TARIFF FORMAT

- A. Page numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the Tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the Commission. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. the Commission follows in their tariff approval process, the most current page number on file with the Commission is not always the Tariff page in effect.
- C. Paragraph Numbering Sequence** - There are various levels of alphanumeric coding. Each level of coding is subservient to its next higher level. The following is an example of the numbering sequence suggested for use in tariffs.
- 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1
 - 2.1.1.A.1.(a)
 - 2.1.1.A.1.(a).1
 - 2.1.1.A.1.(a).1.(i)
 - 2.1.1.A.1.(a).1.(i)(1)
- D. Check Sheet** - When a tariff filing is made with the Commission, an undated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is updated to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on the check sheet if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular page is the most current on file with the Commission.

In the case of a cash deposit, simple interest per annum pursuant to the rules and regulations of the K.P.S.C. shall be credited or paid to the Customer while the deposit is held by the Company. A. Public Telephone Surcharge

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all interstate, intrastate and international calls that originate from any domestic pay telephone used to access the Company's services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with the Company's service, applies for the use of the instrument used to access the Company's service and is unrelated to the service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and other interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (i.e., using the "#" symbol).

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

3.3 Calculation of Distance

Usage charges for mileage sensitive products are based on the airline distance between the serving wire center locations associated with the originating and terminating points of the call.

The distance between the originating and terminating points is calculated by using the "V" and "H" coordinates of the serving wire centers as defined by BellCore (Bell Communications Research), in the following manner:

- Step 1:** Obtain the "V" and "H" coordinates for the serving wire center of the Customer's switch and the destination point.
- Step 2:** Obtain the difference between the "V" coordinates of each of the Rate Centers. Obtain the Difference between the "H" coordinates.
- Step 3:** Square the differences obtained in Step 2.
- Step 4:** Add the squares of the "V" difference and "H" difference obtained in Step 3.
- Step 5:** Divide the sum of the square obtained in Step 4 by ten (10). Round to the next higher whole number if any fraction results from the division.
- Step 6:** Obtain the square root of the whole number obtained in Step 5. Round to the next higher whole number if any fraction is obtained. This is the distance between the originating and terminating serving wire centers of the call.

$$\sqrt{\frac{(V_1 - V_2)^2 + (H_1 - H_2)^2}{10}}$$

3.10 Roundtable Conference Services

A. General

Roundtable Conference Services are available to Customers who wish to hold telephonic meetings with multiple voice or video connections simultaneously.

B. Roundtable Audio Conference Calling Service

Roundtable Audio Conference Calling Service provides the Customer with the ability to hold a conference with multiple participants via telephone. The Customer makes a reservation specifying the conference bridge time (or periods of time) and number of lines required. Additional Conference Calling Features may be requested at that time (as listed below). The Conference Call may be selected as either automated or attended. The Company provides the Customer with a Conference telephone number and a security code when the Customer makes the Conference Call reservation. The Customer may select between using a toll or a toll-free method of access. At the scheduled date and time, each participant dials the designated dial-in number. Participants will be prompted to enter the conference security code using a touch-tone phone, or provide the host name and company name to the operator. Once the security code is entered, the caller is added to the Conference. Tones will indicate entrances to/exits from the Conference once it is underway. If a toll call access method is selected, each Conference participant will be billed by their designated toll carrier for transmission into the teleconference bridge.

My Call Conferencing Service provides the Customer with a permanent dial-in number and passcode which can be used twenty-four hours a day, seven days a week, without intervention by an attendant or administrator. The Customer may contact a Conference Attendant during any Conference Call to use enhanced features or to answer questions.

3.21 Virtual VoIP Prepaid Calling Card Service

(N)

3.21.1 General

Lightyear Virtual VoIP Prepaid Calling Card Services (the "Card") allows Users to place calls from locations other than their normal place of business, or residence. The User dials either a local access number or a toll-free number, and an automated voice prompt will instruct the User to enter the card number. After validation of the card number, the automated voice prompt will instruct the User to enter a 4-digit pin number. The voice prompt will inform the User of the dollar amount remaining on the card. After the User dials the number, the automated voice prompt will then announce the number of minutes remaining on the card based on the location of the number dialed. Other features and services can be accessed by pressing the "*" key.

With one minute remaining before the card expires, the User will hear an automated warning announcement. With 30 seconds remaining before the card expires the User will hear another automated warning announcement before the call is terminated.

The Card is also available for interstate and international calling.

The User is responsible for maintaining the confidentiality and security of the User's account number (sometimes called a PIN) and/or password. The User is responsible for all uses of the account, whether or not actually or expressly authorized. Any unauthorized access of the User's Lightyear account that is the result of the User's negligent handling of any Lightyear account number or password is expressly the liability of the User.

The User will not be reimbursed if the Card is used fraudulently or without the User's permission. Users should notify Lightyear immediately, in writing, by electronic mail or by calling the Lightyear User support line, if the Card is stolen or if the User becomes aware at any time that their Service is being stolen or fraudulently used. 3.21.3 Terms of Service

The Card is offered on a monthly basis which begins on the date that Lightyear activates the Service and ends on the day before the same date in the following month. The minimum term length is one (1) month.

The Card is a prepaid calling service. The card is unusable until registered and loaded. Each time the Card is used, a per minute charge based on the call destination will be deducted from the Card. A schedule of rates by destination is located in this Tariff, and at <http://vcard.lightyear.net>. If a User does not use all of the dollars/minutes within the monthly bill cycle they were purchased, the dollar/minutes will expire and will not roll over to the next month regardless of whether the minutes were part of the initial purchase or a re-charge of minutes.

Lightyear is not responsible for any long distance charges incurred by the User when dialing a local access number. User should verify with their current Local Carrier and review their existing local and long distance plan to guarantee that no long distance charges will be charged to User's account. 3.21.3 Terms of Service, (cont'd.)

The User must provide Lightyear with a valid credit card number at the time the Service is activated. The credit card used to load and register the Card will be charged automatically each month with the same dollar amount originally purchased or as modified by the User until such time as the User cancels the Service through <http://vcard.lightyear.net>, or by calling Lightyear's Customer Service Department. If the credit card expires, or User closes the credit card account, or User's billing address changes, or the credit card is cancelled and replaced because of loss or theft, User must advise Lightyear immediately. If User's credit card is cancelled or determined to be invalid, Service will be disconnected immediately upon e-mail notice to User. Service will be restored upon request once a valid credit card is presented.

Lightyear will electronically invoice all charges on a monthly basis, in advance, to User's credit card, including but not limited to: re-charge fees, disconnection fees, and monthly Service fees, and any applicable taxes and regulatory fees.

If Lightyear changes its rates, the recurring monthly charges affected by such change will be assessed at the new rate for the full billing period during which the new recurring charge rate became effective. This credit card authorization will remain valid until thirty (30) days after Lightyear receives written notice from the User terminating Lightyear's authority to charge the credit card, whereupon Lightyear may charge User a disconnect fee and any other outstanding charges and terminate the Service. All payments must be made in United States Currency.

The Card has no cash value, and there are no refunds, returns or exchanges associated with the Card. No refund will be provided if the Card is cancelled before usage is depleted.

The discontinuance of service(s) by Lightyear pursuant to these provisions does not relieve User of any obligation to pay Lightyear for charges due and owing for service(s) furnished up to the time of discontinuance.

3.21.4 Rates and Charges

The minimum call duration is one minute. For usage decrement purposes, the length of each metered call is rounded to full minute increments. If the computed charge for a call includes a fraction of a cent, the fraction is rounded up to the nearest whole cent. If the computed charges for taxes and surcharges include a fraction of a cent, the fraction is rounded up to the nearest whole cent.

Generally, timing of metered calls begins when the called party or an automated answering device (such as an answering machine or a facsimile machine) answers the call, and ends when one of the parties disconnects from the call. However, some foreign carriers (with whom Lightyear must interconnect in order to terminate calls to foreign countries) designate a call as "answered" when the called party's line rings or after a certain number of rings, and will charge Lightyear for a completed call. In these situations, Lightyear will charge for the call as if it were answered by the called party.

The User may select one of the following rate options as the Monthly Recurring Rate to be charged automatically each month to the User's credit card. A User may select a higher priced option at any time free of charge. However, a fee will be assessed if User elects to purchase a lower priced monthly rate option. Applicable taxes and regulatory fees are assessed in addition to the rates and charges shown below.

The minimum term for the Card is one (1) month from the date of activation. Customers must allow up to two (2) full business days for a card cancellation request to be processed. Any charges that become due and payable upon cancellation will be billed directly to Customer's credit card.

SECTION 5 - GRANDFATHERED SERVICES, (CONT'D.)**5.24 Lightyear Prepaid Calling Card Services - This Service is no longer available to new customers.**

Lightyear Prepaid Calling Card Services allows users to place calls from locations other than their normal place of business. The Customer dials a toll-free number, and an automated voice prompt will instruct the user to enter the 14-digit authorization code. At this time, the voice prompt will inform the user of the number of minutes remaining on the card, and request the user to dial the destination number. With two minutes remaining before the card expires, the caller will hear an automated warning announcement. Calls are measured in one (1) minute increments.

Service is paid for in advance of actual usage. Charges for the service are deducted from the available balance on the pre-paid card.

Calls to 500, 700, 800/888, 900 and 976 numbers and calls requiring operator assistance and the quotation of time and charges cannot be completed using the Prepaid Calling Card. Air to ground and high seas service may not be completed. Calls may not be completed using rotary telephone service.

All calls must be charged against a Prepaid Calling Card that has sufficient available balance. A Customer's call will be interrupted with an announcement one minute before the balance is about to be depleted. Calls in progress will be terminated by the Company if the balance on the Prepaid Calling Card is insufficient to continue the call.

The Company does not refund any unused balances in a Prepaid Calling Card Account.
