TARIFF FORMAT

- A. Page Numbering** - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Page Revision Numbers** -Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the Commission. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc., the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence** -There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets** - When a tariff filing is made with the Commission, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the sheets contained in the tariff, with a cross-reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages). The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the Commission.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)**2.10 Taxes and Fees, (Cont'd.)****2.10.2 (Cont'd.)****A. Public Telephone Surcharge**

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all interstate, intrastate and international calls that originate from any domestic pay telephone used to access the Company's services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with the Company's service, applies for the use of the instrument used to access the Company service and is unrelated to the Company's service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (i.e., using the "#" symbol).

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

SECTION 2 - RULES AND REGULATIONS, (CONT'D.)**2.14 Credit Allowances for Interruption of Service**

- 2.14.1** Credit allowances for interruptions of service of more than two (2) hours which are not due to the Company's testing or adjusting, to the negligence of the Customer, or to the failure of channels, equipment and/or communications systems provided by the Customer, are subject to the general liability provisions set forth in this tariff. No credit is issued for outages less than two hours in duration.
- 2.14.2** It shall be the obligation of the Customer to notify the Company immediately of any interruption in service for which a credit allowance is desired by the Customer. Before giving such notice, the Customer shall ascertain that the trouble is not within his or her control, or is not in wiring or equipment, if any furnished by the Customer and connected to the Company's terminal.
- 2.14.3** Interruptions caused by Customer-provided or Company-provided automatic dialing equipment are not deemed an interruption of service as defined herein since the Customer has the option of using a long distance service via LEC access.
- 2.14.4** Cellular (wireless) transmission is subject to interruptions including but not limited to, dropped calls, interrupted calls, unintelligible calls, one way audio and other problems created by factors beyond Dancris' ability to control. Therefore, under no circumstances will Dancris provide credit or payment of any kind for calls which experience problems related to cellular (wireless) transmissions.
- 2.14.5** For purposes of credit computation every month shall be considered to have seven hundred and twenty (720) hours. For services with a monthly recurring charge, no credit shall be allowed for an interruption of continuous duration of less than two (2) hours. The Customer shall be credited for an interruption of two (2) or more hours at the rate of 1/720th of the monthly charge for the services affected for each hour that the interruption continues. The formula used for computation of credits is as follows:
- Credit = $A/720 \times B$
- A = outage time in hours (must be 2 or more)
B = total monthly recurring charge for affected service.
- 2.14.6** For usage sensitive long distance services, credits will be limited to, at maximum, the price of the Initial Period of the individual call that was interrupted plus any per call charges or surcharges required to reconnect the caller.

2.15.1 Where the Company permits the Customer to cancel an application for service prior to the start of installation of service or prior to any special construction, no charges will be imposed.

2.15.2 Where, prior to cancellation by the Customer, the Company incurs any expenses in installing the service or in preparing to install the service that it otherwise would not have incurred, a charge equal to the costs the Company incurred, less net salvage, shall apply, but in no case shall this charge exceed the sum of the charge for the minimum period of services ordered, including installation charges, and all charges others levy against the Company that would have been chargeable to the Customer had service begun.

2.15.3 Where the Company incurs any expense in connection with special construction, or where special arrangements of facilities or equipment have begun, before the Company receives a cancellation notice, a charge equal to the costs incurred, less net salvage, may apply. In such cases, the charge, unless otherwise specified in this tariff, will be based on such elements as the cost of the equipment, facilities, and material, the cost of installation, engineering, labor, and supervision, general and administrative expense, other disbursements, depreciation, maintenance, taxes, provision for return on investment, and any other costs associated with the special construction or arrangements.

3.2 Timing of Calls

Billing for calls placed over the Dancris network is based in part on the duration of the call as follows, unless otherwise specified in this tariff:

- 3.2.1** Timing for all calls other than Collect or Person-to-Person begins when the called party answers the call (i.e. when two way communications are established). Answer detection is based on standard industry answer detection methods, including hardware and software answer detection. For Collect calls, call timing begins when the called party agrees to accept charges for the call. For Person-to-Person calls, call timing begins when two-way communications are established between the designated party or station and the calling party, or when the caller agrees to speak with a substitute party.

3.3 Rate Periods

Unless otherwise specified in this tariff, the following rate periods apply to all services subject to time of day discounts:

	MON	TUES	WED	THUR	FRI	SAT	SUN

When the connection is established in one rate period and ends in another, the rate for each rate period applies to the portion of the call occurring within that rate period. In the event that an initial or incremental period of use is split between two rate periods, the rate in effect at the start of that period applies.

SECTION 3 - SERVICE DESCRIPTIONS, (CONT'D.)**3.4 Calculation of Distance**

Usage charges for all mileage-sensitive products are based on the airline distance between serving wire centers associated with the originating and terminating points of the call. The serving wire centers of a call are determined by the area codes and exchanges of the origination and destination points.

The distance between the wire center of the originating location and that of the destination point is calculated by using the vertical ("V") and horizontal ("H") coordinates found in Bellcore's V&H Tape and NECA FCC Tariff No. 4. The following steps describe the procedure for calculating mileage distances:

- Step 1:** Obtain the "V" and "H" coordinates for the serving wire center of the Customer's switch and the destination point.
- Step 2:** Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3:** Square the differences obtained in Step 2.
- Step 4:** Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5:** Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6:** Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

Formula:

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$
