND</u>		
The billing demand shall be the maximum kilowatt load used by the consumer for any period of fifteen (15) consecutive minutes during the month for which the bill is rendered as indicated or recorded by a demand meter.		
<u>POWER FACTOR ADJUSTMENT</u>		
The consumer agrees to maintain unity power factor as near as practical. Demand charges will be adjusted for consumers with 50 KW or more measured demand, to correct for power factors lower than 90% and may be so adjusted for other consumers if and when the seller deems necessary. Such adjustments will be made by increasing the measured demand 1% for each 1% by which the lowest power factor established during the month is less than 90% lagging.
